

EPPO CODES

Pest Reporting

Anne-Sophie Roy (Information Officer) - roy@eppo.int

Pest reporting

In the field of plant quarantine: when new outbreaks of regulated pests or pests which might present an immediate danger are found, NPPOs have to report to several organizations: IPPC, EPPO, EU (if Member State)

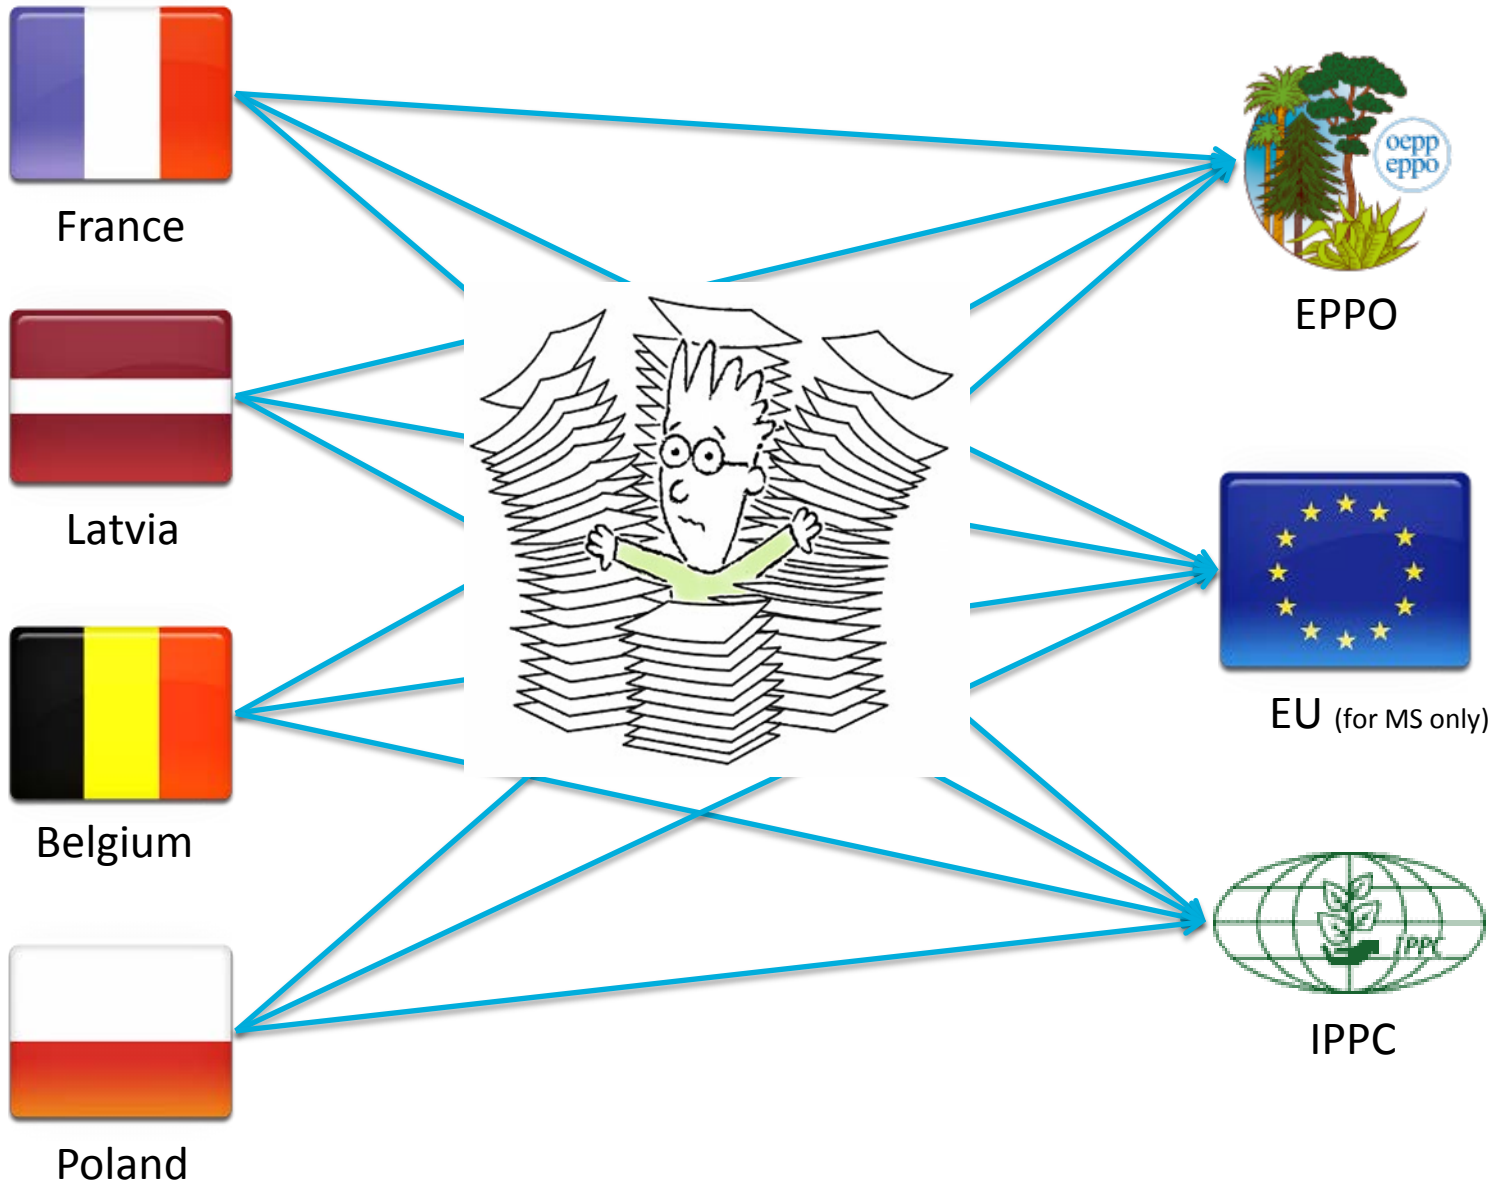

To fulfil obligations stated in the IPPC

To fulfil obligations stated in EPPO Convention (articles V, VI)

To fulfil obligations of EU Directive 2000/29 (for the EU member states)

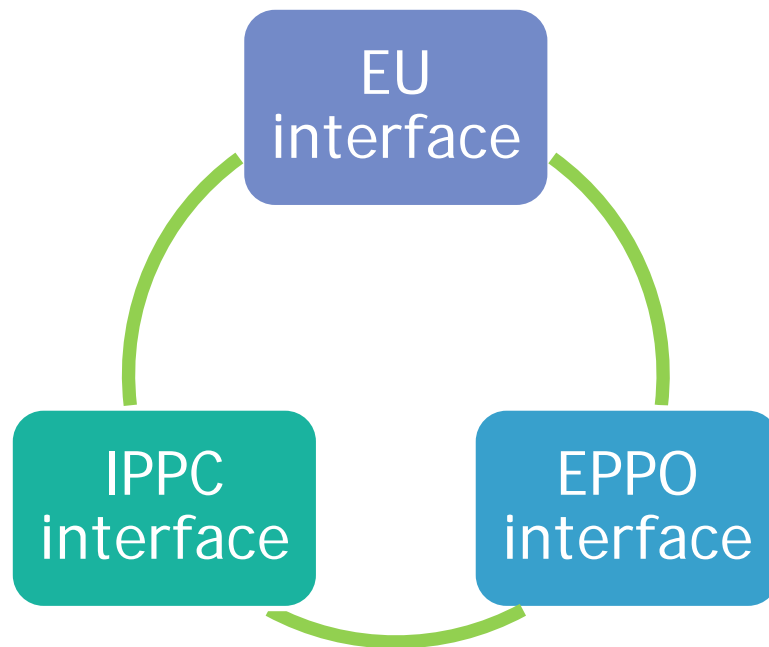

Current situation

Objectives

Design a system which can allow single data entry by NPPOs and communication of pest reports (they may not contain exactly the same amount of details) to all interested bodies.

The common links between all these pest reporting systems are the EPPO Codes for pests, diseases and host plants. Formats for data exchange (XML) are being developed.

Thank you for your attention
