**Forest pests on the territories of the former USSR**

As part of a broader programme of analysis of the risk of forest pests in the former USSR to other parts of EPPO region, the EPPO Secretariat has made a collection of information concerning the pests of forest trees in the former USSR. The table first presented at the Panel meeting in Helsinki (2000-02-8/10) and then in Perm' (2000-07-04/07), Paris (2001-03-13/15), Zagreb (2001-07-03/05), Vilnius (2002-03-12/14), Paris (2002-09-24/26), Riga (2003-04-01/04), Venezia (IT, 2003-10-1/3) and Grisslehamn (SE, 2004-09-27/29) was divided into 10 tables: (1) the most important (for non-European part of the EPPO region) pests for which PRA was performed by the Panel; (2) forest pests causing significant damage on the territory of the former USSR (intended to be included into the PQR system), for which either more information is needed, or for which pathways do not at present exist, or whose host plants are not of importance for Central and Western Europe; (3a) less important (for non-European part of the EPPO region) pests which are present in Central/Western Europe; (3b) forest pests causing significant damage on the territory of the former USSR, which may present risk only or mainly to plants, which are not considered as forest trees and shrubs in most of the non-Asian part of the EPPO region; (4) pests causing significant damage on the territory of the former USSR added to the data base and not yet prioritised; (5) first priority (for non-European part of the EPPO region) forest diseases; (6) forest diseases, for which more information is needed; (7a) forest diseases causing significant damage on the territory of the former USSR, but which are already present in other parts of the EPPO region; (7b) forest diseases causing significant damage on the territory of the former USSR, which may present risk only or mainly to plants, which are not considered as forest trees and shrubs in most of the non-Asian part of the EPPO region; (8) forest diseases causing significant damage on the territory of the former USSR added to the data base and not yet prioritised. The information is presented in the form of tables which, it is intended, will finally include all recorded forest pests. The data has been obtained mainly from a study of the major forestry publications in the Russian language, and continue by an analysis of regionally-oriented literature in order to ensure that those pests are included that may be of concern to only a relatively small part of this large geographic area or that may attack host plants of minor importance.

The further continuation of this programme will be to prioritize these pests into categories of importance as potential quarantine pests to the rest of EPPO region; thereafter, more detailed information will be collected about the priority pests in order to perform PRAs to decide whether these pests should be quarantine pests and what measures should be taken to prevent their introduction.

Structure of the table

The table is arranged in order of the following pest groups, insects, mites, nematodes, fungi and bacteria, and then subdivided according to the taxonomy of the groups. It presents the identity of each pest, with the scientific name, (as verified by the Arthropod Name Index (ANI) data base of CABI, or the EPPO Plant Protection Thesaurus), as well as the name generally used in Soviet literature (placed in square brackets).

Information on distribution of the pest covers distribution in the former USSR and distribution in other countries. The distribution in the former USSR covers the fifteen Soviet Socialist Republics (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russian Federation, Tadzhikistan, Turkmenistan, Ukraine and Uzbekistan). In this report, because of its large geographic area, the Russian Federation is subdivided into the following arbitrary units, which do not correspond exactly with the administrative subdivisions<sup>1</sup> (see Figure 1):

1. **North European Russia** (N.E.Russia) – republics of Karelia and Komi; oblast's of Arkhangel'sk and Murmansk;
2. **Central European Russia** (C.E.Russia) – republics of Bashkiria, Chuvashia, Mari, Mordovia, Tatarstan and Udmurtia; oblast's of Bryansk, Vladimir, Gor'ki, Ivanovo, Kaliningrad, Kaluga, Kirov, Kostroma, Leningrad, Lipetsk, Moscow, Novgorod, Oryol, Penza, Perm', Ryasan', Smolensk, Tambov, Tula, Tver', Ulianovsk, Vologda and Yaroslavl';
3. **South European Russia** (S.E.Russia) – krays of Krasnodar and Stavropol'; republics of Chechnya, Dagestan, Kabardino-Balkaria, Kalmykia and North Ossetia; oblast's of Astrakhan', Belgorod, Kursk, Nizhnii Novgorod, Orenburg, Rostov, Samara, Saratov, Volgograd and Voronezh;
4. **North – Western Siberia** (N.W.Siberia) – north-west of Krasnoyarsk kray; north of Tyumen' oblast';
5. **North – Eastern Siberia** (N.E.Siberia) – republic of Sakha; north-east of Krasnoyarsk kray;
6. **Southern Siberia** (S.Siberia) – republic of Tuva; Altay kray, south of Krasnoyarsk kray; oblast's of Chelyabinsk, Irkutsk, Kemerovo, Kurgan, Novossibirsk, Omsk, Sverdlovsk and Tomsk; south of Tyumen' oblast';
7. **Transbaikalia** (Transbaik.) – republic of Buryatia; oblast' of Chita;
8. **North of the Russian Far East** (N.FarEast) – oblast's of Kamchatka and Magadan;
9. **South of the Russian Far East** (S.FarEast) – krays of Khabarovsk and Primorie; oblast's of Amur and Sakhalin.

Also for convenience, some of the other Soviet Socialist Republics are grouped as follows:

**Baltic countries** – 3 countries: Estonia, Latvia and Lithuania and Kaliningrad oblast' of Russia;

**Central Asia** – 4 countries: Kyrgyzstan, Tadzhikistan, Turkmenistan and Uzbekistan;

**Transcaucasus** – 3 countries: Armenia, Azerbaijan and Georgia.

The table contains a column giving the main host genera, in order of host importance, and a column with the parts of the host plants that are damaged by the pest (e.g. fruits, seeds, leaves, trunks and branches, roots, cut wood). Then the economic significance of the pest damage in the areas of origin is given according to the following broad categories: **VH** – very high; **H** – high; **M** – medium; **L** – low; **VL** – very low, often with a range (e.g. L – H) showing differences in importance in different parts of the region. If the pest is regarded as a quarantine pest in another part of the world, this is noted in the next column. Finally, the last column presents some remarks concerning damage, host plants or vector status.

---

<sup>1</sup> Note that the Russian Federation is divided into territorial units each called either "republic", "oblast'" or "kray", the differences between these units depending on their level of autonomy.

**Figure 1. The area of the former USSR.**

Countries are shown by their two-letter country codes: AM – Armenia; AZ – Azerbaijan; BY – Belarus; EE – Estonia; GE – Georgia; KG- Kyrgyzstan; KZ – Kazakhstan; LT – Lithuania; LV – Latvia; MD – Moldova; RU – Russian Federation; TJ – Tajikistan; TM – Turkmenistan; UA – Ukraine; UZ – Uzbekistan. For the purposes of displaying pest distribution in this project, the Russian Federation is divided into nine sub-units (as described in the text).

**Table 1. INSECTS****COLEOPTERA****Table 1. Most important forest pests causing significant damage on the territory of their actual distribution for which PRA has been conducted**

Nº	Pest	Group of organisms	Distribution			Main host plants in the former USSR	Damaged parts of plants	Economic significance in the area of origin	Remarks						
			In the former USSR	In North America	In other countries										
<b>Insecta</b>															
<b>Coleoptera</b>															
1.1	<i>Agrilus planipennis</i> (= <i>Agrilus feretrius</i> Obenberger = <i>Agrilus marcopili</i> Obenberger = <i>Agrilus marcopoli ulmi</i> Kurowasa) **	<i>Buprestidae</i>	Not known, but according to Haack et al. (2002) is present in the Far East of Russia	Introduced: Canada (Ontario: Essex county), USA (Michigan: Livingston, Macomb, Oakland, Monroe, Washtenaw and Wayne counties; Ohio: Lucas county)	North-eastern China (Jilin, Liaoning, Heilongjiang, Inner Mongolia, Hebei and Shandong Provinces), Japan, Korea Republic, Mongolia and Taiwan	<i>Fraxinus americana</i> , <i>F. chinensis</i> , <i>F. japonica</i> , <i>F. lanuginosa</i> , <i>F. mandshuriana</i> , <i>F. mandshurica</i> , <i>F. nigra</i> , <i>F. pennsylvanica</i> , <i>F. rhynchophylla</i> , <i>Juglans mandshurica</i> , <i>Pterocarya rhoifolia</i> , <i>Ulmus davidiana</i> and <i>U. propinqua</i> . No data is given on the susceptibility of ash species commonly growing in Europe (e.g. <i>F. excelsior</i> , <i>F. angustifolia</i> ).	Trunks (under bark)	M – H							
1.2	<i>Melanophila guttulata</i> Gebler (= <i>Phaenops guttulatus</i> Gebler = <i>Phaenops guttulata</i> Gebler = <i>Melanophila discopunctata</i> Fald. = <i>Melanophila fulvoguttata</i> Kerr. = <i>Phaenops fulvoguttata</i> Jacobs.) *	<i>Buprestidae</i>	Russia (Eastern half of European Russia, Siberia, Transbaikalia, Far East)	Absent	Absent, intercepted in 1985 in pine wood ( <i>Pinus sylvestris</i> ) imported from Russia to Finland	Attacks mainly larch ( <i>Larix sibirica</i> , <i>L. gmelinii</i> and other larch species), but also <i>Abies</i> ( <i>A. sibirica</i> , <i>A. sp.</i> ), <i>Picea</i> ( <i>P. abies</i> , <i>P. ajanensis</i> , <i>P. obovata</i> , <i>P. sp.</i> ), <i>Pinus</i> ( <i>P. sibirica</i> , <i>P. sylvestris</i> , <i>P. sp.</i> )	Trunks (under bark)	M – VH							

**Table 1. INSECTS**

COLEOPTERA									
1.3	<i>Aeolesthes sarta</i> Solsky **	<i>Cerambycidae</i>	Turkmenistan, Uzbekistan, Tajikistan, Kyrgyzstan (south)	Absent	India (Western Himalayas), Pakistan (north), Afghanistan, Iran	Many species of <i>Ulmus</i> , <i>Populus</i> , <i>Salix</i> , <i>Platanus</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Juglans</i> , <i>Quercus</i> , <i>Betula</i> , <i>Fraxinus</i> , <i>Acer</i> , <i>Morus</i> , <i>Gleditsia</i> , <i>Robinia</i> , <i>Elaeagnus</i> and many other hardwoods and fruit trees. Its preferred hosts are: <i>Ulmus</i> <i>minor</i> , <i>Ulmus pumila</i> , <i>Populus</i> <i>diversifolia</i> , <i>Populus euphratica</i> , <i>Populus talassica</i> , <i>Populus alba</i> , <i>Populus X euroamericana</i> , <i>Salix</i> <i>acmophylla</i> , <i>Salix turanica</i> , <i>Salix</i> <i>aongarica</i> , <i>Platanus orientalis</i> , <i>Platanus acerifolia</i> , <i>Malus pumila</i> and <i>Juglans regia</i> .	Trunks (wood)	M – VH	Main damage – in mountains and in city plantations
1.4	[ <i>Corymbia</i> <i>succedanea</i> L. (= <i>Leptura succedanea</i> L. = <i>Anoplodera</i> <i>succedanea</i> Lew.)] *	<i>Cerambycidae</i>	Russia (Transbaikalia, South Far East)	Absent	Northern China, Japan, Korea	All available of conifer species, but prefers <i>Pinus koraiensis</i> , <i>Pinus pumila</i> and <i>Picea</i> species ( <i>P. abies</i> , <i>P. ajanensis</i> , <i>P.</i> <i>obovata</i> , <i>P. sp.</i> )	Trunks (wood)	VL – L	
1.5	<i>Dokhtouroffia</i> (= <i>Dokhturovia</i> = <i>Dochturovia</i> ) <i>baeckmanni</i> Yankovskii *	<i>Cerambycidae</i>	Kyrgyzstan; Kazakhstan; Uzbekistan	Absent	Absent	Spruce and fir, especially <i>Picea</i> <i>schrenkiana</i> and <i>Abies semenovii</i>	Trunks (wood)	L – M	
1.6	<i>Hesperophanes</i> <i>campestris</i> (= <i>Trichoferus</i> <i>campestris</i> Faldermann = <i>Trichoferus</i> <i>turkestanicus</i> Heyden = <i>Trichoferus</i> <i>flavopubescens</i> Kolbe = <i>Trichoferus</i> <i>rusticus</i> Ganglbauer) **	<i>Cerambycidae</i>	Armenia (recently), southern Kazakhstan, Kyrgyzstan, Russia (south-east of European part - recently, Transbaikalia, Eastern Siberia, Far East), Tajikistan, Uzbekistan.	Absent	Japan, Northern China, Northern Korea, northern Mongolia	Attacks <i>Malus</i> ( <i>M. domestica</i> , <i>M.</i> <i>sp.</i> ), <i>Morus</i> , <i>Sorbus</i> (= <i>Micromeles</i> ) <i>alnifolia</i> , <i>Astragalus</i> , <i>Gleditsia</i> , <i>Salix</i> , <i>Betula</i> , <i>Broussonetia paprifera</i> and other fruit and deciduous trees, preferring mainly <i>Malus</i> and <i>Morus</i> , may attack cut wood of <i>Picea</i> ( <i>P. schrenkiana</i> ) and <i>Pinus</i>		L – H	
1.7	<i>Monochamus</i> <i>impluviatus</i> Motschulsky *	<i>Cerambycidae</i>	N.E.Russia (East), C.E.Russia (East), N.E.Siberia, N.W. Siberia, S.Siberia, Transbaikalia, S.Far East	Absent	Northern Mongolia; Northern China; Japan; Korea	Attacks all available species of coniferous in its natural area ( <i>Larix</i> , <i>Pinus</i> , <i>Picea</i> , <i>Abies</i> and others), but prefers <i>Larix</i> ( <i>L.</i> <i>gmelinii</i> , <i>L. sibirica</i> , <i>L. sp.</i> ) and <i>Pinus sibirica</i>	Trunks (wood)	L – M	

**Table 1. INSECTS**

COLEOPTERA								
1.8	<i>Tetropium gracilicorne</i> Reitter **	<i>Cerambycidae</i>	N.E. Siberia (introduced to Kamchatka where it spread rapidly and is now an important pest), N.W. Siberia, S. Siberia, S. Far East, Kazakhstan	Absent	Northern China, northern Japan (Hokkaido, Honshu), northern Mongolia, Koreas. In 1998 intercepted in Austria in larch wood originating from Siberia	All available species of spruce, fir, larch and pine, but prefers <i>Larix gmelinii</i> , <i>Larix sibirica</i> , <i>Pinus sibirica</i> , <i>P. koraiensis</i> , <i>P. sylvestris</i> , <i>Abies nephrolepis</i> , <i>Picea ajanensis</i>	Trunks (under bark)	L – H
1.9	<i>Tetropium staudingeri</i> Pic. (= <i>Tetropium tjanshanicum</i> Semenov = <i>Tetropium staudingeri</i> Pavilstshikov) *	<i>Cerambycidae</i>	Kyrgyzstan, Kazakhstan, Uzbekistan	Absent	Northwestern China	Attacks spruce, especially <i>Picea schrenkiana</i> . Many authors note only <i>Picea schrenkiana</i> as a host plant	Trunks (under bark)	L – M
1.10	[ <i>Turcmениgena</i> (= <i>Turkmenigena</i> ) <i>varentzovi</i> Melgunov] *	<i>Cerambycidae</i>	Kazakhstan, Turkmenistan, Uzbekistan	Absent	Absent	Attacks mainly saxauls, especially <i>Haloxylon aphyllum</i> and <i>H. persicum</i> , but also <i>Salsola</i> , especially <i>S. richteri</i>	Trunks and roots (under bark)	L – M
1.11	<i>Xylotrechus altaicus</i> Gebler (= <i>Xyloclytus altaicus</i> Gebler) ***	<i>Cerambycidae</i>	N. E. Siberia, N. W. Siberia, S. Siberia, N. Far East, Transbaikalia, S. Far East	Absent	Northern Mongolia	Attacks only larch: <i>Larix sibirica</i> , <i>L. gmelinii</i> , <i>L. olgensis</i> , <i>L. kamtschatica</i> , <i>L. x maritima</i> and other larch species present in its natural range	Trunks (wood)	L – H
1.12	<i>Xylotrechus namanganensis</i> Heyden **	<i>Cerambycidae</i>	Kyrgyzstan, Kazakhstan, Tajikistan, Turkmenistan, Uzbekistan.	Absent	Afghanistan, China, possibly Iran	<i>Juglans</i> , <i>Prunus</i> , <i>Malus</i> , <i>Morus</i> , <i>Crataegus</i> , <i>Elaeagnus</i> , <i>Populus</i> , <i>Ulmus</i> , <i>Celtis</i> , <i>Salix</i> , <i>Betula</i> , <i>Alnus</i> , <i>Platanus</i> , other deciduous trees	Trunks (wood)	L – H
1.13	<i>Agelastica alni orientalis</i> Baly (= <i>A. orientalis</i> Baly) *	<i>Chrysomelidae</i>	Kazakhstan (South-East); Kyrgyzstan; Uzbekistan, Tajikistan, Turkmenistan	Absent	China, Iran, possibly Afghanistan	Attacks <i>Salix</i> , <i>Populus</i> ( <i>P. alba</i> , <i>P. sp.</i> ), <i>Prunus dulcis</i> , <i>Malus</i> and <i>Betula</i>	Leaves	L – M
1.14	<i>Hylobius albosparsus</i> Boheman *	<i>Curculionidae</i>	Russia (North-East of the European part, Siberia, Transbaikalia, Far East, including Sakhalin, Kamchatka and Magadan)	Absent	China, Japan, Korea, Mongolia	Attacks all available species of conifers within its natural range, but prefers <i>Larix</i> ( <i>L. gmelinii</i> , <i>L. sibirica</i> , <i>L. lubarskii</i> , <i>L. olgensis</i> , <i>L. sp.</i> ), <i>Pinus</i> ( <i>P. sibirica</i> , <i>P. sylvestris</i> , <i>P. sp.</i> ) and <i>Picea</i> ( <i>P. abies</i> , <i>P. obovata</i> , <i>P. sp.</i> )	Trunks (under bark)	L – M
1.15	<i>Polyphylla</i> (= <i>Xerasiobia</i> ) <i>alba</i> Pallas (= <i>Polyphylla hololeuca</i> Pallas) *	<i>Scarabaeidae</i>	C.E.Russia, S.E.Russia, S. Siberia; Azerbaijan, Armenia, Georgia, Kazakhstan, North of Turkmenistan, Uzbekistan, Ukraine	Absent	Northern and central China (Dzungaria, Gobi desert, Guansi), Mongolia	Feeds on roots of many plants including forest trees. Among agricultural crops, the most often damages roots of fruit trees, grape wine, potato, beet and strawberry	Roots	L – M
								Main damage – to young plantations

**Table 1. INSECTS****COLEOPTERA**

1.16	<i>Ips golovjankoi</i> Pjatnitzkii ( <i>Orthotomicus</i> <i>golovjankoi</i> Pjatnitzkii) *	Scolytidae	N. E. Siberia, S. Siberia (East), Transbaik.; S. Far East	Absent	Northern China, northern Japan, northern Korea	Attacks pine, especially <i>Pinus koraiensis</i> , <i>P. sibirica</i> and <i>P. x funebris</i> , and spruce, especially <i>Picea ajanensis</i> and <i>P. obovata</i>	Trunks (under bark)	VL – L	
1.17	<i>Ips hauseri</i> Reitter **	Scolytidae	S. Siberia (Altai Kray); Kyrgyzstan, Kazakhstan, Tajikistan	Absent	Absent	Attacks spruce, pine and larch, especially <i>Picea schrenkiana</i> , <i>Larix sibirica</i> , <i>Pinus sylvestris</i> and <i>Pinus pallasiana</i>	Trunks (under bark)	M – H	Main damage – to forests in mountains
1.18	<i>Ips spessivtsevi</i> Lebedev (= <i>Pityogenes</i> <i>spessivtsevi</i> Lebedev = <i>Pityogenes</i> <i>perforosus</i> Bees.) *	Scolytidae	Kazakhstan, Kyrgyzstan, Tadzhikistan	Absent	Absent	Attacks spruce, especially <i>Picea schrenkiana</i>	Trunks (under bark)	M – H	
1.19	<i>Ips subelongatus</i> Motschulsky (= <i>Ips fallax</i> Egg.) **	Scolytidae	Russia (north-east of European Russia, all Siberia, Transbaikalia and Far East)	Absent	Northern Mongolia; Northern China	Attacks mainly larch: <i>Larix sibirica</i> , <i>L. gmelinii</i> , <i>L. olgensis</i> , and other larch species, but also <i>Pinus</i> ( <i>P. sylvestris</i> , <i>P. sibiricus</i> , <i>P. koraiensis</i> ), <i>Picea</i> , <i>Abies</i> and other coniferous present in its natural range	Trunks (under bark)	L – H	
1.20	<i>Scolytus morawitzi</i> Semenow (= <i>Eccoptogaster</i> <i>morawitzi</i> Semenow = <i>Scolytus pini</i> Eggers) **	Scolytidae	Russia (centre and north of European Russia, Southern Siberia, south of N. E. Siberia, south of N. W. Siberia, Transbaikalia, Far East)	Absent	Northern Mongolia	Attacks mainly larch: <i>L. gmelinii</i> , <i>L. olgensis</i> , <i>L. kamtschatica</i> , <i>Larix sibirica</i> , <i>L. x maritima</i> and other larch species present in its natural range, but also <i>Pinus sibiricus</i> , <i>P. koraiensis</i> and other coniferous	Trunks (under bark)	L – M	

**Table 1. INSECTS****DIPTERA & HOMOPTERA**

<b>Diptera</b>									
1.21	<i>Strobilomyia luteofovea</i> Fan & Fang (= <i>Lasiomma jurtschenkoi</i> Elberg)*	<i>Anthomyiidae</i>	S. Far East	Absent	Northeastern China	<i>Larix gmelini</i> , <i>L. olgensis</i> , and <i>L. cajanderi</i>	Cones and seeds	M - H	
1.22	<i>Strobilomyia viaria</i> Huckett (= <i>Lasiomma melaniola</i> Fan. = <i>Strobilomyia melaniola</i> Fan.) **	<i>Anthomyiidae</i>	N. E. Siberia, S. Siberia (Baikal area), Transbaikalia, N. Far East (Kamtchatka)	Widespread in Western Canada and USA	Northeastern (Lianoning, Jilin, Heilongjiang Inner Mongolia) and Central China	Attacks cones of larch species: <i>Larix gmelini</i> , <i>L. olgensis</i> , <i>L. principis-rupprechtii</i> , and <i>L. cajanderi</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
1.23	<i>Cecidomyia pumila</i> Mamaev*	<i>Cecidomyiidae</i>	N. Far East	Absent	China	<i>Pinus pumila</i> , may also occasionnally infest <i>Pinus sibirica</i>	Cones and Seeds	M-H	Data of Dr. Alain Roques
1.24	<i>Resseliella ingrica</i> Mamaev (= <i>Thomasiniana ingrica</i> Mamaev) *	<i>Cecidomyiidae</i>	C. E. Russia (Leningrad region), S. Siberia (Krasnoyarsk territory)	Absent	Absent	Infests cones of spruce, <i>Picea abies</i> and <i>P. obovata</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
<b>Homoptera</b>									
1.25	<i>Adelges lapponicus</i> Kholodkovskii (= <i>Chermes lapponicus</i> var. <i>praecox</i> Kholodkovskii = <i>Adelges laplanicus</i> Kholodkovskii) *	<i>Adelgidae</i>	N. E. Russia, C. E. Russia; Baltic countries; Belarus	Absent	Estonia (in parks), Finland, Kyrgyzstan (introduced)	Prefers <i>Picea abies</i> but may develop on <i>P. obovata</i> , <i>P. glauca</i> , <i>P. mariana</i> , <i>P. schrenkiana</i> , <i>P. pungens</i> , <i>P. ajanensis</i> and other spruce species	Young sprouts and needles	L - M	Main damage - to young trees in plantations and nurseries
1.26	<i>Ceroplastes japonicus</i> Green (= <i>Cerostegia japonicus</i> Green = <i>Ceroplastes floridensis</i> Comst. = <i>Ceroplastes floridensis</i> var. <i>japonicus</i> Green) *	<i>Coccidae</i>	S. E. Russia (introduced); Transcaucasus, Azerbaijan (introduced), Georgia including Adzharia and Abkhasia (introduced), China, Japan, Republic of Korea	Not yet checked	China, Japan, Republic Korea, New Zealand, Great Britain (introduced), south-eastern France (introduced), Italy (introduced), Slovenia (introduced)	Damages 95 to 121 plant species, prefers <i>Laurus nobilis</i> , <i>Diospyros kaki</i> , <i>Camellia sinensis</i> and <i>Morus</i> spp. Less preferable are <i>Prunus laurocerasus</i> , <i>Citrus reticulata</i> , <i>Citrus unshiu</i> and some other <i>Citrus</i> spp., then come <i>Malus</i> spp., <i>Magnolia</i> spp., <i>Poncirus trifoliata</i> , <i>Camellia</i> spp., <i>Pittosporum</i> , <i>Crataegus</i> spp.	Trunks, leaves & branches	L - H	<i>Coccidae</i>
1.27	<i>Ceroplastes sinensis</i> Del Guercio *	<i>Coccidae</i>	Southern Russia (introduced); Azerbaijan (introduced), Georgia including Adzharia and Abkhasia (introduced), Tajikistan (introduced), Uzbekistan (introduced)	Mexico, USA	Algeria, Australia, Benin, Brazil, China, Côte d'Ivoire, Egypt, France, Hawaii, India, Iran, Italy, Japan, Morocco, Mozambique, New Zealand, Portugal, Spain, Syria, Togo, Tunisia, Turkey, Viet Nam	Damages 30 to 137 species of plants. It prefers different <i>Citrus</i> species (especially <i>Citrus sinensis</i> ), <i>Punica granatum</i> , <i>Laurus nobilis</i> , <i>Diospyros kaki</i> , <i>Camellia sinensis</i> , <i>Eriobotrya japonica</i> , <i>Juglans regia</i> , <i>Prunus persica</i> , <i>Pyrus</i> spp. and many other plants. On herbaceous plants, the pest may develop only larvae of the first and the second stages.	Trunks, leaves & branches	L - H	<i>Coccidae</i>

**Table 1. INSECTS**

HOMOPTERA, HYMENOPTERA &amp; ISOPTERA

1.28	<i>Lepidosaphes ussuriensis</i> Borchsenius (= <i>Paralepidosaphes ussuriensis</i> Borchsenius) **	<i>Diaspididae</i>	Russia (South of the Far East and Sakhalin)	Not known	Northern China, Japan (Hokkaido, Honshu)	Polyphagous pest, damaging <i>Ulmus</i> , <i>Alnus</i> , <i>Malus</i> , <i>Populus</i> , <i>Betula</i> , <i>Euonymus</i> , <i>Syringa</i> , and many other plants	Trunks & branches (on the bark)	L – M	Main damage - to young plants
<b>Hymenoptera</b>									
1.29	<i>Dryocosmus</i> (= <i>Biorhiza</i> ) <i>kuriphilus</i> Yasumatsu **	<i>Cynipidae</i>	Absent	USA. (south east: Georgia, Alabama, North Carolina and Tennessee)	China, Italy (Piedmont region, South of Cuneo province) Japan, Korea	Attacks <i>Castanea crenata</i> , <i>C. dentata</i> , <i>C. mollissima</i> , <i>C. sativa</i> and their hybrids. Infests also <i>C. seguini</i> in China, but not yet other wild North American species of <i>Castanea</i> : <i>C. pumila</i> and <i>C. alnifolia</i> , which are often grown adjacent to infested chestnuts	Twigs & nuts	L – M	
1.30	<i>Sirex ermak</i> Semenov-Tian-Shanskii (= <i>Paururus ermak</i> Semenov) **	<i>Siricidae</i>	N. W. Siberia, N. E. Siberia, S. Siberia, Transbaikalia, S. Far East (including Sakhalin island)	Absent	Not known. Possibly northern Mongolia and northern China	Attacks several species of <i>Larix</i> ( <i>L. gmelinii</i> , <i>L. sibirica</i> , preferred hosts, <i>L. sp.</i> ), <i>Picea</i> ( <i>P. ajanensis</i> , <i>P. obovata</i> , <i>P. sp.</i> ), <i>Pinus</i> ( <i>P. sibirica</i> , <i>P. sp.</i> ) and <i>Abies</i> ( <i>A. sibirica</i> , <i>A. sp.</i> )	Trunks (wood)	VL – M	
<b>Isoptera</b>									
1.31	<i>Anacanthotermes</i> (= <i>Hodotermes</i> = <i>Acanthotermes ahngerianus</i> Jacobson *)	<i>Termitidae</i>	Kyrgyzstan, southern Kazakhstan, Tajikistan, Turkmenistan, Uzbekistan	Absent	Iran	Attacks all available kinds of wood (coniferous and deciduous) paper and cardboard, cotton textile and other materials containing cellulose; also may damage plastic materials: penopolyurethane, polyethylene, foam plastic, glass-fibre plastics, etc. Known to damage seeds and plants of <i>Haloxylon</i> sp., <i>Salsola</i> ( <i>S. richteri</i> , <i>S. gemmascens</i> , <i>S. arbuscula</i> , <i>S. dendroides</i> , <i>S. sp.</i> ), <i>Artemisia</i> ( <i>A. harba alba</i> , <i>A. kemrudica</i> , <i>A. sp.</i> ), <i>Alhagi persarum</i> , <i>Lagonychium farctum</i> , <i>Gossypium</i> sp., <i>Ephedra strobilacea</i> , <i>Astrogalus unifoliolatus</i> , <i>Euclidium syriacum</i> , <i>Carex pachistilis</i> , <i>Koelpinia linearis</i> , <i>Lepidium perfoliatum</i> , <i>Reaumuria</i> sp., <i>Malcolmia</i> sp., <i>Alyssum</i> sp., <i>Gramineae</i> , and some other	Wood	M – H	Main damage - to telegraph-poles, wood in buildings, etc.

**Table 1. INSECTS****ISOPTERA & LEPIDOPTERA**

1.32	<i>Anacanthotermes</i> (= <i>Hodotermes</i> = <i>Acanthotermes</i> ) <i>turkestanicus</i> Jacobson *	Termitidae	Tajikistan, Turkmenistan, Uzbekistan	Absent	Iran	Attacks all available kinds of wood (coniferous and deciduous) paper and cardboard, cotton textile and other materials containing cellulose; also may damage plastic materials: peno-polyurethane, polyethylene, foam plastic, glass-fibre plastics, etc. Known to damage seeds and plants of <i>Salsola dendroides</i> and <i>S. sp.</i> , <i>Alchagi persarum</i> , <i>Morus alba</i> , <i>Vitis vinifera</i> , <i>Malus domestica</i> , <i>Gleditsia</i> , <i>Gramineae</i> , cotton and some other	Wood	M – H	Main damage - to telegraph-poles, wood in buildings, etc.
<b>Lepidoptera</b>									
1.33	<i>Coleophora dahurica</i> Fal'kovich *	Coleophoridae	N.E. Siberia, S. Siberia (East), Transbaik., N. Far East, S. Far East	Absent	China, Mongolia	Attacks larch, especially <i>Larix gmelinii</i> , <i>L. sibirica</i> and <i>L. olgensis</i>	Needles	L – M	
1.34	<i>Erannis jacobsoni</i> Diakonoff (= <i>Hybernia jacobsoni</i> Diakonoff *)	Geometridae	N.E. Siberia (South), S. Siberia (East), Transbaik., N. Far East, S. Far East (South)	Absent	Mongolia	Attacks only larch, especially <i>Larix gmelinii</i> and <i>Larix sibirica</i>	Leaves	L – H	
1.35	<i>Phyllonorycter</i> (= <i>Lithocolletus</i> = <i>Phyllorycter</i> ) <i>issikii</i> Kumata *	Gracillariidae	C. E. Russia (introduced), S. E. Russia (introduced), S. Far East; Ukraine (introduced)	Absent	Korea, Japan, Lithuania (introduced), Czekia (introduced), Germany (introduced), Austria (introduced), Poland (introduced)	Make plicated mines in the lower side of leaves of <i>Tilia cordata</i> (preferred host), <i>T. amurensis</i> , <i>T. mandshurica</i> , <i>T. maximowicziana</i> and other <i>Tilia</i> , but also <i>Betula platyphylla</i>	Leaves	L – H	Main damage – in city plantations
1.36	<i>Dendrolimus sibiricus</i> Tschetverikov (= <i>D. superans sibiricus</i> Tschetverikov) (= <i>D. laricis</i> Tschetverikov) **	Lasiocampidae	N.E. Russia, C.E. Russia, N.E. Siberia, N.W. Siberia, S. Siberia, Transbaik., N. Far East, S. Far East; Kazakhstan	Absent	Northern China; Korea Democratic People's Republic, Korea Republic; Northern Mongolia	Attacks more than 20 species of <i>Abies</i> , <i>Pinus</i> , <i>Larix</i> , <i>Picea</i> and <i>Tsuga</i> . Develops on practically all coniferous species in its natural area but prefers <i>Abies sibirica</i> , <i>Abies nephrolepis</i> , <i>Pinus sibirica</i> , <i>Pinus koraiensis</i> , <i>Larix gmelinii</i> , <i>Larix sibirica</i> , <i>Picea ajanensis</i> , <i>Picea obovata</i>	Needles	H – VH	

**Table 1. INSECTS****LEPIDOPTERA**

1.37	<i>Dendrolimus superans</i> Butler (= <i>D. superans albolineatus</i> Butler = <i>Dendrolimus albolineatus</i> Matsumura = <i>Dendrolimus jezoensis</i> Matsumura = <i>Dendrolimus yezoensis</i> Matsumura = <i>Odonestis superans</i> Butler) **	Lasiocampidae	S. Far East (Sakhalin, Kuril islands)	Absent	Korea; Japan	Attacks many species of <i>Abies</i> , <i>Pinus</i> , <i>Larix</i> , <i>Picea</i> and <i>Tsuga</i> . Develops on practically all coniferous species in its natural area but prefers <i>Pinus pumila</i> , <i>Larix kamtschatica</i> , <i>Larix maritima</i> , <i>Picea ajanensis</i> and <i>Abies sachalinensis</i>	Needles	H – VH	
1.38	<i>Malacosoma parallela</i> Staudinger**	Lasiocampidae	Armenia, eastern Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, and Turkmenistan.	Absent	Northern Iran, Syria, Turkey	<i>Atraphaxis pyrifolia</i> , <i>Berberis integerrima</i> , <i>Cerasus verrucosa</i> , <i>Chaenomeles japonica</i> , <i>Cotoneaster acutiuscula</i> , <i>C. insignis</i> , <i>C. suavis</i> , <i>Crataegus hissarica</i> , <i>C. pontica</i> , <i>C. turkestanica</i> , <i>Cydonia oblonga</i> , <i>Fraxinus sogdiana</i> , <i>Hippophae rhamnoides</i> , <i>Juglans regia</i> , <i>Lonicera korolkowii</i> , <i>L. nummulariifolia</i> , <i>Malus domestica</i> , <i>M. sieversii</i> , <i>Myricaria bracteata</i> , <i>Populus alba</i> , <i>P. tremula</i> , <i>Prunus mahaleb</i> , <i>P. avium</i> , <i>P. armeniaca</i> , <i>P. bucharica</i> , <i>P. cerasus</i> , <i>P. divaricata</i> , <i>P. dulcis</i> , <i>P. padus</i> var. <i>pubescens</i> , <i>P. persica</i> , <i>Pyrus communis</i> , <i>Quercus boissieri</i> , <i>Q. macranthera</i> , <i>Q. robur</i> subsp. <i>robur</i> , <i>Ribes nigrum</i> , <i>R. rubrum</i> , <i>Rosa canina</i> , <i>R. corymbifera</i> , <i>R. kokanica</i> , <i>R. maracandica</i> , <i>Rubus idaeus</i> , <i>R. turkestanicus</i> , <i>Salix excelsa</i> , <i>S. tenuijulis</i> , <i>Sorbus persica</i> , <i>S. turkestanica</i> and <i>Ulmus</i> sp. The most important damage occurs on almond, oak and wild apple trees. Important damage also occurs on <i>Berberis</i> , <i>Chaenomeles</i> , <i>Cotoneaster</i> , <i>Crataegus</i> , <i>Cydonia</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Rosa</i> , <i>Salix</i> and <i>Sorbus</i> species. Other plants are damaged occasionally	Leaves	L – M	

**Table 1. INSECTS**

LEPIDOPTERA									
1.39	<i>Dasychira albodentata</i> Bremer *	Lymantriidae	N.E. Siberia (south), N.W. Siberia, S. Siberia (east), Transbaikalia, S. Far East	Absent	north of Mongolia, north of China	Attacks several species of <i>Larix</i> (mainly <i>Larix gmelinii</i> ), <i>Pinus</i> (mainly <i>Pinus sylvestris</i> , <i>Pinus pumila</i> and <i>Pinus koraiensis</i> ) and some other coniferous. Preferred hosts are <i>Larix gmelinii</i> and <i>Pinus sylvestris</i>	Needles	L – M	
1.40	<i>Euproctis</i> (= <i>Porthesia</i> ) <i>kargalika</i> Moore (= <i>Euproctis karghalica</i> Moore = <i>Porthesia karghalika</i> Strand = <i>Euproctis kargalica</i> Grum-Grzhimailo = <i>Porthesia flavosulphurea</i> Grum-Grzhimailo) *	Lymantriidae	S. Siberia (Altai Kray); Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan and Turkmenistan	Absent	Iran, China (north-west)	<i>Acer campestre</i> , <i>A. regelii</i> , <i>A. tataricum</i> , <i>A. turkestanicum</i> , <i>Alhagi</i> sp., <i>Atraphaxis pyrifolia</i> , <i>Betula pendula</i> , <i>Betula pubescens</i> , <i>Caragana arborescens</i> , <i>Cerasus verrucosa</i> , <i>Cotoneaster acutiuscula</i> , <i>C. insignis</i> , <i>C. suavis</i> , <i>Crataegus turcestanica</i> , <i>Cydonia oblonga</i> , <i>Elaeagnus angustifolia</i> , <i>Fragaria</i> sp., <i>Hippophae rhamnoides</i> , <i>Irga</i> sp., <i>Malus domestica</i> , <i>M. sieversii</i> , <i>Pistacia vera</i> , <i>Prunus armeniaca</i> , <i>P. avium</i> , <i>P. bucharica</i> , <i>P. cerasus</i> , <i>P. divaricata</i> , <i>P. dulcis</i> , <i>P. mahaleb</i> , <i>P. persica</i> , <i>Punica granatum</i> , <i>Pyrus bucharica</i> , <i>P. communis</i> , <i>Quercus</i> sp., <i>Rhucus coriaria</i> , <i>Ribes nigrum</i> , <i>R. rubrum</i> , <i>Robinia pseudoacacia</i> , <i>Rosa canina</i> , <i>R. corymbifera</i> , <i>R. kokanica</i> , <i>R. maracandica</i> , <i>Rubus caesius</i> , <i>R. idaeus</i> , <i>Rumex</i> sp., <i>Salix excelsa</i> , <i>S. tenuijulis</i> , <i>Spirea hypericifolia</i> , <i>Ulmus effusa</i> , <i>Ulmus foliacea</i> var. <i>campestris</i> . Other plants are damaged occasionally	Leaves	L – M	
1.41	<i>Lymantria</i> (= <i>Porthetria</i> = <i>Ocneria</i> ) <i>mathura</i> Moore (= <i>Lymantria aurora</i> Butler = <i>Lymantria fusca</i> Leech = <i>Lymantria mathura aurora</i> Butler) **	Lymantriidae	S. Far East (South)	Absent	China (Western and Northern), India (Northern), Nepal, Japan, Koreas, Pakistan	Attacks many species of <i>Quercus</i> , <i>Juglans</i> , <i>Malus</i> , <i>Ulmus</i> , <i>Tilia</i> , <i>Salix</i> , <i>Betula</i> , <i>Castanea</i> and other deciduous trees. Preferred hosts are: <i>Juglans mandshurica</i> , <i>Malus mandshurica</i> , <i>Quercus mongolica</i> , <i>Quercus dentata</i> , <i>Ulmus japonica</i> , <i>Ulmus macrocarpa</i> , <i>Ulmus pumila</i> , <i>Tilia amurensis</i> , <i>Tilia mandshurica</i> , <i>Tilia pekinensis</i> , <i>Tilia taquetii</i>	Leaves	L – M	

**Table 1. INSECTS****LEPIDOPTERA**

1.42	<i>Erschoviella</i> ( <i>= Sarrothripus =</i> <i>Nycteola</i> ) <i>musculana</i> Ershov **	Noctuidae	Southern Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, Turkmenistan Kazakhstan; Central Asia	Absent	Probably Afghanistan and Iran	Wild and cultivated varieties <i>Juglans regia</i>	Leaves, sprouts & nuts	L - M	
1.43	<i>Sphinx</i> ( <i>= Hyloicus</i> ) <i>morio</i> Rotsch. et Jord ( <i>= H. laricis</i> Rozh.) *	Sphingidae	N. W. Siberia, N. E. Siberia, S. Siberia, N. Far East, S. Far East, Kazakhstan	Absent	China, Japan	Attacks mainly larch ( <i>Larix sibirica</i> , <i>L. gmelinii</i> and other larch species) and Pinus ( <i>Pinus sylvestris</i> , <i>P. sibiricus</i> , <i>P. koraiensis</i> ).	Needles	L - M	
1.44	<i>Cydia</i> ( <i>= Laspeyresia</i> <i>= Grapholitha</i> ) <i>illutana</i> ssp <i>dahuricolana</i> Kuznetsov *	Tortricidae	N.E. Siberia, N.W. Siberia, S. Siberia, Transbaikalia	Absent	Absent	Attacks cones of larch, especially <i>Larix gmelinii</i> and <i>L. sibirica</i> , spruce, especially <i>Picea obovata</i> , fir and other coniferous	Cones and seeds	M - H	

\* - species for which PRA was provided by the Panel but not recommended for inclusion into the EPPO lists

\*\* - species for which PRA was provided by the Panel and recommended for inclusion into the EPPO lists

**Table 2. MITES & INSECTS****ACARI & COLEOPTERA**

**Table 2. Transition table: Forest pests to be included into the PQR system causing significant damage on the territory of the former USSR, for which either more information is needed, or for which pathways do not at present exist, or whose host plants are not of importance for Central and Western Europe**

N°	Pest	Group of organisms	Distribution			Main host plants in the former USSR	Damaged parts of plants	Economic significance in the area of origin	Remarks
			In the former USSR	In North America	In other countries				
<b>Acari (Arachnida)</b>									
2.1	<i>Trisetacus kirghisorum</i> Shevchenko	<i>Phytoptidae</i> (Acariformes, Tetrapodili)	Armenia (introduced), Kazakhstan, Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan	Absent	Absent	<i>Juniperus semiglobosa</i> , <i>J. sabina</i> , <i>J. turkestanica</i> , <i>J. foetidissima</i> , <i>J. polycarpos</i>	Seeds	L - H	
<b>Insecta</b>									
<b>Coleoptera</b>									
2.2	<i>Dinoderus minutus</i> Fabr.	<i>Bostriichidae</i>	Ukraine (Crimea, introduced)	In tropical regions	Cosmopolitan in tropical regions	All deciduous and coniferous wood	Wood	L - M	Main damage – to wood in buildings
2.3	[ <i>Enneadesmus scopini</i> Fursov.]	<i>Bostriichidae</i>	Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan & Kazakhstan	Absent	Absent	All deciduous and coniferous wood & <i>Elaeagnus angustifolia</i> , <i>E. orientalis</i>	Wood, branches of <i>Elaeagnus</i>	L - M	Main damage – to wood in buildings
2.4	<i>Psoa dubia</i> ?	<i>Bostriichidae</i>	Ukraine (Crimea, introduced)	Not known	Not yet checked	All deciduous and coniferous wood & <i>Vitis vinifera</i>	Wood	L - M	Main damage – to wood in buildings
2.5	<i>Xylogenes dilatatus</i> Rtt.	<i>Bostriichidae</i>	Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan & Kazakhstan	Absent	Syria, Iran	<i>Tamarix</i> ( <i>T. laxa</i> , <i>T. ramosissima</i> , <i>T. hispida</i> , <i>T. pallasii</i> , <i>T. arceuthoides</i> ) and other deciduous	Wood, under bark	L - M	Main damage – to wood in buildings
2.6	<i>Agrilus graminis</i> C. G (= <i>A. disparicornis</i> Bed.)	<i>Buprestidae</i>	C. E. Russia, S. E. Russia ; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Italy, Bulgaria	<i>Quercus cerris</i> , <i>Quercus</i> sp., <i>Castanea sativa</i> , <i>Rosa damascena</i> , other plants	Trunks (under bark)	L	
2.7	<i>Agrilus hastulifer</i> Ratz.	<i>Buprestidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Italy	<i>Quercus</i> sp.	Trunks (under bark)	L	
2.8	<i>Anthaxia</i> (= <i>Melanthaxia</i> ) <i>conradti</i> Semenov	<i>Buprestidae</i>	Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan (mainly mountains)	Absent	Absent	<i>Juniperus sabina</i> , <i>J. turcomanica</i> , <i>Juniperus</i> sp.	Trunks (under bark)	L - H	

**Table 2. INSECTS****COLEOPTERA**

2.9	<i>Anthaxia manca</i> L. (= <i>Cratomerus mancus</i> L = <i>Trichocratomerus mancus</i> L)	<i>Buprestidae</i>	S. E. Russia, Azerebaijan, Armenia, Estonia, Georgia, Moldova, Latvia, Lithuania, Ukraine	Absent	Algeria, Austria, Bosnia, Bulgaria, Croatia, Czekia, France, Germany, Hungary, Italy, Iran, Macedonia, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Switzerland, Turkey	<i>Ulmus</i> sp., <i>Robinia pseudoacacia</i> , <i>Populus tremula</i> , <i>Rhamnus alaternus</i>	Trunks (under bark)	VL – M	
2.10	<i>Cratomerus</i> (= <i>Trichocratomerus</i> ) <i>aurulentus</i> F. (= <i>Anthaxia aurulenta</i> F.)	<i>Buprestidae</i>	S. E. Russia ; Moldova; Ukraine	Absent	West of Mediterranean region, south- eastern and eastern Europe	<i>Ulmus</i> sp., <i>Salix alba</i>	Trunks (under bark)	VL – M	
2.11	<i>Lampra mirifica</i> Mulsant	<i>Buprestidae</i>	C. E. Russia, S. E. Russia ; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Mediterranean region	<i>Ulmus</i>	Trunks (under bark)	L – M	
2.12	<i>Monochamus grandis</i> Waterhouse	<i>Cerambycidae</i>	S. Far East (Kurile islands: Kunashir, Shikotan)	Absent	Japan	<i>Pinus koraiensis</i> , <i>P. parviflora</i> , <i>P. pumila</i> , <i>P. funebris</i> , <i>Abies sachalinensis</i> , <i>A. holophylla</i> , <i>A. nephrolepis</i> , <i>A. mariesii</i> , <i>A. firma</i> , <i>Picea ajanensis</i> , <i>P. glehnii</i> , <i>P. koraiensis</i> , <i>Tsuga</i> sp., other conif.	Trunks (wood)	L – H	
2.13	<i>Monochamus nitens</i> Bates	<i>Cerambycidae</i>	S. Far East (Sakhalin, Kunashir)	Absent	China (North), Japan	<i>Picea ajanensis</i> , <i>P. glehnii</i> , <i>P. koraiensis</i> , <i>Pinus koraiensis</i> , <i>P. parviflora</i> , <i>P. pumila</i> , <i>P. funebris</i> , <i>Abies mariesii</i> , <i>A. firma</i> , <i>Larix leptolepis</i>	Trunks (wood)	L – M	
2.14	<i>Semanotus semenovi</i> Okunev	<i>Cerambycidae</i>	Kyrgyzstan, Tadjikistan, Turkmenistan, Uzbekistan	Absent	Absent	<i>Juniperus semiglobosa</i> , <i>J. polycarpa</i> , <i>J. sabina</i> , <i>J. turcomanica</i> , , <i>J. turkestanica</i> , <i>J. foetidissima</i> , <i>J. sp.</i>	Trunks (wood)	L – M	
2.15	<i>Pissodes cembrae</i> Motsch.	<i>Curculionidae</i>	S. Siberia, N.E. Siberia, N. Far East, S. Far East	Absent	Northern China; Japan	<i>Pinus sibirica</i> (preferred host), <i>P. koraiensis</i> , <i>P. pumila</i> , <i>P. sp.</i> , <i>Larix</i> sp., <i>Picea</i> sp., <i>Abies</i> sp.	Trunks and roots (under bark), twigs (at the additional feeding)	L – H	
2.16	[ <i>Pissodes galloisi</i> ? (= <i>P. galloisi</i> )]	<i>Curculionidae</i>	S. Far East	No data	No data	<i>Pinus</i> , other coniferous	Trunks and roots (under bark)	L	

**Table 2. INSECTS**

COLEOPTERA								
2.17	[ <i>Pissodes insignitus</i> Boh. (= <i>P. insignatus</i> )]	<i>Curculionidae</i>	N.E. Siberia, S. Siberia, Transbaik., N. Far East, S. Far East	Absent	Absent	<i>Pinus sibirica</i> , <i>P. pumila</i> , <i>Larix gmelinii</i> , <i>Larix sibirica</i> , <i>Larix</i> sp.	Trunks (under bark)	L – M
2.18	<i>Pissodes irroratus</i> Reit.	<i>Curculionidae</i>	N.E. Siberia, N. Far East, S. Far East	Absent	Absent	<i>Pinus sibirica</i> , <i>P. pumila</i> , <i>Larix gmelinii</i> , <i>Larix sibirica</i> , <i>Larix</i> sp., <i>Abies</i> sp., other coniferous	Trunks (under bark)	L – M
2.19	<i>Pissodes</i> (= <i>P. strobi</i> Say.) <i>nemorensis</i> Germ.	<i>Curculionidae</i>	S. Far East	Canada, USA	Japan, South Africa	<i>Pinus funebris</i> , <i>P. koraiensis</i> , <i>P.</i> sp., <i>Picea</i>	Trunks (under bark)	L – M
2.20	<i>Pissodes nitidus</i> Roel.	<i>Curculionidae</i>	N. Far East, S. Far East	Absent	Japan, China	<i>Pinus funebris</i> , <i>P. sylvestris</i> , <i>P. densiflora</i> , <i>P. koraiensis</i> , <i>P.</i> sp.	Trunks (under bark)	L – M
2.21	<i>Agriotes gurgistanus</i> Faldermann	<i>Elateridae</i>	S. E. Russia ; Moldova; Ukraine; Transcaucasus; Turkmenistan	Absent	Balcanians; Turkey, south-eastern Europe	Deciduous, coniferous and other plants, mainly agricultural crops (cereals, etc.)	Roots	L – M
2.22	<i>Selatosomus latus</i> F	<i>Elateridae</i>	C. E. Russia, S. E. Russia, S. Siberia (West), Transbaik., S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Central and southern Europe, China, Iran, Japan, Mongolia, Turkey	Deciduous, coniferous and other plants, mainly agricultural crops (sugarbeet, cereals, vegetables, etc.) except tomato and cabbage	Roots	L – M
2.23	<i>Lethrus apterus</i> Laxmann	<i>Geotrupidae</i>	S. E. Russia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine, Tadzhikistan	Absent	China, Netherlands	Deciduous, coniferous and other plants, mainly agricultural crops	Roots	L – M
2.24	[ <i>Carphoborus jurinskii</i> Eggers]	<i>Scolytidae</i>	N.E. Siberia, N.W. Siberia, S. Siberia	Absent	Absent	<i>Picea</i> , <i>Pinus</i>	Trunks (under bark)	VL – L
2.25	[ <i>Cryphalus</i> (= <i>C. punctulatus</i> Eggers) <i>kurenzovi</i> Stark]	<i>Scolytidae</i>	S. Far East (including Sakhalin & Kuril islands)	Absent	Absent	<i>Abies nephrolepis</i> (preferred host), <i>Pinus pumila</i> , <i>Picea</i> sp.	Trunks (under bark)	VL – L
2.26	<i>Cryphalus latus</i> Eggers	<i>Scolytidae</i>	Transbaik., S. Far East (including Sakhalin)	Absent	North-west China	<i>Larix gmelinii</i> , <i>Larix olgensis</i> (preferred hosts), <i>Picea ajanensis</i> , <i>Picea obovata</i> , <i>Abies nephrolepis</i> , <i>Abies holophylla</i>	Trunks (under bark)	VL – L
2.27	<i>Cryphalus orientalis</i> Eggers	<i>Scolytidae</i>	Transcaucasus	Absent	Absent	<i>Abies nordmanniana</i> , <i>Picea orientalis</i> , other coniferous	Trunks & branches (under bark)	L – M
								Main damage – to young trees

**Table 2. INSECTS**

COLEOPTERA									
2.28	<i>Cryphalus piceus</i> Eggers	Scolytidae	S. Far East (including Sakhalin)	Absent	North-east China, Japan	<i>Picea ajanensis</i> , <i>P. obovata</i> , <i>P. koraiensis</i> (preferred hosts), <i>Abies nephrolepis</i> , <i>A. holophylla</i> (preferred hosts), <i>Pinus funebris</i> , <i>Larix gmelinii</i> , <i>Larix olgensis</i>	Trunks (under bark)	VL – L	
2.29	<i>Cryphalus redikorzevi</i> Berger	Scolytidae	S. Far East (including Sakhalin & Kuril islands)	Absent	North-east China, Koreas	<i>Abies nephrolepis</i> , <i>A. holophylla</i> (preferred hosts), <i>Abies</i> spp., <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.30	[ <i>Cryphalus sichotensis</i> Kur.]	Scolytidae	S. Far East (Primorie) (including Sakhalin)	Absent	Absent	<i>Picea ajanensis</i> (preferred host), <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.31	[ <i>Cryphalus ussuriensis</i> Eggers]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.32	<i>Crypturgus tuberosus</i> Nijs.	Scolytidae	S. Far East (Primorie) (including Sakhalin)	Absent	Northern Japan	<i>Picea ajanensis</i> (preferred host), <i>P. glehnii</i> , <i>Pinus pumila</i> , <i>P. koraiensis</i>	Trunks (under bark)	VL – L	
2.33	<i>Dryocoetes abietinus</i> Kono et Tamanuki (= <i>D. striatus</i> Eggers)	Scolytidae	S. Far East (Sakhalin)	Absent	Japan	<i>Abies sachalinensis</i> , <i>A. nephrolepis</i> , <i>A. holophylla</i>	Trunks (under bark)	VL – L	
2.34	<i>Dryocoetes baicalicus</i> Reitter (= <i>D. budkovi</i> Sem.)	Scolytidae	Russia: widespread in coniferous area	Absent	Mongolia	<i>Larix sibirica</i> , <i>L. gmelinii</i> , <i>L. plgensis</i> , (preferred hosts), <i>Larix</i> spp., <i>Pinus korajensis</i> , <i>P. sibirica</i> , <i>Pinus</i> spp., <i>Abies nephrolepis</i> , <i>A. holophylla</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.35	[ <i>Dryocoetes orientalis</i> Kur.]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Pinus korajensis</i> (preferred host), <i>Pinus</i> spp., <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.36	[ <i>Dryocoetes pini</i> Niijima]	Scolytidae	S. Far East (Sakhalin)	Absent	Japan	<i>Pinus pumila</i> (preferred host), <i>Pinus</i> spp., <i>Larix</i> spp., <i>Abies</i> spp., <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.37	<i>Dryocoetes rugicollis</i> Eggers	Scolytidae	S. Far East (including Sakhalin & Kuril islands)	Absent	North-east China, Japan	<i>Picea obovata</i> (preferred host), <i>Picea</i> spp., <i>Abies nephrolepis</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.38	[ <i>Hylurgops imitator</i> Reitter]	Scolytidae	N.E. Siberia, N.W. Siberia, N. Far East, S. Far East	Absent	China, Koreas, Japan	<i>Pinus korajensis</i> (preferred host), <i>Pinus</i> spp., <i>Picea ajanensis</i> , <i>Picea</i> spp., <i>Larix</i> spp.	Trunks (under bark)	VL – L	
2.39	[ <i>Hylurgops interstitialis</i> Chapuis]	Scolytidae	S. Far East, N.E. Siberia (introduced)	Absent	Absent	<i>Pinus korajensis</i> , <i>Abies holophylla</i> (preferred hosts), <i>Abies nephrolepis</i> , <i>Abies</i> spp., <i>Pinus funebris</i> , <i>Pinus</i> spp., <i>Picea ajanensis</i> , <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.40	<i>Hylurgops longipilis</i> Reitt.	Scolytidae	N. Far East (introduced), S. Far East (including Sakhalin)	Absent	Absent	<i>Pinus korajensis</i> (preferred host), <i>Pinus</i> spp., <i>Larix gmelinii</i> , <i>Larix</i> spp., <i>Picea ajanensis</i> , <i>Picea</i> spp.	Trunks (under bark)	VL – L	

**Table 2. INSECTS****COLEOPTERA**

2.41	<i>Hylurgops palliatus</i> Gyll. (= <i>H. parvus</i> Eggers = <i>H. helferi</i> Villa)	Scolytidae	N. E. Russia, C. E. Russia, N. W. Siberia, N. E. Siberia, S. Far East (Primorie) (including Sakhalin & Kuril islands); Kazakhstan	Absent	W. Europe, Japan, Koreas, China	<i>Pinus korajensis</i> (preferred host), <i>Pinus sibirica</i> , <i>P. pumila</i> , <i>Pinus</i> spp., <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.42	<i>Hylurgops spessivtzevi</i> Eggers (= <i>H. tuberculatus</i> = <i>H. transbaicalicus</i> )]	Scolytidae	N.E.Siberia, N.W. Siberia, N. Far East, S. Far East (including Sakhalin)	Absent	North-east China	<i>Pinus korajensis</i> (preferred host), <i>P.</i> <i>sylvestris</i> , <i>Pinus</i> spp., <i>Picea obovata</i> , <i>Picea</i> spp., <i>Larix gmelinii</i> , <i>Larix</i> spp.	Trunks (under bark)	VL – L	
2.43	<i>Hylurgops starki</i> Eggers (= <i>H.</i> <i>cunicularius</i> )]	Scolytidae	N. E. Russia, C. E. Russia, N.W. Siberia	Absent	Finland, Sweden	<i>Picea abies</i> , <i>Pinus sylvestris</i> (preferred hosts), <i>Picea</i> spp., <i>Pinus</i> spp., <i>Larix</i> spp.	Trunks (under bark)	VL – L	
2.44	<i>Ips ussuriensis</i> Reitter]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Pinus</i> spp., <i>Picea</i> spp., <i>Abies</i> spp., <i>Larix</i> spp.	Trunks (under bark)	L – M	
2.45	<i>Phloeosinus turce-</i> <i>stranicus</i> Semenov	Scolytidae	Central Asia	Absent	Absent	<i>Juniperus pseudosabina</i> , <i>J.</i> <i>polycarpos</i> , <i>J excelsa</i> , <i>J. communis</i> , <i>Juniperus</i> spp.	Trunks (under bark)	L – H	
2.46	<i>Phloeotribus caucasicus</i> Reitter]	Scolytidae	S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Central Asia	Absent	Absent	<i>Fraxinus excelsior</i> , <i>Fraxinus</i> spp.	Trunks (under bark)	L	
2.47	<i>Pityogenes aizawai</i> Kôno]	Scolytidae	S. Far East (Sakhalin)	Absent	Absent	<i>Picea</i> spp., <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.48	<i>Pityogenes foveolatus</i> Eggers]	Scolytidae	N.E.Siberia, N.W. Siberia, S. Siberia, Transbaik., N. Far East, S. Far East	Absent	Japan	<i>Pinus pumila</i> , <i>Pinus</i> spp., <i>Picea</i> <i>ajanensis</i> , <i>Picea</i> spp.	Trunks (under bark)	L	
2.49	<i>Pityogenes rudnevi</i> Sok.]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.50	<i>Pityogenes seirindensis</i> Murayama]	Scolytidae	S. Far East	Absent	Koreas, northern Japan	<i>Picea ajanensis</i> , <i>Picea obovata</i> (preferred hosts), <i>Picea</i> spp., <i>Abies</i> <i>nephrolepis</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.51	<i>Pityophthorus jucundus</i> Blandford]	Scolytidae	S. Far East (Sakhalin)	Absent	Koreas, Japan	<i>Picea ajanensis</i> (preferred host), <i>Picea</i> spp., <i>Pinus</i> spp.	Trunks (under bark)	VL – L	
2.52	<i>Pityophthorus kurenzovi</i> Krivolutskaja (= <i>P.</i> <i>abietis</i> Kurentzov = <i>P. sibiricus</i> Nunberg)]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Abies holophylla</i> , <i>Abies nephrolepis</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.53	<i>Pityophthorus lapponicus</i> Stark]	Scolytidae	N. E. Russia, C. E. Russia, S. Far East	Absent	Absent	<i>Picea abies</i> , <i>Picea obovata</i> , <i>Picea</i> spp.	Trunks (under bark)	VL – L	

**Table 2. INSECTS**

COLEOPTERA								
2.54	[ <i>Pityophthorus pini</i> Kurentzov]	Scolytidae	N.E.Siberia, N.W. Siberia, S. Siberia, N. Far East, S. Far East	Absent	Absent	<i>Pinus sibirica</i> , <i>P. koraiensis</i> , <i>Pinus</i> spp., <i>Picea</i> spp.	Trunks (under bark)	VL – L
2.55	[ <i>Pityophthorus rossicus</i> Eggers]	Scolytidae	C. E. Russia (Tambov)	Absent	Absent	<i>Pinus sylvestris</i> , <i>Pinus</i> spp.	Trunks (under bark)	VL – L
2.56	[ <i>Pityophthorus sachalinensis</i> Kriv.]	Scolytidae	S. Far East (Sakhalin)	Absent	Absent	<i>Abies sachalinensis</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L
2.57	[ <i>Pityophthorus sichotensis</i> Kurentzov]	Scolytidae	N.E.Siberia, N.W. Siberia, S. Siberia, S. Far East	Absent	Absent	<i>Picea ajanensis</i> , <i>Picea</i> spp.	Trunks (under bark)	VL – L
2.58	<i>Polygraphus gracilis</i> Niijima	Scolytidae	S. Far East (including Sakhalin & Kuril islands)	Absent	Japan	<i>Picea ajanensis</i> , <i>Picea glehnii</i> , <i>Picea</i> spp., <i>Abies sachalinensis</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L
2.59	<i>Polygraphus griseus</i> Eggers	Scolytidae	N. E. Russia (Kolsk peninsula)	Absent	Sweden, Finland	<i>Picea obovata</i> , <i>Picea</i> spp.	Trunks (under bark)	VL – L
2.60	<i>Polygraphus jezoensis</i> Niijima	Scolytidae	N. Far East, S. Far East (including Sakhalin)	Absent	Japan	<i>Picea ajanensis</i> , <i>Picea glehnii</i> , <i>Picea</i> spp., <i>Pinus</i> spp.	Trunks (under bark)	VL – L
2.61	<i>Polygraphus proximus</i> Blandford (= <i>P. abietis</i> Kurentzov = <i>P. laticollis</i> Eggers = <i>P. miser</i> Blandford)	Scolytidae	S. Far East (including Sakhalin & Kuril islands)	Absent	North Korea, Japan, China	<i>Abies holophylla</i> , <i>A. sachalinensis</i> , <i>A. nephrolepis</i> (preferred hosts), <i>A.</i> spp., <i>Pinus koraiensis</i> , <i>Pinus</i> spp., <i>Picea ajanensis</i> , <i>Picea</i> spp., <i>Tsuga</i> spp.	Trunks (under bark)	L – M
2.62	<i>Polygraphus subopacus</i> Thoms (= <i>P. sachalinensis</i> Eggers)	Scolytidae	N.E. Siberia, N. Far East, S. Far East (including Sakhalin & Kuril islands)	Absent	Japan, Koreas, Mongolia, Europe	<i>Picea ajanensis</i> , <i>P. koraiensis</i> (preferred hosts), <i>P.</i> spp., <i>Pinus</i> spp.	Trunks (under bark)	VL – L
2.63	<i>Pteleobius kraatzi</i> Eichhoff	Scolytidae	C. E. Russia, S. E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Southern and central Europe, Turkey	<i>Ulmus campestris</i> , <i>U. effusa</i> , <i>U. montana</i> , <i>Ulmus</i> spp., <i>Sorbus aucuparia</i> , <i>Sorbus</i> spp.	Trunks (under bark)	VL – L

## LEPIDOPTERA

<b>Lepidoptera</b>									
2.84	<i>Coleophora sibiricella</i> ? [= <i>C. sibirica</i> ?]	<i>Coleophoridae</i>	S. Siberia	Absent	Absent Finland - ?	<i>Larix</i>	Needles	L - M	Main damage – esthetic damage
2.85	[ <i>Anacampsis blattariella</i> Hbn.]	<i>Gelechiidae</i>	N. E. Russia, C. E. Russia, S. Siberia (East); Transbaik., S. Far East	Absent	Northern and central Europe	<i>Betula mandshurica, B. pendula, B. pubescens, Betula</i> spp.	Leaves	L - M	
2.86	<i>Eupithecia gigantea</i> ?	<i>Geometridae</i>	S. Far East, N. Far East	Absent	Japan	<i>Abies</i>	Cones and seeds	L	Data of Dr. Alain Roques
2.87	<i>Semiothisa pumila</i> Kusnezov [= <i>Semiothisa</i> (= <i>Macaria</i> ) <i>continuaria</i> Ev.]	<i>Geometridae</i>	S. Siberia, Transbaik., S. Far East	Absent	Absent	<i>Larix</i>	Needles	L - M	
2.88	<i>Vanessa xanthomelas</i> Esp.	<i>Nymphalidae</i>	C. E. Russia, S. E. Russia, S. Siberia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine	Absent	Absent	<i>Salix, Betula, Alnus</i>	Leaves	L	
2.89	<i>Barbara fulgens</i> Kuznetsov	<i>Tortricidae</i>	S. Far East	Absent	Northern China	<i>Picea obovata, P. sibirica, P. koraiensis, P. ajanensis, Picea</i> spp., <i>Abies holophylla, Abies</i> spp.	Cones and seeds	VL - L	Data of Dr. Alain Roques
2.90	<i>Retinia</i> (= <i>Petrova</i> = <i>Semasia</i> ) <i>perangustana</i> Snelb (= <i>Eucosma impropria</i> = <i>Laspeyresia zonovae</i> Flor)	<i>Tortricidae</i>	C.E. Russia (introduced), N.E. Siberia, N.W. Siberia, S. Siberia, Transbaik., S. Far East	Absent	Widespread in Europe (Czeckia, Slovakia, Poland - introduced), north-eastern China, Mongolia	<i>Larix sibirica, L. gmelinii</i> (preferred hosts), <i>Larix</i> spp.	Cones and seeds	L - H	According to Dr. A. Roques
2.91	<i>Retinia lemniscata</i> Kuznetsov	<i>Tortricidae</i>	S. Far East	Absent	Absent	<i>Picea koraiensis, Picea</i> spp.	Cones and seeds	L	Data of Dr. Alain Roques]
2.92	<i>Retinia monopunctata</i> [R.pini]	<i>Tortricidae</i>	S. Far East	Absent	Japan, China	<i>Pinus koraiensis</i> (preferred host), <i>P. strobus, Pinus</i> spp., <i>Abies holophylla, A. sachalinensis, A. homolepis, Abies</i> spp., <i>Picea glehnii, P. polita, P. abies, P. ajanensis, Picea</i> spp., <i>Larix kaempferi, Larix</i> spp.	Cones and seeds	L-M	Data of Dr. Alain Roques

**Table 3a. INSECTS**

COLEOPTERA

**Table 3a. Forest pests causing significant damage on the territory of the former USSR, which are also present in Central/Western Europe**

N°	Pest	Group of organisms	Distribution			Main host plants in the former USSR	Damaged parts of plants	Economic significance in area of origin	Remarks						
			In the former USSR	In North America	In other countries										
<b>Insecta</b>															
<b>Coleoptera</b>															
3a.1	<i>Anobium punctatum</i> Deg. [= <i>A. domesticum</i> Geoffr.]	<i>Anobiidae</i>	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Present	Western Europe; New Zealand	Coniferous	Wood	M – VH	Main damage – to wood in buildings, furniture, etc.						
3.2	<i>Hadrobregmus pertinax</i> ? [ <i>Anobium pertinax</i> F.]	<i>Anobiidae</i>	N Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Western Europe, HU	Coniferous	Wood	L – H	Main damage – to cut trees, wood in buildings, furniture, etc.						
3a.3	<i>Amphicerus bimaculatus</i> ? [ <i>Schistoceros bimaculatus</i> Ol.]	<i>Bostriichidae</i>	Ukraine; Transcaucasus; Central Asia	Not known	Southern Europe; Northern Africa; Syria	Deciduous and coniferous	Wood, <i>Vitis</i> and fruit trees branches	L – M	Main damage – to wood in buildings						
3a.4	<i>Bostrychus capucinus</i> L.	<i>Bostriichidae</i>	C. E. Russia, S. E. Russia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Central Asia	USA (limited distribution – NJ)	Western Europe	<i>Quercus</i> , other deciduous	Wood, trunks of <i>Quercus</i> , <i>Morus</i> , <i>Vitis</i>	L – H	Main damage – to parquet, wood in buildings, telegraph poles, sleepers						
3a.5	<i>Lichenophanes varia</i> ? [ <i>L. varius</i> ?]	<i>Bostriichidae</i>	C. E. Russia, S. E. Russia; Ukraine; Transcaucasus	Not known	South and Centre of Western Europe	<i>Buxus</i> , <i>Quercus</i> , other deciduous	Wood	L – M	Main damage – to wood in buildings						
3a.6	<i>Rhyzopertha</i> [ <i>Rhizopertha</i> ] <i>dominica</i> ?	<i>Bostriichidae</i>	Ukraine	Widespread	Cosmopolitan	Deciduous and coniferous	Wood	L – M	Main damage – to wood in buildings						
3a.7	<i>Scobia pustulata</i> Kies. [= <i>S. chevrieri</i> Vill.]	<i>Bostriichidae</i>	S. E. Russia; Ukraine; Transcaucasus; Central Asia	Not known	Southern Europe; Northern Africa; Syria; Iran	Deciduous and coniferous	Wood	L – M	Main damage – to wood in buildings						
3a.8	<i>Stephanopachys linearis</i> Kug.	<i>Bostriichidae</i>	S. E. Russia, S. Siberia; Ukraine; Transcaucasus; Central Asia	Not known	Western Europe	<i>Pinus</i> , <i>Picea</i> , some other coniferous	Wood, under bark	L – M	Main damage – to wood in buildings						
3a.9	<i>Sinoxylon perforans</i> Schrnk.	<i>Bostriichidae</i>	S. E. Russia ; Ukraine; Transcaucasus; Central Asia	Absent	Balcans	<i>Quercus</i> , <i>Vitis</i> , other deciduous	Wood and stems of young plants	L – H	Main damage – to wood in buildings and to vineyards						
3a.10	<i>Xylopertha retusa</i> ? [ <i>Xylonites retusus</i> Ol.]	<i>Bostriichidae</i>	S. E. Russia, S. Siberia; Moldova; Ukraine; Transcaucasus; Central Asia	Absent	South and Centre of Western Europe	<i>Quercus</i> and other deciduous	Wood	L – M	Main damage – to wood in buildings						

**Table 3a. INSECTS**

COLEOPTERA										
3a.11	<i>Agrilus angustulus</i> Ill.	<i>Buprestidae</i>	C. E. Russia, S. E. Russia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Western Europe; Northern Africa; Turkey	<i>Quercus</i> , <i>Fagus</i> , <i>Castanea</i>	Trunks (under bark)	L – M	Main damage – to plantations in the steppes	
3a.12	<i>Agrilus ater</i> L.	<i>Buprestidae</i>	N. E. Russia, C.E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Not yet checked	FI, HU	<i>Populus</i> , <i>Salix</i>	Trunks (under bark)	L		
3a.13	<i>Agrilus betuleti</i> Rtzb.	<i>Buprestidae</i>	Russia: widespread in forest zone; Baltic countries; Belarus	Not yet checked	Northern and Central Europe	<i>Betula</i>	Trunks (under bark)	L		
3a.14	<i>Agrilus elongatus</i> Hbst.	<i>Buprestidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Quercus</i> , <i>Fagus</i>	Trunks (under bark)	VL – L		
3a.15	<i>Agrilus pannonicus</i> ? [ <i>Agrilus biguttatus</i> F.]	<i>Buprestidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	HU, UK	<i>Quercus</i>	Trunks (under bark)	L		
3a.16	<i>Agrilus viridis</i> L.	<i>Buprestidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Western Europe; IT; Northern Africa	<i>Populus</i> (including <i>P. tremula</i> ), <i>Acer</i> , <i>Salix</i> , <i>Fagus</i> , other deciduous	Trunks (under bark)	L – H		
3a.17	<i>Chrysobothris affinis</i> F.	<i>Buprestidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Not yet checked	HU	<i>Quercus</i> , <i>Fagus</i> , <i>Ulmus</i>	Trunks (under bark)	L		
3a.18	<i>Melanophila</i> [= <i>Phaenops</i> ] <i>cyanea</i> F.	<i>Buprestidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Not yet checked	DE; HU	<i>Pinus</i>	Trunks (under bark)	L		
3a.19	<i>Poecilonota variolosa</i> Payk.	<i>Buprestidae</i>	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan	Not yet checked	SE; NO; Northern Africa	<i>Populus</i>	Trunks (under bark)	L – M		
3a.20	<i>Trachypterus decostigma</i> [= <i>Melanophila decastigma</i> F.]	<i>Buprestidae</i>	S. E. Russia ; Ukraine; Transcaucasus	Absent	South of Europe; Northern Africa; Turkey; Syria	<i>Populus</i> , <i>Salix</i> , <i>Fraxinus</i>	Trunks (under bark)	L – M		
3a.21	<i>Trachypterus</i> [= <i>Melanophila</i> ] <i>picta</i> Pall.	<i>Buprestidae</i>	C. E. Russia (East), S. E. Russia (East), S. Siberia (West); Kazakhstan; Central Asia	Absent	Iran; Northern China; HU	<i>Populus</i> , <i>Salix</i>	Trunks (under bark)	L – M	Main damage – on 1-2 year-old plantations	
3a.22	<i>Acanthocinus aedilis</i> L.	<i>Cerambycidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Moldova; Ukraine	Not yet checked	Europe	<i>Pinus</i>	Trunks (under bark)	L		

**Table 3a. INSECTS**

COLEOPTERA									
3a.23	<i>Acanthocinus griseus</i> F.	<i>Cerambycidae</i>	N.E. Siberia, N.W. Siberia, S. Siberia, S. Far East	Not yet checked	Europe; Japan	<i>Picea</i>	Trunks (wood)	VL – L	
3a.24	<i>Arhopalus rusticus</i> (повтор)	<i>Cerambycidae</i>	Russia: widespread in coniferous area	Not yet checked	Western Europe, Japan	<i>Picea, Pinus, other coniferous</i>	Trunks (wood)	VL – L	
3a.25	<i>Arhopalus [= Criocephalus] rusticus</i> L.	<i>Cerambycidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Moldova; Ukraine	Not yet checked	Not yet checked	<i>Pinus</i>	Trunks and roots (under bark)	VL – L	
3a.26	<i>Callidium violaceum</i> L.	<i>Cerambycidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Western Europe; Northern Mongolia; Northern China; Korea; Japan	Coniferous and deciduous	Wood (under bark)	L – M	The main damage – to dead trees, cut trees with bark, etc.
3a.27	<i>Callipogon relictus</i> Sem.	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Japan	<i>Quercus, Fraxinus, Ulmus and other trees</i>	Trunks (wood)	VL – L	
3a.28	<i>Cerambyx cerdo</i> L.	<i>Cerambycidae</i>	S. E. Russia ; Ukraine; Transcaucasus	Absent	Western Europe; Northern Africa	<i>Quercus, other deciduous</i>	Trunks (wood)	L – H	In the former USSR – two subspecies
3a.29	<i>Cerambyx scopolii</i> ? [ <i>C. scopolii</i> Füssl.]	<i>Cerambycidae</i>	S. E. Russia; Ukraine; Transcaucasus	Absent	Western Europe; Northern Africa	<i>Quercus, Fagus, other deciduous</i>	Trunks (wood)	L – M	
3a.30	<i>Clytus arietis</i> L.	<i>Cerambycidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Turkmenistan	Not yet checked	Europe	<i>Quercus, Vitis, other deciduous including fruit trees</i>	Trunks (wood and under bark)	VL – L	
3a.31	<i>Hylotrupes bajulus</i> L.	<i>Cerambycidae</i>	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Present	Western Europe; Northern Africa; China	Coniferous and deciduous	Wood	M – VH	Main damage – to wood in buildings, telegraph poles, sleepers, etc.
3a.32	<i>Lamia textor</i> L.	<i>Cerambycidae</i>	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan (North)	Absent	Western Europe	<i>Salix, Populus, Alnus</i>	Trunks (under bark)	L - M	
3a.33	<i>Mesosa curculionoides</i> L.	<i>Cerambycidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Kazakhstan	Not yet checked	Europe	<i>Quercus, Ulmus, Populus, other deciduous</i>	Trunks (under bark)	VL – L	
3a.34	<i>Mesosa myops</i> Dalm.	<i>Cerambycidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Kazakhstan	Not yet checked	Europe	<i>Quercus, Ulmus, Populus, other deciduous</i>	Trunks (under bark)	VL – L

## DIPTERA, HETEROPTERA &amp; HOMOPTERA

<b>Diptera</b>									
3a.172	<i>Strobilomyia</i> [ <i>Pegohylemyia</i> ] <i>anthracina</i>	<i>Anthomyiidae</i>	Russia: widespread in the <i>Picea</i> area Baltic countries, Belarus, Ukraine	Not known	Widespread in Europe, China, Japan	<i>Picea</i>	Cones and seeds	L - M	Data of Dr. Alain Roques
3a.173	<i>Strobilomyia</i> [ <i>Lasiomma</i> ] <i>laricicola</i>	<i>Anthomyiidae</i>	Russia: widespread in the <i>Larix</i> area; Baltic countries; Belarus, Ukraine	Not known	Widespread in Europe, China, Japan	<i>Larix</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.174	<i>Strobilomyia</i> [ <i>Lasiomma</i> ] <i>infrequens</i>	<i>Anthomyiidae</i>	Russia: widespread in the <i>Larix</i> area;	Not known	Widespread in Europe, China	<i>Larix</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.175	<i>Kaltenbachiola</i> [= <i>Perresia</i> ] <i>strobi</i>	<i>Cecidomyiidae</i>	Russia: widespread in <i>Picea</i> area; Baltic countries; Belarus, Ukraine; Kazakhst.	Not known	Central and Northern Europe	<i>Picea</i>	Cones and seeds	L - M	Data of Dr. Alain Roques
3a.176	<i>Plemeliella</i> <i>abietina</i>	<i>Cecidomyiidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Belarus, Ukraine	Not known	Widespread in <i>Picea</i> area in Europe	<i>Picea</i>	Seeds	VL - L	Data of Dr. Alain Roques
3a.177	<i>Resseliella piceae</i>	<i>Cecidomyiidae</i>	Transcaucasus	Not known	Western, Central , Southern Europe	<i>Abies</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.178	<i>Earomyia bazini</i>	<i>Lonchaeidae</i>	S. Siberia, N. Far East	Not known	France, Poland	<i>Larixs</i>	Seeds	L-M	Data of Dr. Alain Roques
3a.179	<i>Earomyia</i> <i>impossibile</i> [ <i>E. impossibilis</i> ]	<i>Lonchaeidae</i>	Transcaucasus	Not known	Austria, Italy, Romania	<i>Abies</i>	Seeds	M - H	Data of Dr. Alain Roques
3a.180	<i>Earomyia</i> <i>schystopiga</i>	<i>Lonchaeidae</i>	C.E. Russia, S. Siberia, Transbaik.s	Not known	Westen, Central, Northern Europe	<i>Picea</i>	Seeds	M - H	Data of Dr. Alain Roques
<b>Heteroptera</b>									
3a.181	<i>Aradus</i> <i>cinnamomeus</i>	<i>Aradidae</i>	N. E. Russia, C. E. Russia, S.E. Russia, N.E.Siberia, N.W. Siberia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine	Canada; USA	Finland; Sweden; Norway; Denmark; Netherlands; Spain; Greece; Chechia; Slovakia; Bulgaria; Poland; Hungary; Israel; Turkey;	<i>Pinus</i> <i>sylvestris</i> , other <i>Pinus</i> , <i>Larix</i>	Trunks (under bark)	L - H	Main damage – to young (5 – 25 year- old) pine plantations. Vector of resin flow canker
<b>Homoptera</b>									
3a.182	<i>Adelges laricis</i>	<i>Adelgidae</i>	Russia: spread in common spruce and larch area	Not yet checked	Not yet checked	<i>Picea</i> and <i>Larix</i>	Young sprouts & needles	VL – L	Main damage – to young trees
3a.183	<i>Adelges tardus</i>	<i>Adelgidae</i>	N. E. Russia, C. E. Russia; Baltic countries; Belarus	Not known	Central and Northern Europe	<i>Picea</i>	Young sprouts and needles	L – M	Main damage - to young trees in plantations and nurseries
3a.184	<i>Aphrastasia</i> <i>pectinatae</i> [ <i>A. pectinate</i> ]	<i>Adelgidae</i>	Russia: spread in common spruce and fir area; Baltic countries	Not yet checked	Not yet checked	<i>Picea</i> and <i>Abies</i>	Young sprouts and needles	VL – L	Main damage – to young trees

**Table 3a. INSECTS****HOMOPTERA**

3a.185	<i>Chermes [Adelges] tardooides</i>	<i>Adelgidae</i>	Russia: spread in common spruce and larch area	Not yet checked	Scandinavia	<i>Picea</i> and <i>Larix</i>	Young sprouts & needles	VL – L	Main damage – to young trees
3a.186	<i>Dreyfusia nordmanniana</i>	<i>Adelgidae</i>	Russia: spread in common spruce and fir area	Not yet checked	Not yet checked	<i>Picea</i> and <i>Abies</i>	Young sprouts & needles	VL – L	Main damage – to young trees
3a.187	<i>Pineus pini</i>	<i>Adelgidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Not known	Europe: widespread in pine area	<i>Pinus</i>	Young sprouts and needles	L – M	Main damage - to young trees in plantations and nurseries
3a.188	<i>Cholodkovskya viridara</i>	<i>Aphididae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe	<i>Larix</i>	Young sprouts and needles	L – M	Main damage - to young trees in plantations and nurseries
3a.189	<i>Dysaphis (= Yezabura) reaumuri</i>	<i>Aphididae</i>	S. E. Russia; Ukraine; Transcaucasus; Central Asia	Not yet checked	Not yet checked	<i>Pyrus, Populus</i>	Leaves	VL – M	
3a.190	<i>Sacchiphantes abietis</i>	<i>Aphididae</i>	Russia: widespread in spruce area; Baltic countries; Belarus; Kazakhstan	Absent	Western Europe	<i>Picea</i>	Young sprouts and needles	L – M	Main damage - to young trees in plantations and nurseries
3a.191	<i>Sacchiphantes viridis</i>	<i>Aphididae</i>	Russia: widespread in common spruce and larch area; Baltic countries; Belarus; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Picea</i> and <i>Larix</i>	Young sprouts and needles	VL – L	Main damage – to young trees
3a.192	<i>Thecabius affinis (= T. agnotus)</i>	<i>Aphididae</i>	C. E. Russia, S. E. Russia, N. W. Siberia, S. Siberia, Transbaikalia, S. Far East; Ukraine; Transcaucasus; Central Asia	Not yet checked	Widespread in Eurasia	<i>Populus</i>	Leaves	VL – M	
3a.193	<i>Parthenolecanium corni</i>	<i>Coccidae</i>	N. E. Russia, C. E. Russia, S.E. Russia, N. Far East, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Central Asia	Present	Western Europe	<i>Corylus, Robinia, Acer, Caragana, Vitis</i> , other deciduous	Trunks and branches (on the bark)	L – M	Main damage - to young plants in plantations and nurseries
3a.194	<i>Chionaspis salicis</i>	<i>Diaspididae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Western Europe	<i>Salix, Populus, Fraxinus, Acer</i> , other deciduous	Trunks and branches (on the bark)	L – M	Main damage - to young plants in plantations and nurseries

**Table 3a. INSECTS**

HOMOPTERA &amp; HYMENOPTERA

3a.195	<i>Lepidosaphes ulmi</i>	<i>Diaspididae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Widespread	Widespread in the world	<i>Populus</i> , <i>Salix</i> , fruit and other deciduous	Trunks and branches (on the bark)	L – M	Main damage – to young plants in plantations and nurseries
<b>Hymenoptera</b>									
3a.196	<i>Arge [= Hylotoma] pullata</i>	<i>Argidae</i>	Russia: widespread in birch area; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Betula</i>	Leaves	L	
3a.197	<i>Diprion [= Lophyrus] pini</i>	<i>Diprionidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Transcaucasus	Absent	Europe (widespread); Algeria	<i>Pinus</i>	Needles	M – H	
3a.198	<i>Neodiprion sertifer</i> [ <i>Tenthredo rufa</i> ]	<i>Diprionidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Transcaucasus	East of USA (introduced and not yet widely distributed)	Western Europe; Japan; Korea	<i>Pinus</i>	Needles	M – H	
3a.199	<i>Eurytoma laricis</i> (= <i>E. bouceki</i> )	<i>Eurytomidae</i>	S.E. Russia, C.E. Russia, S. Siberia, Transbaik	Not known	Europe: widespread in <i>Larix</i> area, Finland, China	<i>Larix</i>	seeds	VL – L	Data of Dr. Alain Roques
3a.200	<i>Eurytoma plotnikovi</i>	<i>Eurytomidae</i>	Central Asia	Not yet checked	Not yet checked	<i>Pistacia</i>	Nuts	VL – L	
3a.201	<i>Acantholyda [= Lyda] erythrocephala</i>	<i>Pamphiliidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Kazakhstan	East of USA (introduced and not yet widely distributed)	Western Europe; Korea	<i>Pinus</i>	Needles	M – H	Main damage – to young monocultures of pine
3a.202	<i>Acantholyda [Lyda] hieroglyphica</i>	<i>Pamphiliidae</i>	N. E. Russia, C. E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Western Europe	<i>Pinus</i>	Needles	L – M	Main damage – to 2 – 4 year-old plantations and nurseries
3a.203	<i>Acantholyda posticalis</i> [ <i>Lyda nemoralis</i> (= <i>Acantholyda pinivora</i> = <i>Tenthredo stellata</i> )]	<i>Pamphiliidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Kazakhstan	Not known	Western Europe; Japan; Mongolia	<i>Pinus</i>	Needles	M – H	
3a.204	<i>Sirex [Paururus] juvencus</i>	<i>Siricidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Pinus</i> , other coniferous	Trunks (wood)	L	

**Table 3a. INSECTS****HYMENOPTERA**

3a.205	<i>Tremex fuscicornis</i>	Siricidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe; Chili, China (North – East); Japan; Korea	<i>Betula, Populus tremula, Salix, Fagus, Quercus</i>	Trunks (wood)	L – M	
3a.206	<i>Tremex magus</i>	Siricidae	C. E. Russia, S.E. Russia, S. Siberia (West); Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe	<i>Betula, Fagus, Acer, other deciduous</i>	Trunks (wood)	L – M	
3a.207	<i>Urocerus [Sirex] gigas</i>	Siricidae	Russia: widespread in spruce area; Baltic countries; Belarus; Moldova; Ukraine; Kazakhstan	Not known	Western Europe; Japan	<i>Picea, other coniferous</i>	Trunks (wood)	L – M	
3a.208	<i>Croesus [= Nematus] septentrionalis</i>	Tenthredinidae	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine	Not yet checked	Not yet checked	<i>Betula, Alnus, Populus, Salix, Corylus</i>	Leaves	L	
3a.209	<i>Macrophyia punctumalbum</i>	Tenthredinidae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	East USA	Europe to the Caucasus	<i>Fraxinus, Ligustrum, Crataegus</i>	Leaves	L	
3a.210	<i>Mesoneura opaca</i>	Tenthredinidae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Not yet checked	Not yet checked	<i>Quercus</i>	Leaves	L	
3a.211	<i>Pristiphora abietina</i> [ <i>Lygaeonematus</i> ( <i>Nematus</i> ) <i>abietinus</i> ]	Tenthredinidae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Ukraine	Not known	Western Europe	<i>Picea</i>	Needles	L – M	
3a.212	<i>Pristiphora</i> [= <i>Lygaeonematus</i> = <i>Nematus</i> ] <i>erichsonii</i>	Tenthredinidae	Russia: widespread in larch area; Baltic countries; Belarus; Ukraine	Present	Western Europe	<i>Larix</i>	Needles	L – M	
3a.213	<i>Pristiphora</i> [= <i>Lygaeonematus</i> ] <i>wesmaeli</i>	Tenthredinidae	Russia: widespread in larch area; Baltic countries; Belarus; Ukraine	Not known	Western Europe	<i>Larix</i>	Needles and young sprouts	L – M	
3a.214	<i>Tomostethus nigritus</i>	Tenthredinidae	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Europe (HR, IT); from ES, N. Africa to the Caucasus	<i>Fraxinus</i>	Leaves	L	
3a.215	<i>Trichiocampus</i> [= <i>Cladius</i> ] <i>ulmi</i> (= <i>Cladius</i> <i>uncinatus</i> )	Tenthredinidae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Ulmus</i>	Leaves	L	

**Table 3a. INSECTS****HYMENOPTERA, ISOPTERA & LEPIDOPTERA**

3a.216	<i>Megastigmus pistaciae</i>	Torymidae	Ukraine; Transcaucasus; Central Asia	California	Southern Europe; North Africa, Iran, China	<i>Pistacia</i>	Nuts (seeds)	L – M	Data of Dr. Alain Roques
3a.217	<i>Megastigmus pictus</i>	Torymidae	Russia: widespread in larch area; Baltic countries; Belarus, Ukraine	Not known	Europe: widespread in <i>Larix</i> area, China	<i>Larix</i>	Seeds	L – M	Data of Dr. Alain Roques
3a.218	<i>Megastigmus specularis</i>	Torymidae	C.E. Russia, S. Siberia, Baltic countries	Not known	Finland, Denmark, Sweden, France	<i>Abies</i>	Seeds	L-M	Data of Dr. Alain Roques
3a.219	<i>Megastigmus strobilobius</i>	Torymidae	Russia: widespread in <i>Picea</i> area; Baltic countries; Belarus, Ukraine, Transcaucasus	Not known	Europe: widespread in <i>Picea</i> area	<i>Picea</i>	Seeds	M – H	Data of Dr. Alain Roques
3a.220	<i>Megastigmus suspectus</i>	Torymidae	C.E. Russia, S.E. Russia, Transcaucasus, Baltic countries; Belarus, Ukraine	Not known	Europe: widespread in <i>Abies</i> area	<i>Abies</i>	Seeds	M - H	Data of Dr. Alain Roques
3a.221	<i>Konowia [= Pseudoxiphidria] betulae</i>	Xiphydriidae	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe	<i>Betula</i>	Trunks (wood)	L – M	
3a.222	<i>Xiphydria camelus</i>	Xiphydriidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine	Not known	Western Europe	<i>Alnus, Betula</i>	Trunks (wood)	L – M	
3a.223	<i>Xiphydria prolongata</i>	Xiphydriidae	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan	Not known	Western Europe	<i>Salix, Populus, Betula, Quercus, Ulmus</i>	Trunks (wood)	L – M	

***Isoptera***

3a.224	<i>Reticulitermes lucifugus</i>	Rhinotermitidae	Ukraine (South)	Not known	Not known	Coniferous and deciduous	Wood	M – H	Main damage - to telegraph-poles, wood in buildings, etc.

3a.235	<i>Agriopsis</i> [ <i>Erannis</i> (= <i>Hybernia</i> )] <i>marginaria</i>	<i>Geometridae</i>	C. E. Russia, S. E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Europe (widespread); Turkey	<i>Quercus</i> , <i>Fagus</i> , <i>Ulmus</i> , <i>Betula</i> , <i>Tilia</i> , <i>Fraxinus</i> , fruit trees	Leaves	L – M	
3a.236	<i>Alsophila</i> [= <i>Anisopterix</i> ] <i>aescularia</i>	<i>Geometridae</i>	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Central and Southern Europe	<i>Ulmus</i> , <i>Quercus</i> , <i>Betula</i> , <i>Alnus</i>	Leaves	L – M	
3a.237	<i>Apocheima</i> [= <i>Biston</i> ] <i>hispidaria</i>	<i>Geometridae</i>	C. E. Russia, S. E. Russia, S. Siberia; Ukraine	Not known	Central and Southern Europe	<i>Quercus</i> , <i>Ulmus</i> , fruit trees, <i>Betula</i>	Leaves	L – M	
3a.238	<i>Apocheima pilosaria</i> [ <i>Phigalia pedaria</i> ]	<i>Geometridae</i>	N. E. Russia, C. E. Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine	Absent	Central Europe	<i>Ulmus</i> , <i>Quercus</i> , fruit trees, <i>Betula</i>	Leaves	L – M	

**Table 3a. INSECTS****LEPIDOPTERA**

3a.239	<i>Biston [= Amphidasis] betularia</i>	Geometridae	N. E. Russia, C. E. Russia, S.E. Russia, S. Siberia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan	Not known	Western Europe; Japan	<i>Betula, Populus, Tilia, Ulmus, Quercus, Fraxinus</i>	Leaves	L – M	
3a.240	<i>Biston strataria</i>	Geometridae	C. E. Russia, S. E. Russia ; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan	Not known	Europe; Turkey	<i>Quercus, Populus, Tilia, Betula</i>	Leaves	L – M	
3a.241	<i>Bupalus [= Fidonia] piniarius</i>	Geometridae	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Transcaucasus	Absent	Central and Northern Europe	<i>Pinus</i>	Needles	M – H	
3a.242	<i>Colotis [= Himera] pennaria</i>	Geometridae	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Central Europe; Turkey	<i>Quercus, Carpinus, Fagus, Betula, Populus, Salix</i>	Leaves	L – M	
3a.243	<i>Ectropis [Boarmia] bistortata</i>	Geometridae	Russia: widespread; Baltic countries; Belarus; Ukraine; Transcaucasus	Absent	Europe (widespread)	<i>Abies, Larix, Ribes</i>	Needles	L – H	Extremely polyphagous
3a.244	<i>Ectropis extersaria</i> [ <i>Parectropis luridata</i> (= <i>Boarmia extersaria</i> = <i>B. luridata</i> )]	Geometridae	Russia: widespread except North regions; Baltic countries; Belarus; Ukraine	Absent	Central Europe; Japan	<i>Betula, Alnus, Quercus, Corylus</i>	Leaves	L – M	
3a.245	<i>Ennomos quercinaria</i>	Geometridae	C. E. Russia, S. E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Central Europe; Turkey	<i>Quercus, Betula, Tilia, Fagus, Carpinus</i>	Leaves	L – M	
3a.246	<i>Erannis [= Hybernia] defoliaria</i>	Geometridae	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Europe (widespread)	<i>Quercus, Fagus, Ulmus, Betula, Tilia, Fraxinus, fruit trees</i>	Leaves	L – M	
3a.247	<i>Eupithecia abietaria</i>	Geometridae	Russia: widespread in spruce area	Not known	Northern, western and central Europe	<i>Picea, Pinus,</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.248	<i>Eupithecia bilunulata</i> [ <i>E. analoga</i> ] [ <i>E. strobilata</i> ]	Geometridae	C. E. Russia, S. E. Russia, N.E.Siberia, N.W. Siberia, S. Siberia, Transbaik.; Baltic countries; Belarus, Ukraine	Not known	Northern western and central Europe	<i>Picea,</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.249	<i>Hylaea [Ellopia] fasciaria</i> [= <i>E. prosapiaria</i> ]	Geometridae	Russia: widespread; Baltic countries; Belarus; Ukraine; Transcaucasus; Kazakhstan	Absent	Central and Northern Europe	<i>Pinus, Picea, Abies</i>	Needles	L – M	
3a.250	<i>Lycia [= Biston] hirtaria</i>	Geometridae	N. E. Russia, C. E. Russia, S.E. Russia, S. Siberia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Kazakhstan	Not known	Western Europe; Turkey	<i>Ulmus, fruit trees, Salix, Populus, Betula, Tilia, Acer, Quercus</i>	Leaves	L – M	

**Table 3a. INSECTS****LEPIDOPTERA**

3a.251	<i>Operophtera</i> [= <i>Cheimatobia</i> ] <i>brumata</i>	Geometridae	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Turkmenistan	Western USA (introduced); Eastern Canada (introduced)	Europe (widespread); Iran; Japan; Algeria; Tunisia	<i>Quercus</i> , fruit trees, <i>Ulmus</i> , <i>Fagus</i> , <i>Tilia</i> , <i>Carpinus</i> , <i>Acer</i> , <i>Salix</i>	Leaves	M – H	
3a.252	<i>Poecilopsis</i> [= <i>Biston</i> ] <i>pomonaria</i>	Geometridae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Not known	Northern – Western Europe	Deciduous fruit and forest trees & shrubs	Leaves	L – M	
3a.253	<i>Semiothisa</i> [= <i>Macaria</i> ] <i>liturata</i>	Geometridae	Russia; widespread; Baltic countries; Belarus; Ukraine; Transcaucasus	Not known	Western Europe	<i>Pinus</i> , <i>Picea</i> , <i>Abies</i>	Needles	L – M	
3a.254	<i>Semiothisa</i> [= <i>Macaria</i> ] <i>signaria</i>	Geometridae	Russia; widespread in coniferous area; Baltic countries; Belarus; Ukraine; Transcaucasus	Not known	Central and Northern Europe	<i>Picea</i> , <i>Abies</i> , <i>Pinus</i>	Needles	L – M	
3a.255	<i>Dendrolimus pini</i>	Lasiocampidae	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Kazakhstan	Absent	Europe (generally); Asia (generally); Morocco	<i>Pinus sylvestris</i>	Needles	H – VH	
3a.256	<i>Eriogaster</i> [= <i>Lasiocampa</i> = <i>Gastropacha</i> ] <i>lanestris</i>	Lasiocampidae	Russia: widespread in forest area; Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe	<i>Quercus</i> , <i>Betula</i> , <i>Tilia</i> , <i>Populus</i> , <i>Salix</i>	Leaves	L – M	
3a.257	<i>Malacosoma</i> [= <i>Gastropacha</i> ] <i>neustria</i>	Lasiocampidae	C. E. Russia, S. E. Russia, S. Siberia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Western Europe; Northern China; Korea; Japan	<i>Rosaceae</i> , <i>Quercus</i> , <i>Populus</i> , <i>Salix</i>	Leaves	L – M	
3a.258	<i>Cosmotricha</i> [= <i>Selenephora</i> = <i>Selenophora</i> ] <i>lunigera</i>	Lasiocampidae	Russia; widespread; Baltic countries; Belarus; Moldova; Ukraine	Absent	Central Europe	<i>Abies</i> , <i>Larix</i> , <i>Picea</i> , <i>Pinus</i>	Needles	L – H	
3a.259	<i>Calliteara</i> [ <i>Dasychira</i> ] <i>abietis</i>	Lymantriidae	Russia: widespread in coniferous area; Baltic countries; Belarus; Ukraine	Not known	Central and Northern Europe; Japan	<i>Picea</i> , <i>Abies</i> , <i>Pinus</i> , <i>Larix</i> ,	Needles	L – M	
3a.260	<i>Calliteara</i> [ <i>Dasychira</i> ] <i>pudibunda</i>	Lymantriidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Not known	Western Europe; Japan	<i>Quercus</i> , <i>Fagus</i> , <i>Carpinus</i> , <i>Betula</i> , <i>Salix</i>	Leaves	L – M	
3a.261	<i>Euproctis</i> [= <i>Nygma</i> ] <i>chrysorrhoea</i>	Lymantriidae	C. E. Russia, S. E. Russia ; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Canada, USA	Europe (widely); Iran; Syria; Turkey; Algeria; Morocco; Mauritania; Tunisia	<i>Quercus</i> , fruit trees, <i>Ulmus</i> , <i>Populus</i> , other deciduous	Leaves	M – H	
3a.262	<i>Leucoma</i> [= <i>Stilpnobia</i> ] <i>salicis</i>	Lymantriidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Canada (West); USA (East)	Europe (widely); Mediterranean region; Northern Mongolia; China; Korea; Japan; Northern Africa	<i>Salix</i> , <i>Populus</i>	Leaves	M – H	The most dangerous for plantations of <i>Salix</i> and <i>Populus</i>

**Table 3a. INSECTS**

LEPIDOPTERA										
3a.263	<i>Lymantria</i> [= <i>Ocneria</i> = <i>Porthetria</i> ] <i>dispar</i>	<i>Lymantriidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Canada and USA (introduced)	Europe (widely); Mediterranean region; India; Afghanistan; Iran; Iraq; China; Japan; Korea; Taiwan	<i>Quercus</i> , fruit trees, <i>Populus</i> , <i>Betula</i> , <i>Larix</i> , etc.	Leaves	M – VH	Extremely polyphagous	
3a.264	<i>Lymantria</i> [= <i>Ocneria</i> ] <i>monacha</i>	<i>Lymantriidae</i>	Russia: widespread in coniferous area; Baltic countries; Belarus; Ukraine; Transcaucasus	Absent	Europe (widely); China; Japan; Korea; Turkey; Mediterranean region (generally)	<i>Pinus</i> , <i>Picea</i> , <i>Abies</i> , <i>Larix</i>	Needles, young sprouts and buds	H - VH		
3a.265	<i>Orgyia antiqua</i>	<i>Lymantriidae</i>	Russia: widespread; Baltic countries; Belarus; Ukraine; Transcaucasus	Present	Western Europe; Eastern Asia; Northern China; Japan	<i>Quercus</i> , <i>Populus</i> , <i>Betula</i> , other deciduous, <i>Picea</i> , <i>Larix</i>	Leaves and needles	M - H		
3a.266	<i>Sphrageidus</i> [= <i>Euproctis</i> = <i>Porthesia</i> ] <i>similis</i>	<i>Lymantriidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Absent	Europe (widespread); China; Japan	<i>Quercus</i> , <i>Betula</i> , fruit trees	Leaves	L – M		
3a.267	<i>Acronicta aceris</i>	<i>Noctuidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Central Asia	Not known	Central and Western Europe; Mediterranean region	<i>Quercus</i> , <i>Acer</i> , <i>Ulmus</i> , <i>Fagus</i> , <i>Aesculus</i> , <i>Populus</i> , <i>Salix</i>	Leaves	L – M		
3a.268	<i>Agrotis segetum</i>	<i>Noctuidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Not known	Europe (widespread); Asia (widespread); Africa (widespread)	Deciduous, coniferous and other plants	Roots	L – M	Main damage - to young plantations and in nurseries	
3a.269	<i>Colocasia</i> [= <i>Demas</i> ] <i>coryli</i>	<i>Noctuidae</i>	N.E. Russia, C E.Russia, S.E. Russia, N.E.Siberia, N.W. Siberia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Central and Northern Europe	<i>Quercus</i> , <i>Betula</i> , <i>Fagus</i> , <i>Carpinus</i> , <i>Corylus</i> , <i>Populus</i> , <i>Salix</i>	Leaves	L – M		
3a.270	<i>Moma</i> [= <i>Daseochaeta</i> = <i>Diptera</i> ] <i>alpium</i>	<i>Noctuidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine	Absent	Central & Northern Europe; China; Korea; Japan	<i>Quercus</i> , <i>Fagus</i> , <i>Betula</i> , <i>Carpinus</i>	Leaves	L – M		
3a.271	<i>Orthosia cruda</i> [ <i>Monima</i> (= <i>Taeniocampa</i> ) <i>pulverulenta</i> ]	<i>Noctuidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Central and Northern Europe; Mediterranean region	<i>Quercus</i> , <i>Acer</i> , <i>Tilia</i> , <i>Betula</i> , <i>Ulmus</i> , <i>Populus tremula</i>	Leaves	L – M		
3a.272	<i>Orthosia</i> [ <i>Monima</i> (= <i>Taeniocampa</i> ) <i>incerta</i>	<i>Noctuidae</i>	N.E.Russia, C.E. Russia, S.E. Russia, S.Siberia, S.Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Present	Central and Northern Europe; Mediterranean region	<i>Quercus</i> , <i>Betula</i> , <i>Populus</i> , <i>Ulmus</i> , <i>Tilia</i>	Leaves	L – M

COLEOPTERA

Insecta <i>Coleoptera</i>									
4.12	[ <i>Tropiderinus interruptus</i> ]	Anthribidae	S. Siberia, Transbaikalia, S. Far East	Not yet checked	Japan	<i>Prunus</i> , <i>Populus</i> , other trees	Trunks (wood)	VL – M	
4.13	<i>Apion pachyrrhynchum</i>	Apionidae (= Curculionidae)	S. Far East	Not yet checked	Japan	<i>Acer</i>	Leaves	VL – L	
4.14	[ <i>Apoderus erythropterus</i> ]	Attelabidae	N. E. Russia, N. W. Siberia, N. E. Siberia, S. Siberia, Transbaikalia, N. Far East, S. Far East	Not yet checked	China, Japan, Koreas	<i>Salix</i> , <i>Quercus</i> , <i>Corylus</i> , <i>Ulmus</i> , etc.	Leaves	L – M	
4.15	[ <i>Apoderus jekeli</i> ]	Attelabidae	S. Far East	Not yet checked	Japan, Koreas	<i>Alnus</i> , <i>Corylus</i> , <i>Juglans</i> , etc.	Leaves	VL – L	
4.16	[ <i>Attelabus</i> (= <i>Henicolabus</i> ) <i>giganteus</i> ]	Attelabidae	S. Far East	Not yet checked	China, Koreas	<i>Tilia</i>	Leaves	VL – L	
4.17	<i>Tomapoderus ruficollis</i>	Attelabidae	Transbaikalia, S. Far East	Not yet checked	China, Koreas	<i>Ulmus</i>	Leaves	VL – L	
4.18	[ <i>Acmaeodera glazunovi</i> ]	Buprestidae	Central Asia	Not yet checked	Not yet checked	Different forest trees	Trunks (under bark)	VL – L	
4.19	[ <i>Agrilus smaragdinus</i> ]	Buprestidae	S. Far East	Not yet checked	Not yet checked	<i>Quercus</i> , <i>Betula</i>	Trunks (under bark)	VL – M	
4.20	[ <i>Ancylacheira</i> (= <i>Ancylochira</i> - ?) (= <i>Buprestis</i> ) <i>sibirica</i> ]	Buprestidae	N. W. Siberia, N. E. Siberia, S. Siberia, Transbaikalia, S. Far East, N. Far East; Kazakhstan; Kyrgyzstan	Not yet checked	Mongolia, Northern China, Koreas	<i>Pinus</i> , <i>Picea</i> , other coniferous	Trunks (under bark)	L – M	
4.21	[ <i>Ancylacheira</i> (= <i>Ancylochira</i> - ?) <i>rustica nickerli</i> ]	Buprestidae	Georgia	Not yet checked	Not yet checked	<i>Pinus</i> , <i>Picea</i>	Trunks (under bark)	VL – L	
4.22	[ <i>Ancylacheira</i> (= <i>Ancylochira</i> - ?) <i>salomonii</i> ]	Buprestidae	Azerbaijan; Armenia; Central Asia	Not yet checked	Turkey, Iran, China	<i>Populus</i>	Trunks (under bark)	VL – L	
4.23	[ <i>Ancylacheira</i> (= <i>Ancylochira</i> - ?) <i>strigosa</i> ]	Buprestidae	N. W. Siberia, N. E. Siberia, S. Siberia, Transbaikalia, S. Far East, N. Far East; Kazakhstan	Not yet checked	Mongolia, Northern China	<i>Pinus</i> , <i>Picea</i> , other coniferous	Trunks (under bark)	L – M	
4.24	[ <i>Anthaxia</i> (= <i>Chrysanthaxia</i> ) <i>polychloros</i> ]	Buprestidae	S. E. Russia; Ukraine; Transcaucasus	Not yet checked	Turkey, Syria	<i>Quercus</i> , <i>Prunus amygdalis</i>	Trunks (under bark)	L – M	
4.25	[ <i>Anthaxia</i> (= <i>Melanthaxia</i> ) <i>auriventris</i> ]	Buprestidae	Kyrgyzstan	Not yet checked	Not yet checked	<i>Juniperus</i>	Trunks (under bark)	VL – L	

**Table 4. INSECTS**

COLEOPTERA									
4.26	[ <i>Anthaxia</i> ( <i>= Melanthaxia</i> ) <i>baicalensis</i> ]	Buprestidae	S. Siberia	Not yet checked	Not yet checked	Coniferous	Trunks (under bark)	VL – L	
4.27	[ <i>Anthaxia</i> ( <i>= Melanthaxia</i> ) <i>turkestanica</i> ]	Buprestidae	Kyrgyzstan (mountains)	Not yet checked	Not yet checked	<i>Juniperus</i>	Trunks (under bark)	VL – L	
4.28	[ <i>Anthaxia</i> ( <i>= Melanthaxia</i> ) <i>zarudniiana</i> ]	Buprestidae	Southern Kazakhstan	Not yet checked	Not yet checked	<i>Juniperus</i>	Trunks (under bark)	VL – L	
4.29	[ <i>Buprestis</i> <i>proscheki</i> ]	Buprestidae	S. E. Russia; Ukraine (Crimea)	Not yet checked	Not yet checked	<i>Pinus</i>	Trunks (under bark)	VL – L	
4.30	[ <i>Chrysobothris</i> <i>amurensis</i> ]	Buprestidae	S. Far East	Not yet checked	Not yet checked	<i>Quercus</i> <i>mongolica</i>	Trunks (under bark)	VL – L	
4.31	[ <i>Chrysobothris</i> <i>pulchripes</i> ]	Buprestidae	S. Far East	Not yet checked	Northern China	<i>Quercus</i> <i>mongolica</i>	Trunks (under bark)	VL – L	
4.32	[ <i>Eurythyrea eoae</i> ]	Buprestidae	S. Far East	Not yet checked	China	<i>Populus</i>	Trunks (under bark)	VL – L	
4.33	[ <i>Poecilonota</i> <i>diceroides</i> ]	Buprestidae	S. Far East	Not yet checked	Northern China	<i>Populus</i>	Trunks (under bark)	VL – L	
4.34	[ <i>Scintillatrix</i> (= <i>Lampra</i> ) <i>amurensis</i> ]	Buprestidae	S. Far East	Not yet checked	Not yet checked	<i>Tilia</i>	Trunks (under bark)	VL – L	
4.35	[ <i>Scintillatrix</i> (= <i>Lampra</i> ) <i>suvorovi</i> ]	Buprestidae	S. Far East	Not yet checked	Northern China	<i>Ulmus</i> , <i>Quercus</i>	Trunks (under bark)	VL – L	
4.36	[ <i>Scintillatrix</i> (= <i>Lampra</i> ) <i>virgata</i> ]	Buprestidae	S. Far East	Not yet checked	Northern China	<i>Quercus</i>	Trunks (under bark)	VL – L	
4.37	<i>Acmaeodera</i> <i>chotanica</i>	Buprestidae	Uzbekistan	Not yet checked	China	<i>Populus</i> , <i>Morus</i> , <i>Pistacea</i>	Trunks (under bark)	VL – M	
4.38	<i>Anthaxia</i> ( <i>= Melanthaxia</i> ) <i>conradti</i>	Buprestidae	Central Asia (mountains)	Not yet checked	Not yet checked	<i>Juniperus</i>	Trunks (under bark)	VL – L	
4.39	<i>Anthaxia aurulenta</i> ( <i>= Cratomerus</i> (= <i>Trichocratomerus</i> ) <i>intermedius</i> )	Buprestidae	S. E. Russia; Transcaucasus; Central Asia	Not yet checked	Northern Iran	<i>Ulmus</i> , <i>Pyrus</i>	Trunks (under bark)	VL – L	
4.40	<i>Capnodis cariosa</i>	Buprestidae	S. E. Russia; Transcaucasus	Not yet checked	Syria, Iran	<i>Pistacea</i> , <i>Prunus</i> , <i>Salix</i> , <i>Populus</i>	Roots (under bark)	L – M	
4.41	<i>Capnodis miliaris</i>	Buprestidae	Transcaucasus, Central Asia	Not yet checked	DE, Syria, Turkey, Iran, Irak, Afghanistan	<i>Populus</i> , <i>Salix</i>	Trunks (under bark)	L – M	

**Table 4. INSECTS**

COLEOPTERA									
4.42	<i>Chrysobothris (= Åbothriss) nana</i>	Buprestidae	Central Asia	Not yet checked	Not yet checked	<i>Populus</i>	Trunks (under bark)	VL – L	
4.43	<i>Chrysobothris affinis tetragramma</i>	Buprestidae	Transcaucasus; Central Asia	Not yet checked	Iran	<i>Ulmus, Salix, Juglans</i>	Trunks (under bark)	L – M	
4.44	<i>Cratomerus (= Anthaxia) fariniger</i>	Buprestidae	Central Asia	Not yet checked	Not yet checked	<i>Populus</i>	Trunks (under bark)	L – M	
4.45	<i>Cratomerus (= Trichocratomerus) aurulentus seniculus</i>	Buprestidae	S. E. Russia; Ukraine; Uzbekistan	Not yet checked	Turkey, Syria	<i>Ulmus, Malus</i>	Trunks (under bark)	VL – L	
4.46	[ <i>Acanthocinus elegans</i> ]	Cerambycidae	Transcaucasus	Not yet checked	Iran	<i>Quercus, other trees</i>	Trunks (wood)	VL – L	
4.47	[ <i>Acanthocinus stillatus</i> ]	Cerambycidae	S. Far East	Not yet checked	Japan, Koreas	<i>Acer mono</i>	Trunks (wood)	VL – L	
4.48	[ <i>Acmaeops brachyptera</i> ]	Cerambycidae	Kazakhstan (mountains)	Not yet checked	China	<i>Picea schrenkiana</i>	Trunks (under bark)	VL – L	
4.49	[ <i>Anaesthetis flavipilis</i> ]	Cerambycidae	S. Far East	Not yet checked	China, Koreas	<i>Quercus, other trees</i>	Trunks (wood)	VL – L	
4.50	[ <i>Anaglyptus arabicus</i> ]	Cerambycidae	S.E.Russia; Transcaucasus	Not yet checked	Iran, Turkey	<i>Quercus</i>	Trunks (wood)	VL – L	
4.51	[ <i>Anaglyptus simplicicornis</i> ]	Cerambycidae	S.E.Russia; Transcaucasus	Not yet checked	Iran, Turkey	<i>Quercus, Castanea</i>	Trunks (wood)	VL – L	
4.52	[ <i>Asemum amurense</i> ]	Cerambycidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Pinus, Picea</i>	Trunks (wood)	VL – M	
4.53	[ <i>Callidium chlorizans</i> ]	Cerambycidae	N.W. Siberia, N.E. Siberia, S. Siberia, Transbaikalia, S. Far East	Not yet checked	China, Japan, Koreas, Mongolia	<i>Picea</i>	Trunks (wood)	VL – L	
4.54	[ <i>Cerambyx multiplicatus</i> ]	Cerambycidae	Transcaucasus	Not yet checked	Iran	<i>Quercus, Fagus, Ulmus</i>	Trunks (wood)	VL – L	
4.55	[ <i>Chlorophorus faldermanni</i> ]	Cerambycidae	S.E.Russia; Transcaucasus; Central Asia	Not yet checked	Afghanistan, China, Iran	<i>Populus, Elaeagnus, deciduous wood</i>	Dry wood, Trunks (wood)	L – H	Main damage – to dry wood
4.56	[ <i>Distenia gracilis</i> ]	Cerambycidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Picea, Pinus and other trees</i>	Trunks (wood)	VL – L	
4.57	[ <i>Isotomus comptus</i> ]	Cerambycidae	S.E.Russia; Transcaucasus; Ukraine	Not yet checked	India, Iran, Turkey	<i>Carpinus, Quercus, Fagus, Castanea, deciduous wood</i>	Dry wood, Trunks (wood)	L – M	Main damage – to dry wood
4.58	[ <i>Megasemum quadricostulatum</i> ]	Cerambycidae	Transbaikalia, S. Far East	Not yet checked	China, Japan, Koreas	<i>Pinus sibirica</i>	Trunks (wood)	VL – M	
4.59	[ <i>Mesosa hirsute</i> ]	Cerambycidae	S. Far East	Not yet checked	Japan, Koreas	<i>Tilia</i>	Trunks (wood)	VL – L	

**Table 4. INSECTS**

COLEOPTERA								
4.60	[ <i>Mesosa obscuricornis</i> ]	Cerambycidae	Transcaucasus	Not yet checked	Iran	<i>Quercus</i> , other trees	Trunks (wood)	VL – L
4.61	[ <i>Molorchus pallidipennis</i> ]	Cerambycidae	Kyrgyzstan; Kazakhstan	Not yet checked	China	<i>Picea schrenkiana</i>	Trunks (wood)	VL – L
4.62	[ <i>Pachyta bicuneata</i> ]	Cerambycidae	S. Far East	Not yet checked	China, Koreas	<i>Pinus sibiricus</i> , <i>Larix dahurica</i> , <i>Picea koraiensis</i>	Trunks (wood)	VL – L
4.63	[ <i>Paraclytus raddei</i> ]	Cerambycidae	Azerbaijan	Not yet checked	Iran	<i>Quercus</i>	Trunks (wood)	VL – L
4.64	[ <i>Paraclytus reitteri</i> ]	Cerambycidae	Azerbaijan	Not yet checked	Iran	<i>Quercus</i>	Trunks (wood)	VL – L
4.65	[ <i>Paraclytus sexguttatus</i> ]	Cerambycidae	S.E.Russia; Transcaucasus	Not yet checked	Iran, Turkey	<i>Quercus</i>	Trunks (wood)	VL – L
4.66	[ <i>Patimna liturata</i> ]	Cerambycidae	S. Far East	Not yet checked	Japan	<i>Acer</i>	Trunks (wood)	VL – L
4.67	[ <i>Plagionotus bartolomei</i> ]	Cerambycidae	Transcaucasus	Not yet checked	Iran	<i>Quercus</i>	Trunks (wood)	VL – L
4.68	[ <i>Plagionotus christophi</i> ]	Cerambycidae	S. Far East	Not yet checked	China	<i>Quercus</i>	Trunks (wood)	VL – L
4.69	[ <i>Plagionotus lugubris</i> ]	Cerambycidae	Transcaucasus	Not yet checked	Iran	<i>Quercus</i>	Trunks (wood)	L – M
4.70	[ <i>Plagionotus pulcher</i> ]	Cerambycidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i> , <i>Betula</i>	Trunks (wood)	VL – L
4.71	[ <i>Pogonocherus caucasicus</i> ]	Cerambycidae	Transcaucasus	Not yet checked	Not yet checked	<i>Picea</i>	Trunks (wood)	VL – L
4.72	[ <i>Pogonocherus kuksha</i> ]	Cerambycidae	Transcaucasus	Not yet checked	Not yet checked	<i>Picea</i>	Trunks (wood)	VL – L
4.73	[ <i>Prionus angustatus</i> ]	Cerambycidae	Central Asia	Not yet checked	Not yet checked	<i>Populus</i> and other trees	Trunks (wood)	VL – L
4.74	[ <i>Rhagium fasciculatum</i> ]	Cerambycidae	S. E. Russia; Transcaucasus	Not yet checked	Iran, Turkey	<i>Quercus</i> , <i>Fagus</i> , <i>Tilia</i> , <i>Platanus</i> , <i>Castanea</i> and other trees	Trunks (under bark)	VL – L
4.75	[ <i>Rhagium inquisitor rugipenne</i> ]	Cerambycidae	Transbaikalia, S. Far East	Not yet checked	China, Koreas	<i>Pinus</i> , <i>Picea</i> and other trees	Trunks (under bark)	VL – L
4.76	[ <i>Rhagium pygmaeum</i> ]	Cerambycidae	Azerbaijan	Not yet checked	Iran	<i>Quercus</i> , <i>Fagus</i> , <i>Tilia</i> , <i>Castanea</i> and other trees	Trunks (under bark)	VL – L
4.77	[ <i>Sachalinobia koltzei</i> ]	Cerambycidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Abies holophylla</i> , <i>Abies nephrolepis</i>	Trunks (wood)	VL – L

**Table 4. INSECTS**

COLEOPTERA									
4.78	[ <i>Saperda alberti</i> (= <i>S. decempunctata</i> )]	<i>Cerambycidae</i>	N.W. Siberia, N.E. Siberia, S. Siberia, Transbaikalia, S. Far East	Not yet checked	Not yet checked	<i>Populus tremula</i> , <i>Ulmus</i>	Trunks (wood)	VL – L	
4.79	[ <i>Saperda interrupta</i> ]	<i>Cerambycidae</i>	N.W. Siberia, N.E. Siberia, S. Siberia, Transbaikalia, S. Far East	Not yet checked	China, Koreas	<i>Picea ajanensis</i> , <i>Pinus sibirica</i>	Trunks (wood)	VL – L	
4.80	[ <i>Stenocorus insitivus</i> ]	<i>Cerambycidae</i>	S. E. Russia; Ukraine; Transcaucasus	Not yet checked	Turkey	<i>Quercus</i> , <i>Castanea</i> and other trees	Trunks (under bark)	VL – L	
4.81	[ <i>Stenogrinum quadrinotatum</i> ]	<i>Cerambycidae</i>	S. Far East	Not yet checked	Assam, Birma, China, Japan, Koreas, Manipur	<i>Castanea</i> , <i>Quercus</i> , <i>Salix</i>	Trunks (wood)	VL – L	
4.82	[ <i>Turaniun pilosum</i> ]	<i>Cerambycidae</i>	Central Asia	Not yet checked	Not yet checked	<i>Betula</i> , <i>Salix</i> , <i>Populus</i> , <i>Ulmus</i>	Trunks (wood)	VL – L	
4.83	[ <i>Turaniun scabrum</i> ]	<i>Cerambycidae</i>	Central Asia	Not yet checked	Not yet checked	<i>Populus</i> , <i>Ulmus</i> , <i>Salix</i> , <i>Malus</i> , <i>Prunus</i>	Trunks (wood)	VL – L	
4.84	[ <i>Xylotrechus cuneipennis</i> ]	<i>Cerambycidae</i>	Transbaikalia, S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i> , <i>Betula</i> , <i>Ulmus</i>	Trunks (wood)	VL – L	
4.85	[ <i>Xylotrechus rufilius</i> ]	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Japan, Koreas	<i>Acer</i>	Trunks (wood)	VL – L	
4.86	<i>Acalolepta cervina</i> (= <i>Dihammus cervinus</i> )	<i>Cerambycidae</i>	S. Far East	Not yet checked	Birma, China, India, Japan, Koreas, Nepal	<i>Alnus</i> , other trees	Trunks (wood)	VL – L	
4.87	<i>Chlorophorus motschulskyi</i>	<i>Cerambycidae</i>	Transbaikalia, S. Far East	Not yet checked	China, Japan, Koreas, Mongolia	<i>Betula</i>	Trunks (wood)	VL – L	
4.88	<i>Compsidia</i> (= <i>Saperda</i> ) <i>balsamifera</i>	<i>Cerambycidae</i>	N.W. Siberia, N.E. Siberia, S. Siberia, Transbaikalia, S. Far East	Not yet checked	Mongolia	<i>Populus balsamifera</i>	Trunks (wood)	VL – L	
4.89	<i>Dokhturovia</i> (= <i>Dokhtouroffia</i> ) <i>nebulosa</i>	<i>Cerambycidae</i>	Kyrgyzstan; Kazakhstan	Absent	China	<i>Picea schrenkiana</i>	Trunks (wood)	VL – M	
4.90	<i>Eutetrapha metallescens</i>	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Koreas	<i>Tilia</i>	Trunks (wood)	VL – L	
4.91	<i>Hesperophanus</i> (= <i>Trichoferus</i> ) <i>campestris</i>	<i>Cerambycidae</i>	S. Far East; Central Asia (mountains)	Not yet checked	China, Koreas, Mongolia	Fruit and other deciduous trees	Trunks (wood)	VL – L	
4.92	<i>Leptura sequenci</i> (= <i>L. sequensi</i> )	<i>Cerambycidae</i>	N.W. Siberia, N.E. Siberia, S. Siberia, Transbaikalia, S. Far East	Not yet checked	China, Japan, Koreas, Mongolia	<i>Pinus</i> , <i>Picea</i>	Trunks (wood)	VL – L	
4.93	<i>Mallambyx raddei</i>	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i> , <i>Castanea</i> , <i>Fraxinus</i>	Trunks (wood)	L – M	
4.94	<i>Mesosa japonica</i>	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Japan	<i>Castanea</i> , <i>Acer</i> , <i>Malus</i> , <i>Prunus</i>	Trunks (wood)	VL – L	
4.95	<i>Moechotipa diphysis</i>	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Koreas	<i>Quercus</i> , other trees	Trunks (wood)	VL – L	

**Table 4. INSECTS**

COLEOPTERA								
4.96	<i>Monochamus guttatus</i>	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Koreas	<i>Fraxinus</i> , other trees	Trunks (wood)	VL – L
4.97	<i>Morimus verecundus</i>	<i>Cerambycidae</i>	S.E.Russia; Transcaucasus; Turkmenistan	Not yet checked	Caucasus, Iran, Turkey	<i>Quercus</i> , <i>Fagus</i> , <i>Castanea</i> , <i>Juglans</i> , other trees	Trunks (wood)	VL – L
4.98	<i>Parandra caspia</i>	<i>Cerambycidae</i>	Azerbaijan	Not yet checked	Iran	<i>Populus</i> , <i>Salix</i> , <i>Alnus</i> , <i>Quercus</i> and other deciduous	Trunks (wood)	VL – M
4.99	<i>Prionus insularis</i>	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Japan, Koreas	<i>Pinus</i> , <i>Abies</i> , <i>Cryptomeria</i> , <i>Picea</i> , <i>Chamaecyparis</i> , and other trees	Trunks (wood)	VL – L
4.100	<i>Rhesus serricollis</i>	<i>Cerambycidae</i>	Transcaucasus	Not yet checked	East Maditerranean, Iran, Syria, Turkey	<i>Quercus</i> , <i>Fagus</i> , <i>Platanus</i> , <i>Juglans</i> , <i>Salix</i> , <i>Tilia</i> , <i>Ulmus</i> and other deciduous	Trunks (wood)	VL – M
4.101	<i>Rhopaloscelis bifasciatus</i>	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i> , other trees	Trunks (wood)	VL – L
4.102	<i>Rhopaloscelis unifasciatus</i>	<i>Cerambycidae</i>	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i> , other trees	Trunks (wood)	VL – L
4.103								
4.104	[ <i>Altica</i> (= <i>Haltica</i> ) <i>bisulcata</i> ]	<i>Chrysomelidae</i>	S. Far East	Not yet checked	Not yet checked	<i>Salix</i> , <i>Populus tremula</i>	Leaves	VL – L
4.105	[ <i>Bedelia angustata</i> ]	<i>Chrysomelidae</i>	Armenia, Turkmenistan	Not yet checked	Iran	<i>Populus</i>	Leaves	VL – L
4.106	[ <i>Bedelia kokandica</i> ]	<i>Chrysomelidae</i>	Tadzhikistan, Turkmenistan, Uzbekistan	Not yet checked	Not yet checked	<i>Populus</i> , <i>Salix</i>	Leaves	VL – L
4.107	[ <i>Bedelia viridicoerulea</i> ]	<i>Chrysomelidae</i>	Tadzhikistan, Turkmenistan, Uzbekistan	Not yet checked	Not yet checked	<i>Populus</i> , <i>Salix</i>	Leaves	VL – L
4.108	[ <i>Colasposoma dahuricum</i> ]	<i>Chrysomelidae</i>	S. Siberia, Transbaikalia, S. Far East	Not yet checked	Japan	<i>Fraxinus</i>	Leaves	VL – L
4.109	[ <i>Cryptocephalus koltzei</i> ]	<i>Chrysomelidae</i>	S. Far East	Not yet checked	China	<i>Corylus</i>	Leaves	VL – L
4.110	[ <i>Cryptocephalus kulibini</i> ]	<i>Chrysomelidae</i>	Transbaikalia, S. Far East	Not yet checked	Not yet checked	<i>Corylus</i>	Leaves	VL – L
4.112	[ <i>Cryptocephalus mannerheimi</i> ]	<i>Chrysomelidae</i>	N.E. Siberia, S. Siberia, Transbaikalia, S. Far East	Not yet checked	Japan	<i>Corylus</i>	Leaves	VL – L
4.113	[ <i>Cryptocephalus pallescens</i> ]	<i>Chrysomelidae</i>	S. Far East	Not yet checked	Not yet checked	<i>Corylus</i>	Leaves	VL – L
4.114	[ <i>Cryptocephalus peliopterus</i> ]	<i>Chrysomelidae</i>	N.E. Siberia, S. Siberia, Transbaikalia, S. Far East	Not yet checked	Not yet checked	<i>Populus</i> , <i>Ulmus</i> , <i>Corylus</i>	Leaves	VL – L

**Table 4. INSECTS**

4.404	[ <i>Spinococcus tuberculatus</i> ]	<i>Pseudococcidae</i>	S. Far East	Not yet checked	Not yet checked	<i>Populus, Ribes</i>	Trunks & branches	VL – L
4.405	<i>Phenacoccus polyphagus</i>	<i>Pseudococcidae</i>	S. Far East	Not yet checked	Not yet checked	<i>Malus, Betula, Fraxinus</i>	Trunks & branches	VL – L
4.406	<i>Polystomophora</i> (= <i>Phenacoccus</i> ) <i>ostiaplurima</i>	<i>Pseudococcidae</i>	Ukraine	Not yet checked	HU	<i>Acer, Aesculus</i>	Trunks & branches	VL – L
4.407	[ <i>Psylla moscovita</i> ]	<i>Psyllidae</i>	C. E. Russia	Not yet checked	Not yet checked	<i>Salix</i>	Leaves & branches	VL – L
4.408	[ <i>Psylla submigrata</i> ]	<i>Psyllidae</i>	C. E. Russia	Not yet checked	Not yet checked	<i>Salix</i>	Leaves & branches	VL – L

**Table 4. INSECTS**

## HYMENOPTERA

<i>Hymenoptera</i>								
4.409 [ <i>Cimbex japonica</i> ]	<i>Cimbicidae</i>	S. Far East	Not yet checked	Japan	<i>Salix, Populus</i>	Leaves	VL – L	
4.410 <i>Gilpinia</i> (= <i>Diprion</i> ) <i>verticalis</i>	<i>Diprionidae</i>	N. E. Russia, C. E. Russia, S. E. Russia; Belarus; Ukraine; Baltic countries	Not yet checked	FI, SE	<i>Pinus</i>	Needles	VL – L	
4.411 [ <i>Camponotus caryaev ruzskyi</i> ]	<i>Formicidae</i>	S. E. Russia; Kazakhstan; Transcaucasus	Not yet checked	Not yet checked	Many trees	Trunks, cut wood	VL – M	
4.412 [ <i>Camponotus pennsylvanicus saxatilis</i> ]	<i>Formicidae</i>	S. E. Russia	Not yet checked	Not yet checked	Many trees	Trunks, cut wood	VL – L	
4.413 [ <i>Lepto thorax korbi</i> ]	<i>Formicidae</i>	Azerbaijan	Not yet checked	Not yet checked	Many trees	Trunks (wood)	VL – L	
4.414 [ <i>Lepto thorax melnikovi</i> ]	<i>Formicidae</i>	S. E. Russia, S. Siberia (West)	Not yet checked	Not yet checked	Many trees	Trunks (wood)	VL – L	
4.415 [ <i>Megachile albidula</i> ]	<i>Megachilidae</i>	Central Asia	Not yet checked	Not yet checked	<i>Robinia</i>	Leaves	VL – L	
4.416 [ <i>Megachile kongracensis</i> ]	<i>Megachilidae</i>	Uzbekistan, Tajikistan	Not yet checked	Not yet checked	<i>Robinia</i>	Leaves	VL – L	
4.417 [ <i>Sirex</i> (= <i>Paururus</i> ) <i>dux</i> ]	<i>Siricidae</i>	Transcaucasus	Not yet checked	Not yet checked	<i>Abies</i>	Trunks (wood)	VL – L	
4.418 <i>Sirex</i> (= <i>Paururus</i> ) <i>ermak</i> Semenov	<i>Siricidae</i>	Transbaikalia, S. Far East	Not yet checked	Not yet checked	<i>Larix, Picea, Pinus</i>	Trunks (wood)	VL – M	
4.419 [ <i>Sirex</i> (= <i>Paururus</i> ) <i>tianshanicus</i> ]	<i>Siricidae</i>	Kazakhstan; Kyrgyzstan	Not yet checked	Not yet checked	<i>Picea schrenkiana</i>	Trunks (wood)	VL – L	
4.420 [ <i>Sirex antennatus</i> ]	<i>Siricidae</i>	S. Far East	Not yet checked	Japan	<i>Picea, Abies</i>	Trunks (wood)	VL – M	
4.421 [ <i>Sirex sah</i> ]	<i>Siricidae</i>	S. E. Russia; Transcaucasus; Ukraine; Central Asia (mountains)	Not yet checked	Iran	<i>Populus</i>	Trunks (wood)	VL – L	
4.422 [ <i>Xoanon mysta</i> ]	<i>Siricidae</i>	S. Far East	Not yet checked	Not yet checked	<i>Pinus koraiensis</i>	Trunks (wood)	VL – L	
4.423 <i>Sirex</i> (= <i>Xanthosirex</i> ) <i>tardigradus</i> (= <i>S. cedrorum</i> = <i>X. phantasma</i> )	<i>Siricidae</i>	N. E. Russia; Transcaucasus, N. E. Siberia, S. Siberia (East), Transbaikalia, S. Far East; Transcaucasus	Not yet checked	Not yet checked	<i>Pinus</i>	Trunks (wood)	VL – M	
4.424 [ <i>Cladius populi</i> ]	<i>Tenthredinidae</i>	S. Far East	Not yet checked	Japan	<i>Populus</i>	Leaves	VL – L	
4.425 [ <i>Heterarthrus</i> (= <i>Phyllotoma</i> ) <i>flavicornis</i> ]	<i>Tenthredinidae</i>	Transcaucasus	Not yet checked	Not yet checked	<i>Acer</i>	Leaves	VL – L	
4.426 <i>Eriocampa mitsukurii</i>	<i>Tenthredinidae</i>	S. Far East	Not yet checked	China, Japan	<i>Alnus</i>	Leaves	VL – L	
4.427 [ <i>Xiphydria eborata</i> ]	<i>Xiphydriidae</i>	S. Far East	Not yet checked	Japan	<i>Pinus, Picea</i>	Trunks (wood)	VL – M	

**Table 4. INSECTS**

## HYMENOPTERA &amp; LEPIDOPTERA

4.428	<i>[Xiphydria picta]</i>	<i>Xiphydriidae</i>	C. E. Russia, S. E. Russia; Belarus; Ukraine; Transcaucasus	Not yet checked	Europe, Japan	<i>Alnus</i>	Trunks (wood)	VL – L	
4.429	<i>[Xiphydria popovi]</i>	<i>Xiphydriidae</i>	N. E. Siberia, S. Siberia (East), Transbaikalia, S. Far East	Not yet checked	Japan	<i>Betula</i>	Trunks (wood)	VL – L	
<i>Lepidoptera</i>									
4.430	<i>[Captoloma iterorata]</i>	<i>Arctiidae</i>	S. Far East	Not yet checked	Japan, Koreas	<i>Quercus</i>	Leaves	VL – L	
4.431	<i>[Rhyparioides amurensis]</i>	<i>Arctiidae</i>	S. Far East	Not yet checked	China, Japan	<i>Ulmus, Malus,</i> other trees	Leaves	VL – M	
4.432	<i>[Argyresthia (= Argyrestia) fundella f. albicornis]</i>	<i>Hyponomeutidae</i>	S. Far East, N. Far East	Not yet checked	Not yet checked	<i>Abies, Picea</i>	Needles	VL – M	
4.433	<i>Argyresthia (= Argyrestia) fundella</i>	<i>Hyponomeutidae</i>	C. E. Russia, N. E. Russia; Belarus	Not yet checked	North, middle and south Europe	<i>Abies, Picea</i>	Needles	VL – M	
4.434	<i>[Brahmaea certhia]</i>	<i>Brahmaeidae</i>	S. Far East	Not yet checked	China, Koreas	<i>Fraxinus,</i> <i>Syringa</i>	Leaves	VL – L	
4.435	<i>[Brahmaea christophii]</i>	<i>Brahmaeidae</i>	Azerbaijan	Not yet checked	Iran	<i>Fraxinus,</i> <i>Syringa</i>	Leaves	VL – L	
4.436	<i>[Holcocerus vicarious]</i>	<i>Cossidae</i>	S. Far East	Not yet checked	China, Japan	<i>Populus</i>	Trunks (wood)	VL – L	
4.437	<i>[Drepana scabiosa]</i>	<i>Drepanidae</i>	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L	
4.438	<i>Epicopeia mencia (= E. albofasciata)</i>	<i>Epicopeiidae</i>	S. Far East	Not yet checked	China, Koreas	<i>Ulmus</i>	Leaves	VL – L	
4.439	<i>Dichomeris (= Ypsolopha = Hypsolophus) ustulella</i>	<i>Gelechiidae</i>	S. E. Russia, S. Far East, N. Far East; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Betula,</i> <i>Corylus,</i> <i>Carpinus</i>	Leaves	VL – L	
4.440	<i>[Abraxas orientalis]</i>	<i>Geometridae</i>	S. Far East	Not yet checked	China, Japan, Koreas	<i>Ulmus, Salix</i>	Leaves	VL – M	
4.441	<i>[Bupalus cembraria]</i>	<i>Geometridae</i>	S. Far East	Not yet checked	Not yet checked	<i>Pinus pumila</i>	Needles	VL – L	
4.442	<i>[Bupalus vestalis]</i>	<i>Geometridae</i>	S. Far East	Not yet checked	Not yet checked	<i>Pinus koraiensis</i>	Needles	VL – L	
4.443	<i>[Cidaria comis]</i>	<i>Geometridae</i>	S. Far East	Not yet checked	China, Japan	<i>Abies nephrolepis</i>	Needles	VL – L	
4.444	<i>[Cidaria djaconovi]</i>	<i>Geometridae</i>	S. Far East	Not yet checked	Not yet checked	<i>Picea ajanensis</i>	Needles	VL – L	
4.445	<i>[Comibaena tenuisaria]</i>	<i>Geometridae</i>	S. Far East	Not yet checked	Not yet checked	<i>Quercus mongolica</i>	Leaves	VL – L	

**Table 4. INSECTS**

## LEPIDOPTERA

4.446	<i>[Eilicrinia subcordaria]</i>	Geometridae	S. E. Russia; Kazakhstan; Central Asia	Not yet checked	Not yet checked	<i>Betula</i> , other deciduous	Leaves	VL – L	
4.447	<i>[Erannis (= Hybernia) golda]</i>	Geometridae	S. Far East	Not yet checked	Japan	<i>Ulmus</i> , <i>Tilia</i> , fruit trees	Leaves	VL – M	
4.448	<i>[Garaeus mirandus mirificus]</i>	Geometridae	S. Far East	Not yet checked	Japan	<i>Picea ajanensis</i>	Needles	VL – L	
4.449	<i>[Hipparchus dieckmanni]</i>	Geometridae	S. Far East	Not yet checked	Japan, Koreas	<i>Quercus</i>	Leaves	VL – L	
4.450	<i>[Hipparchus glaucaria]</i>	Geometridae	S. Far East	Not yet checked	Japan	<i>Quercus mongolica</i>	Leaves	VL – L	
4.451	<i>[Hypomecis (= Boarmia) angulifera]</i>	Geometridae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Abies</i> , <i>Picea</i>	Needles	VL – M	
4.452	<i>[Naxa seriaria]</i>	Geometridae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Syringa</i> , <i>Fraxinus manshurica</i>	Leaves	VL – M	
4.453	<i>Arlognophos (= Boarmia) amoenaaria</i>	Geometridae	S. Far East	Not yet checked	Not yet checked	<i>Picea</i> , <i>Abies</i>	Needles	VL – L	
4.454	<i>Odontoptera (= Gonodontis) bidentata</i>	Geometridae	N. E. Russia, C. E. Russia, S. E. Russia, S. Siberia, Transbaikalia, S. Far East; Belarus; Ukraine; Kazakhstan; Central Asia	Not yet checked	Not yet checked	<i>Populus</i> (incl. <i>P. tremula</i> ), <i>Quercus</i> , <i>Alnus</i> , <i>Betula</i> , <i>Prunus</i>	Leaves	VL – L	
4.455	<i>Zethenia rufescentaria (= Z. consociaria)</i>	Geometridae	S. Far East	Not yet checked	Japan	<i>Picea ajanensis</i>	Needles	VL – L	
4.456	<i>[Gracillaria (= Coloptilia) mandschurica]</i>	Gracillariidae	S. Far East	Not yet checked	Not yet checked	<i>Quercus</i>	Leaves	VL – M	
4.457	<i>[Phyllonorycter (= Lithocolletis) pruinosaella]</i>	Gracillariidae	Central Asia	Not yet checked	Not yet checked	<i>Salix</i> , <i>Populus</i> , mainly <i>P. pruinosa</i>	Leaves	VL – L	
4.458	<i>Cameraria (= Lithocolletis) obliquifascia</i>	Gracillariidae	Central Asia	Not yet checked	Not yet checked	<i>Populus</i> , <i>Salix</i>	Leaves	VL – M	
4.459	<i>Lithocolletis populi</i>	Gracillariidae	Central Asia	Not yet checked	Not yet checked	<i>Populus</i> , mainly <i>P. alba</i>	Leaves	VL – M	
4.460	<i>[Phylloconistis extrematrix]</i>	Gracillariidae (= Phylloconistidae)	C. E. Russia, S. E. Russia	Not yet checked	Not yet checked	<i>Populus</i>	Leaves	VL – M	
4.461	<i>[Phylloconistis xenia]</i>	Gracillariidae (= Phylloconistidae)	Central Asia	Not yet checked	Not yet checked	<i>Populus</i>	Leaves	VL – M	
4.462	<i>Endoclita (= Phassus) excrescens</i>	Hepialidae	S. Far East	Not yet checked	Japan	<i>Fraxinus mandshurica</i>	Trunks (wood)	VL – M	Main damage – to young trees

**Table 4. INSECTS**

LEPIDOPTERA								
4.463	[ <i>Bhima eximia</i> ]	Lasiocampidae	S. Far East	Not yet checked	Not yet checked	<i>Ostrya</i> , <i>Quercus</i> , <i>Carpinus</i>	Leaves	VL – L
4.464	[ <i>Bhima idiota</i> ]	Lasiocampidae	S. Far East	Not yet checked	Not yet checked	<i>Populus</i> , <i>Padus</i> , other trees	Leaves	VL – L
4.465	<i>Dendrolimus pini</i> [= <i>D. segregatus</i> ]	Lasiocampidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Pinus funebris</i>	Needles	VL – L
4.466	[ <i>Dendrolimus undans</i> ]	Lasiocampidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Rosaceae</i> , <i>Juglans</i> , <i>Quercus</i> , <i>Salix</i> , other trees	Leaves	VL – L
4.467	[ <i>Epicnaptera arborea</i> ]	Lasiocampidae	N. E. Russia, C. E. Russia	Not yet checked	Not yet checked	<i>Betula</i> , <i>Populus</i> , other trees, <i>Quercus</i>	Leaves	VL – L
4.468	[ <i>Eriogaster neogenae</i> ]	Lasiocampidae	S. E. Russia, S. Siberia; Transcaucasus	Not yet checked	Not yet checked	<i>Caragana</i> , <i>Cytisus</i> , <i>Robinia</i>	Leaves	VL – M
4.469	<i>Eriogaster henkei</i>	Lasiocampidae	Central Asia	Not yet checked	Not yet checked	Deciduous	Leaves	VL – L
4.470	<i>Paralebeda plagifera</i>	Lasiocampidae	S. Far East	Not yet checked	India	<i>Phellodendron</i> , <i>Quercus</i> , <i>Corylus</i> , <i>Tilia</i> , <i>Rosaceae</i> , other trees	Leaves	VL – L
4.471	<i>Monema (=Miresa) flavaescens</i>	Limacodidae (= Heterogeneidae)	S. Far East	Not yet checked	China, Japan, Koreas	<i>Rosacea</i> , <i>Ulmus</i> , <i>Corylus</i> , other deciduous	Leaves	VL – M
4.472	<i>Parasa consocia</i>	Limacodidae (= Heterogeneidae)	S. Far East	Not yet checked	Japan, Koreas	Many deciduous	Leaves	VL – M
4.473	<i>Parasa hilarata</i>	Limacodidae (= Heterogeneidae)	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i> , <i>Betula</i> , other deciduous	Leaves	VL – M
4.474	<i>Parasa sinica</i>	Limacodidae (= Heterogeneidae)	S. Far East	Not yet checked	China, Japan, Koreas	Many deciduous	Leaves	VL – M
4.475	[ <i>Niphanda fusca</i> ]	Lycaenidae	S. Far East	Not yet checked	Japan	<i>Quercus</i> <i>mongolica</i>	Leaves	VL – L
4.476	[ <i>Thecla (= Zephyrus) attilia</i> ]	Lycaenidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i> <i>mongolica</i>	Leaves	VL – L
4.477	[ <i>Thecla (= Zephyrus) brilliantine</i> ]	Lycaenidae	S. Far East	Not yet checked	China, Koreas	<i>Quercus</i> <i>mongolica</i>	Leaves	VL – L
4.478	[ <i>Thecla (= Zephyrus) lutea</i> ]	Lycaenidae	S. Far East	Not yet checked	Japan	<i>Quercus</i> <i>mongolica</i>	Leaves	VL – L
4.479	[ <i>Thecla (= Zephyrus) oberthuri</i> ]	Lycaenidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i>	Leaves	VL – L

**Table 4. INSECTS**

LEPIDOPTERA								
4.480	[ <i>Thecla</i> (= <i>Zephyrus</i> ) <i>orientalis</i> ]	Lycaenidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus</i>	Leaves	VL – L
4.481	[ <i>Thecla</i> (= <i>Zephyrus</i> ) <i>raphaelis</i> ]	Lycaenidae	S. Far East	Not yet checked	China, Koreas	<i>Fraxinus manshurica</i>	Leaves	VL – L
4.482	[ <i>Thecla</i> (= <i>Zephyrus</i> ) <i>saphirina</i> ]	Lycaenidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L
4.483	[ <i>Thecla</i> (= <i>Zephyrus</i> ) <i>signata</i> ]	Lycaenidae	S. Far East	Not yet checked	China	<i>Quercus mongolica</i>	Leaves	VL – L
4.484	[ <i>Thecla</i> (= <i>Zephyrus</i> ) <i>smaragdina</i> ]	Lycaenidae	S. Far East	Not yet checked	China, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L
4.485	[ <i>Canna malachitis</i> ]	Lymantriidae	S. Far East	Not yet checked	China	<i>Tilia</i>	Leaves	VL – L
4.486	[ <i>Colocasia</i> (= <i>Calocasia</i> ) <i>mus</i> ]	Lymantriidae	S. Far East	Not yet checked	China, Japan	<i>Betula, Alnus</i>	Leaves	VL – L
4.487	[ <i>Euproctis</i> (= <i>Artaxa</i> ) <i>niphonis</i> ]	Lymantriidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Carpinus, Ostrya</i>	Leaves	VL – L
4.488	[ <i>Gynaephora lugens</i> ]	Lymantriidae	N. Siberia, N. Far East	Not yet checked	Not yet checked	<i>Betula, Salix, other trees</i>	Leaves	VL – L
4.489	[ <i>Leucoma</i> (= <i>Arctonia</i> ) <i>alba</i> ]	Lymantriidae	S. Far East	Not yet checked	China, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L
4.490	[ <i>Leucoma</i> <i>flavo-sulfurea</i> Ersch.] !	Lymantriidae	Kazakhstan, Central Asia	Not yet checked	Not yet checked	<i>Populus</i>	Leaves	L – H
4.491	[ <i>Olene olga</i> ]	Lymantriidae	S. Far East	Not yet checked	Not yet checked	<i>Padus, Corylus, Acer</i>	Leaves	VL – L
4.492	<i>Calliteara</i> (= <i>Dasychira</i> ) <i>lunulata</i>	Lymantriidae	S. Far East	Not yet checked	China, Japan	<i>Quercus, Castanea, other trees</i>	Leaves	VL – L
4.493	<i>Calliteara</i> (= <i>Dasychira</i> ) <i>pseudabietis</i>	Lymantriidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Cryptomeria, other trees</i>	Leaves	VL – L
4.494	<i>Euproctis</i> (= <i>Nygma</i> ) <i>piperita</i>	Lymantriidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L
4.495	<i>Euproctis</i> (= <i>Artaxa</i> ) <i>subflava</i>	Lymantriidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus, Castanea, other trees</i>	Leaves	VL – L
4.496	<i>Leucoma candida</i>	Lymantriidae	N. E. Siberia, S. Siberia, Transbaikalia, N. Far East, S. Far East	Not yet checked	China, Japan, Koreas, Mongolia	<i>Populus</i> (incl. <i>P. tremula</i> )	Leaves	VL – M
4.497	<i>Numens</i> (= <i>Numenes</i> ) <i>disparilis</i>	Lymantriidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Carpinus, Ostrya</i>	Leaves	VL – L
4.498	[ <i>Amphipyra schrenki</i> ]	Noctuidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Betula davurica</i>	Leaves	VL – L
4.499	[ <i>Aucha</i> <i>flavomaculata</i> ]	Noctuidae	S. Far East	Not yet checked	China, Japan	<i>Quercus, Tilia</i>	Leaves	VL – L

**Table 4. INSECTS**

LEPIDOPTERA								
4.500	[ <i>Catocala</i> (= <i>Ephesia</i> ) <i>dissimilis</i> ]	Noctuidae	S. Far East	Not yet checked	Japan	<i>Quercus mongolica</i>	Leaves	VL – L
4.501	[ <i>Catocala</i> (= <i>Ephesia</i> ) <i>praegnax</i> ]	Noctuidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L
4.502	[ <i>Catocala</i> (= <i>Ephesia</i> ) <i>streckeri</i> ]	Noctuidae	S. Far East	Not yet checked	Not known	<i>Quercus mongolica</i>	Leaves	VL – L
4.503	[ <i>Catocala</i> (= <i>Marmonia</i> ) <i>dula</i> ]	Noctuidae	S. Far East	Not yet checked	Japan	<i>Quercus mongolica</i>	Leaves	VL – L
4.504	[ <i>Catocala lara</i> ]	Noctuidae	S. Far East	Not yet checked	Japan	<i>Tilia</i>	Leaves	VL – L
4.505	[ <i>Chasminodes</i> (= <i>Leocyma</i> ) <i>albonitens</i> ]	Noctuidae	S. Far East	Not yet checked	Japan, Koreas	<i>Tilia</i>	Leaves	VL – L
4.506	[ <i>Cosmia</i> (= <i>Calymnia</i> ) <i>campostigma</i> ]	Noctuidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L
4.507	[ <i>Cosmia</i> (= <i>Calymnia</i> ) <i>moderata</i> ]	Noctuidae	S. Far East	Not yet checked	Not known	<i>Quercus, Tilia</i>	Leaves	VL – L
4.508	[ <i>Cosmia</i> (= <i>Calymnia</i> ) <i>ulmivora</i> ]	Noctuidae	Central Asia (mountains)	Not yet checked	Not known	<i>Ulmus</i>	Leaves	VL – L
4.509	[ <i>Cosmia imbuta</i> ]	Noctuidae	S. E. Russia	Not yet checked	Not yet checked	<i>Populus</i>	Leaves	VL – L
4.510	[ <i>Pangrapta vasava</i> ]	Noctuidae	S. Far East	Not yet checked	Japan	<i>Ulmus</i>	Leaves	VL – L
4.511	[ <i>Xanthia gilvago</i> ]	Noctuidae	S. E. Russia, S. Siberia; Central Asia; Transcaucasus	Not yet checked	Not yet checked	<i>Populus, Ulmus</i>	Inflorescences	VL – L
4.512	<i>Cosmia</i> (= <i>Calymnia</i> ) <i>subtilis</i>	Noctuidae	Central Asia (mountains)	Not yet checked	Not known	<i>Rosaceae, Populus</i>	Leaves	VL – M
4.513	<i>Thyas</i> (= <i>Lagoptera</i> = <i>Dermaleipa</i> ) <i>juno</i>	Noctuidae	S. Far East	Not yet checked	China, Japan, Koreas, Malaya	<i>Betula, Prunus &amp; other trees</i>	Leaves	VL – L
4.514	[ <i>Acronicta catocaloidea</i> ]	Noctuidae (= Lymantriidae)	S. Far East	Not yet checked	Japan	<i>Quercus mongolica</i>	Leaves	VL – L
4.515	[ <i>Acronicta hercules</i> ]	Noctuidae (= Lymantriidae)	S. Far East	Not yet checked	China, Japan	<i>Ulmus</i>	Leaves	VL – L
4.516	<i>Acronicta intermedia</i> (= <i>A. incretata</i> )	Noctuidae (= Lymantriidae)	S. Far East	Not yet checked	China, Japan, Koreas	<i>Fagus, Alnus, Rosaceae</i>	Leaves	VL – L
4.517	<i>Acronicta lutea</i>	Noctuidae (= Lymantriidae)	S. Siberia, Transbaikalia, S. Far East	Not yet checked	China, Japan, Koreas, Mongolia	<i>Populus, Carpinus</i>	Leaves	VL – L
4.518	[ <i>Nola fumosa</i> ]	Noctuidae (= Arctiidae)	S. Far East	Not yet checked	Japan, Koreas	<i>Quercus</i>	Leaves	VL – L
4.519	[ <i>Earias pudicana</i> <i>pupillana</i> ]	Noctuidae (= Cymbidae)	S. Far East	Not yet checked	China, Japan	<i>Populus</i>	Leaves	VL – L
4.520	<i>Earias turana</i>	Noctuidae (= Cymbidae)	Central Asia	Not yet checked	Not known	<i>Salix</i>	Leaves	VL – L
4.521	<i>Nycteola</i> (= <i>Sarrothripus</i> ) <i>asiatica</i>	Noctuidae (= Cymbidae)	Central Asia	Not yet checked	Not known	<i>Populus, Salix</i>	Leaves	VL – L

**Table 4. INSECTS**

LEPIDOPTERA								
4.522	[ <i>Raphia approximata</i> ]	Noctuidae (=Lymantriidae)	Kazakhstan, Central Asia	Not yet checked	Not yet checked	<i>Populus</i>	Leaves	VL – L
4.523	[ <i>Acronicta megacephala</i> (=Subacronicta centralis)]	Noctuidae (=Lymantriidae)	Kazakhstan, Central Asia	Not yet checked	Iran, China	<i>Populus, Salix</i>	Leaves	VL – L
4.524	[ <i>Cerura (= Harpyia) lanigera</i> ]	Notodontidae	S. Siberia, Transbaikalia, S. Far East; Georgia	Not yet checked	Japan, Koreas	<i>Populus</i> (esp. <i>P. tremula</i> ), <i>Salix</i>	Leaves	VL – M
4.525	[ <i>Cerura aeruginosa</i> ]	Notodontidae	S. E. Russia, S. Siberia; Kazakhstan; Central Asia	Not yet checked	Not yet checked	<i>Salix</i>	Leaves	VL – L
4.526	[ <i>Clostera (= Pygaera) curtuloides</i> ]	Notodontidae	S. Far East	Not yet checked	Not known	<i>Populus tremula</i>	Leaves	VL – L
4.527	[ <i>Cnethodonta grisescens</i> ]	Notodontidae	S. Far East	Not yet checked	Japan	<i>Ulmus, Tilia</i>	Leaves	VL – L
4.528	[ <i>Dicranura (= Cerura = Harpyia) przewalskii</i> ]	Notodontidae	Central Asia	Not yet checked	Not yet checked	<i>Salix, Populus</i>	Leaves	VL – M
4.529	[ <i>Lophocosma atriplaga</i> ]	Notodontidae	S. Far East	Not yet checked	Japan, Koreas	<i>Corylus, Ostrya, Carpinus</i>	Leaves	VL – L
4.530	[ <i>Nadata splendida</i> ]	Notodontidae	S. Far East	Not yet checked	China, Japan, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L
4.531	[ <i>Notodonta dembovskii</i> ]	Notodontidae	S. Far East	Not yet checked	Japan	<i>Betula</i>	Leaves	VL – L
4.532	[ <i>Phalerodonta bombycinia</i> ]	Notodontidae	S. Far East	Not yet checked	Japan, Koreas	<i>Quercus mongolica</i>	Leaves	VL – L
4.533	[ <i>Pterostoma grisea</i> ]	Notodontidae	S. Far East	Not yet checked	Not known	<i>Populus tremula, Maackia amurensis</i>	Leaves	VL – L
4.534	[ <i>Ptilodon (= Lophopteryx) suturata</i> ]	Notodontidae	S. Far East	Not yet checked	China, Japan	<i>Acer barbinerve</i>	Leaves	VL – L
4.535	[ <i>Spatialia (= Spatialia) dives</i> ]	Notodontidae	S. Far East	Not yet checked	China, Japan	<i>Quercus mongolica</i>	Leaves	VL – L

**Forest pests on the territories of the former USSR**

As part of a broader programme of analysis of the risk of forest pests in the former USSR to other parts of EPPO region, the EPPO Secretariat has made a collection of information concerning the pests of forest trees in the former USSR. The table first presented at the Panel meeting in Helsinki (2000-02-8/10) and then in Perm' (2000-07-04/07), Paris (2001-03-13/15), Zagreb (2001-07-03/05), Vilnius (2002-03-12/14), Paris (2002-09-24/26), Riga (2003-04-01/04), Venezia (IT, 2003-10-1/3) and Grisslehamn (SE, 2004-09-27/29) was divided into 10 tables: (1) the most important (for non-European part of the EPPO region) pests for which PRA was performed by the Panel; (2) forest pests causing significant damage on the territory of the former USSR (intended to be included into the PQR system), for which either more information is needed, or for which pathways do not at present exist, or whose host plants are not of importance for Central and Western Europe; (3a) less important (for non-European part of the EPPO region) pests which are present in Central/Western Europe; (3b) forest pests causing significant damage on the territory of the former USSR, which may present risk only or mainly to plants, which are not considered as forest trees and shrubs in most of the non-Asian part of the EPPO region; (4) pests causing significant damage on the territory of the former USSR added to the data base and not yet prioritised; (5) first priority (for non-European part of the EPPO region) forest diseases; (6) forest diseases, for which more information is needed; (7a) forest diseases causing significant damage on the territory of the former USSR, but which are already present in other parts of the EPPO region; (7b) forest diseases causing significant damage on the territory of the former USSR, which may present risk only or mainly to plants, which are not considered as forest trees and shrubs in most of the non-Asian part of the EPPO region; (8) forest diseases causing significant damage on the territory of the former USSR added to the data base and not yet prioritised. The information is presented in the form of tables which, it is intended, will finally include all recorded forest pests. The data has been obtained mainly from a study of the major forestry publications in the Russian language, and continue by an analysis of regionally-oriented literature in order to ensure that those pests are included that may be of concern to only a relatively small part of this large geographic area or that may attack host plants of minor importance.

The further continuation of this programme will be to prioritize these pests into categories of importance as potential quarantine pests to the rest of EPPO region; thereafter, more detailed information will be collected about the priority pests in order to perform PRAs to decide whether these pests should be quarantine pests and what measures should be taken to prevent their introduction.

Structure of the table

The table is arranged in order of the following pest groups, insects, mites, nematodes, fungi and bacteria, and then subdivided according to the taxonomy of the groups. It presents the identity of each pest, with the scientific name, (as verified by the Arthropod Name Index (ANI) data base of CABI, or the EPPO Plant Protection Thesaurus), as well as the name generally used in Soviet literature (placed in square brackets).

Information on distribution of the pest covers distribution in the former USSR and distribution in other countries. The distribution in the former USSR covers the fifteen Soviet Socialist Republics (Armenia, Azerbaijan, Belarus, Estonia, Georgia, Kazakhstan, Kyrgyzstan, Latvia, Lithuania, Moldova, Russian Federation, Tadzhikistan, Turkmenistan, Ukraine and Uzbekistan). In this report, because of its large geographic area, the Russian Federation is subdivided into the following arbitrary units, which do not correspond exactly with the administrative subdivisions<sup>1</sup> (see Figure 1):

1. **North European Russia** (N.E.Russia) – republics of Karelia and Komi; oblast's of Arkhangel'sk and Murmansk;
2. **Central European Russia** (C.E.Russia) – republics of Bashkiria, Chuvashia, Mari, Mordovia, Tatarstan and Udmurtia; oblast's of Bryansk, Vladimir, Gor'ki, Ivanovo, Kaliningrad, Kaluga, Kirov, Kostroma, Leningrad, Lipetsk, Moscow, Novgorod, Oryol, Penza, Perm', Ryasan', Smolensk, Tambov, Tula, Tver', Ulianovsk, Vologda and Yaroslavl';
3. **South European Russia** (S.E.Russia) – krays of Krasnodar and Stavropol'; republics of Chechnya, Dagestan, Kabardino-Balkaria, Kalmykia and North Ossetia; oblast's of Astrakhan', Belgorod, Kursk, Nizhnii Novgorod, Orenburg, Rostov, Samara, Saratov, Volgograd and Voronezh;
4. **North – Western Siberia** (N.W.Siberia) – north-west of Krasnoyarsk kray; north of Tyumen' oblast';
5. **North – Eastern Siberia** (N.E.Siberia) – republic of Sakha; north-east of Krasnoyarsk kray;
6. **Southern Siberia** (S.Siberia) – republic of Tuva; Altay kray, south of Krasnoyarsk kray; oblast's of Chelyabinsk, Irkutsk, Kemerovo, Kurgan, Novossibirsk, Omsk, Sverdlovsk and Tomsk; south of Tyumen' oblast';
7. **Transbaikalia** (Transbaik.) – republic of Buryatia; oblast' of Chita;
8. **North of the Russian Far East** (N.FarEast) – oblast's of Kamchatka and Magadan;
9. **South of the Russian Far East** (S.FarEast) – krays of Khabarovsk and Primorie; oblast's of Amur and Sakhalin.

Also for convenience, some of the other Soviet Socialist Republics are grouped as follows:

**Baltic countries** – 3 countries: Estonia, Latvia and Lithuania and Kaliningrad oblast' of Russia;

**Central Asia** – 4 countries: Kyrgyzstan, Tadzhikistan, Turkmenistan and Uzbekistan;

**Transcaucasus** – 3 countries: Armenia, Azerbaijan and Georgia.

The table contains a column giving the main host genera, in order of host importance, and a column with the parts of the host plants that are damaged by the pest (e.g. fruits, seeds, leaves, trunks and branches, roots, cut wood). Then the economic significance of the pest damage in the areas of origin is given according to the following broad categories: **VH** – very high; **H** – high; **M** – medium; **L** – low; **VL** – very low, often with a range (e.g. L – H) showing differences in importance in different parts of the region. If the pest is regarded as a quarantine pest in another part of the world, this is noted in the next column. Finally, the last column presents some remarks concerning damage, host plants or vector status.

---

<sup>1</sup> Note that the Russian Federation is divided into territorial units each called either "republic", "oblast'" or "kray", the differences between these units depending on their level of autonomy.

**Figure 1. The area of the former USSR.**

Countries are shown by their two-letter country codes: AM – Armenia; AZ – Azerbaijan; BY – Belarus; EE – Estonia; GE – Georgia; KG- Kyrgyzstan; KZ – Kazakhstan; LT – Lithuania; LV – Latvia; MD – Moldova; RU – Russian Federation; TJ – Tajikistan; TM – Turkmenistan; UA – Ukraine; UZ – Uzbekistan. For the purposes of displaying pest distribution in this project, the Russian Federation is divided into nine sub-units (as described in the text).

**Table 1. INSECTS****COLEOPTERA****Table 1. Most important forest pests causing significant damage on the territory of their actual distribution for which PRA has been conducted**

Nº	Pest	Group of organisms	Distribution			Main host plants in the former USSR	Damaged parts of plants	Economic significance in the area of origin	Remarks						
			In the former USSR	In North America	In other countries

(2002) is present in the Far East of Russia	Introduced: Canada (Ontario: Essex county), USA (Michigan: Livingston, Macomb, Oakland, Monroe, Washtenaw and Wayne counties; Ohio: Lucas county)	North-eastern China (Jilin, Liaoning, Heilongjiang, Inner Mongolia, Hebei and Shandong Provinces), Japan, Korea Republic, Mongolia and Taiwan	<i>Fraxinus americana</i> , <i>F. chinensis</i> , <i>F. japonica</i> , <i>F. lanuginosa</i> , <i>F. mandshuriana</i> , <i>F. mandshurica</i> , <i>F. nigra</i> , <i>F. pennsylvanica</i> , <i>F. rhynchophylla</i> , <i>Juglans mandshurica</i> , <i>Pterocarya rhoifolia</i> , <i>Ulmus davidiana</i> and <i>U. propinqua</i> . No data is given on the susceptibility of ash species commonly growing in Europe (e.g. <i>F. excelsior</i> , <i>F. angustifolia</i> ).	Trunks (under bark)	M – H							
1.2	<i>Melanophila guttulata</i> Gebler (= <i>Phaenops guttulatus</i> Gebler = <i>Phaenops guttulata</i> Gebler = <i>Melanophila discopunctata</i> Fald. = <i>Melanophila fulvoguttata</i> Kerr. = <i>Phaenops fulvoguttata</i> Jacobs.) *	<i>Buprestidae</i>	Russia (Eastern half of European Russia, Siberia, Transbaikalia, Far East)	Absent	Absent, intercepted in 1985 in pine wood ( <i>Pinus sylvestris</i> ) imported from Russia to Finland	Attacks mainly larch ( <i>Larix sibirica</i> , <i>L. gmelinii</i> and other larch species), but also <i>Abies</i> ( <i>A. sibirica</i> , <i>A. sp.</i> ), <i>Picea</i> ( <i>P. abies</i> , <i>P. ajanensis</i> , <i>P. obovata</i> , <i>P. sp.</i> ), <i>Pinus</i> ( <i>P. sibirica</i> , <i>P. sylvestris</i> , <i>P. sp.</i> )	Trunks (under bark)	M – VH							

**Table 1. INSECTS**

COLEOPTERA									
1.3	<i>Aeolesthes sarta</i> Solsky **	<i>Cerambycidae</i>	Turkmenistan, Uzbekistan, Tajikistan, Kyrgyzstan (south)	Absent	India (Western Himalayas), Pakistan (north), Afghanistan, Iran	Many species of <i>Ulmus</i> , <i>Populus</i> , <i>Salix</i> , <i>Platanus</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Juglans</i> , <i>Quercus</i> , <i>Betula</i> , <i>Fraxinus</i> , <i>Acer</i> , <i>Morus</i> , <i>Gleditsia</i> , <i>Robinia</i> , <i>Elaeagnus</i> and many other hardwoods and fruit trees. Its preferred hosts are: <i>Ulmus</i> <i>minor</i> , <i>Ulmus pumila</i> , <i>Populus</i> <i>diversifolia</i> , <i>Populus euphratica</i> , <i>Populus talassica</i> , <i>Populus alba</i> , <i>Populus X euroamericana</i> , <i>Salix</i> <i>acmophylla</i> , <i>Salix turanica</i> , <i>Salix</i> <i>aongarica</i> , <i>Platanus orientalis</i> , <i>Platanus acerifolia</i> , <i>Malus pumila</i> and <i>Juglans regia</i> .	Trunks (wood)	M – VH	Main damage – in mountains and in city plantations
1.4	[ <i>Corymbia</i> <i>succedanea</i> L. (= <i>Leptura succedanea</i> L. = <i>Anoplodera</i> <i>succedanea</i> Lew.)] *	<i>Cerambycidae</i>	Russia (Transbaikalia, South Far East)	Absent	Northern China, Japan, Korea	All available of conifer species, but prefers <i>Pinus koraiensis</i> , <i>Pinus pumila</i> and <i>Picea</i> species ( <i>P. abies</i> , <i>P. ajanensis</i> , <i>P.</i> <i>obovata</i> , <i>P. sp.</i> )	Trunks (wood)	VL – L	
1.5	<i>Dokhtouroffia</i> (= <i>Dokhturovia</i> = <i>Dochturovia</i> ) <i>baeckmanni</i> Yankovskii *	<i>Cerambycidae</i>	Kyrgyzstan; Kazakhstan; Uzbekistan	Absent	Absent	Spruce and fir, especially <i>Picea</i> <i>schrenkiana</i> and <i>Abies semenovii</i>	Trunks (wood)	L – M	
1.6	<i>Hesperophanes</i> <i>campestris</i> (= <i>Trichoferus</i> <i>campestris</i> Faldermann = <i>Trichoferus</i> <i>turkestanicus</i> Heyden = <i>Trichoferus</i> <i>flavopubescens</i> Kolbe = <i>Trichoferus</i> <i>rusticus</i> Ganglbauer) **	<i>Cerambycidae</i>	Armenia (recently), southern Kazakhstan, Kyrgyzstan, Russia (south-east of European part - recently, Transbaikalia, Eastern Siberia, Far East), Tajikistan, Uzbekistan.	Absent	Japan, Northern China, Northern Korea, northern Mongolia	Attacks <i>Malus</i> ( <i>M. domestica</i> , <i>M.</i> <i>sp.</i> ), <i>Morus</i> , <i>Sorbus</i> (= <i>Micromeles</i> ) <i>alnifolia</i> , <i>Astragalus</i> , <i>Gleditsia</i> , <i>Salix</i> , <i>Betula</i> , <i>Broussonetia paprifera</i> and other fruit and deciduous trees, preferring mainly <i>Malus</i> and <i>Morus</i> , may attack cut wood of <i>Picea</i> ( <i>P. schrenkiana</i> ) and <i>Pinus</i>		L – H	
1.7	<i>Monochamus</i> <i>impluviatus</i> Motschulsky *	<i>Cerambycidae</i>	N.E.Russia (East), C.E.Russia (East), N.E.Siberia, N.W. Siberia, S.Siberia, Transbaikalia, S.Far East	Absent	Northern Mongolia; Northern China; Japan; Korea	Attacks all available species of coniferous in its natural area ( <i>Larix</i> , <i>Pinus</i> , <i>Picea</i> , <i>Abies</i> and others), but prefers <i>Larix</i> ( <i>L.</i> <i>gmelinii</i> , <i>L. sibirica</i> , <i>L. sp.</i> ) and <i>Pinus sibirica</i>	Trunks (wood)	L – M	

**Table 1. INSECTS**

COLEOPTERA								
1.8	<i>Tetropium gracilicorne</i> Reitter **	<i>Cerambycidae</i>	N.E. Siberia (introduced to Kamchatka where it spread rapidly and is now an important pest), N.W. Siberia, S. Siberia, S. Far East, Kazakhstan	Absent	Northern China, northern Japan (Hokkaido, Honshu), northern Mongolia, Koreas. In 1998 intercepted in Austria in larch wood originating from Siberia	All available species of spruce, fir, larch and pine, but prefers <i>Larix gmelinii</i> , <i>Larix sibirica</i> , <i>Pinus sibirica</i> , <i>P. koraiensis</i> , <i>P. sylvestris</i> , <i>Abies nephrolepis</i> , <i>Picea ajanensis</i>	Trunks (under bark)	L – H
1.9	<i>Tetropium staudingeri</i> Pic. (= <i>Tetropium tjanshanicum</i> Semenov = <i>Tetropium staudingeri</i> Pavilstshikov) *	<i>Cerambycidae</i>	Kyrgyzstan, Kazakhstan, Uzbekistan	Absent	Northwestern China	Attacks spruce, especially <i>Picea schrenkiana</i> . Many authors note only <i>Picea schrenkiana</i> as a host plant	Trunks (under bark)	L – M
1.10	[ <i>Turcmениgena</i> (= <i>Turkmenigena</i> ) <i>varentzovi</i> Melgunov] *	<i>Cerambycidae</i>	Kazakhstan, Turkmenistan, Uzbekistan	Absent	Absent	Attacks mainly saxauls, especially <i>Haloxylon aphyllum</i> and <i>H. persicum</i> , but also <i>Salsola</i> , especially <i>S. richteri</i>	Trunks and roots (under bark)	L – M
1.11	<i>Xylotrechus altaicus</i> Gebler (= <i>Xyloclytus altaicus</i> Gebler) ***	<i>Cerambycidae</i>	N. E. Siberia, N. W. Siberia, S. Siberia, N. Far East, Transbaikalia, S. Far East	Absent	Northern Mongolia	Attacks only larch: <i>Larix sibirica</i> , <i>L. gmelinii</i> , <i>L. olgensis</i> , <i>L. kamtschatica</i> , <i>L. x maritima</i> and other larch species present in its natural range	Trunks (wood)	L – H
1.12	<i>Xylotrechus namanganensis</i> Heyden **	<i>Cerambycidae</i>	Kyrgyzstan, Kazakhstan, Tajikistan, Turkmenistan, Uzbekistan.	Absent	Afghanistan, China, possibly Iran	<i>Juglans</i> , <i>Prunus</i> , <i>Malus</i> , <i>Morus</i> , <i>Crataegus</i> , <i>Elaeagnus</i> , <i>Populus</i> , <i>Ulmus</i> , <i>Celtis</i> , <i>Salix</i> , <i>Betula</i> , <i>Alnus</i> , <i>Platanus</i> , other deciduous trees	Trunks (wood)	L – H
1.13	<i>Agelastica alni orientalis</i> Baly (= <i>A. orientalis</i> Baly) *	<i>Chrysomelidae</i>	Kazakhstan (South-East); Kyrgyzstan; Uzbekistan, Tajikistan, Turkmenistan	Absent	China, Iran, possibly Afghanistan	Attacks <i>Salix</i> , <i>Populus</i> ( <i>P. alba</i> , <i>P. sp.</i> ), <i>Prunus dulcis</i> , <i>Malus</i> and <i>Betula</i>	Leaves	L – M
1.14	<i>Hylobius albosparsus</i> Boheman *	<i>Curculionidae</i>	Russia (North-East of the European part, Siberia, Transbaikalia, Far East, including Sakhalin, Kamchatka and Magadan)	Absent	China, Japan, Korea, Mongolia	Attacks all available species of conifers within its natural range, but prefers <i>Larix</i> ( <i>L. gmelinii</i> , <i>L. sibirica</i> , <i>L. lubarskii</i> , <i>L. olgensis</i> , <i>L. sp.</i> ), <i>Pinus</i> ( <i>P. sibirica</i> , <i>P. sylvestris</i> , <i>P. sp.</i> ) and <i>Picea</i> ( <i>P. abies</i> , <i>P. obovata</i> , <i>P. sp.</i> )	Trunks (under bark)	L – M
1.15	<i>Polyphylla</i> (= <i>Xerasiobia</i> ) <i>alba</i> Pallas (= <i>Polyphylla hololeuca</i> Pallas) *	<i>Scarabaeidae</i>	C.E.Russia, S.E.Russia, S. Siberia; Azerbaijan, Armenia, Georgia, Kazakhstan, North of Turkmenistan, Uzbekistan, Ukraine	Absent	Northern and central China (Dzungaria, Gobi desert, Guansi), Mongolia	Feeds on roots of many plants including forest trees. Among agricultural crops, the most often damages roots of fruit trees, grape wine, potato, beet and strawberry	Roots	L – M
								Main damage – to young plantations

**Table 1. INSECTS****COLEOPTERA**

1.16	<i>Ips golovjankoi</i> Pjatnitzkii ( <i>Orthotomicus</i> <i>golovjankoi</i> Pjatnitzkii) *	Scolytidae	N. E. Siberia, S. Siberia (East), Transbaik.; S. Far East	Absent	Northern China, northern Japan, northern Korea	Attacks pine, especially <i>Pinus koraiensis</i> , <i>P. sibirica</i> and <i>P. x funebris</i> , and spruce, especially <i>Picea ajanensis</i> and <i>P. obovata</i>	Trunks (under bark)	VL – L	
1.17	<i>Ips hauseri</i> Reitter **	Scolytidae	S. Siberia (Altai Kray); Kyrgyzstan, Kazakhstan, Tajikistan	Absent	Absent	Attacks spruce, pine and larch, especially <i>Picea schrenkiana</i> , <i>Larix sibirica</i> , <i>Pinus sylvestris</i> and <i>Pinus pallasiana</i>	Trunks (under bark)	M – H	Main damage – to forests in mountains
1.18	<i>Ips spessivtsevi</i> Lebedev (= <i>Pityogenes</i> <i>spessivtsevi</i> Lebedev = <i>Pityogenes</i> <i>perforosus</i> Bees.) *	Scolytidae	Kazakhstan, Kyrgyzstan, Tadzhikistan	Absent	Absent	Attacks spruce, especially <i>Picea schrenkiana</i>	Trunks (under bark)	M – H	
1.19	<i>Ips subelongatus</i> Motschulsky (= <i>Ips</i> <i>fallax</i> Egg.) **	Scolytidae	Russia (north-east of European Russia, all Siberia, Transbaikalia and Far East)	Absent	Northern Mongolia; Northern China	Attacks mainly larch: <i>Larix sibirica</i> , <i>L. gmelinii</i> , <i>L. olgensis</i> , and other larch species, but also <i>Pinus</i> ( <i>P. sylvestris</i> , <i>P. sibiricus</i> , <i>P. koraiensis</i> ), <i>Picea</i> , <i>Abies</i> and other coniferous present in its natural range	Trunks (under bark)	L – H	
1.20	<i>Scolytus morawitzi</i> Semenow (= <i>Eccoptogaster</i> <i>morawitzi</i> Semenow = <i>Scolytus pini</i> Eggers) **	Scolytidae	Russia (centre and north of European Russia, Southern Siberia, south of N. E. Siberia, south of N. W. Siberia, Transbaikalia, Far East)	Absent	Northern Mongolia	Attacks mainly larch: <i>L. gmelinii</i> , <i>L. olgensis</i> , <i>L. kamtschatica</i> , <i>Larix sibirica</i> , <i>L. x maritima</i> and other larch species present in its natural range, but also <i>Pinus sibiricus</i> , <i>P. koraiensis</i> and other coniferous	Trunks (under bark)	L – M	

**Table 1. INSECTS****DIPTERA & HOMOPTERA**

<b>Diptera</b>									
1.21	<i>Strobilomyia luteofovea</i> Fan & Fang (= <i>Lasiomma jurtschenkoi</i> Elberg)*	<i>Anthomyiidae</i>	S. Far East	Absent	Northeastern China	<i>Larix gmelini</i> , <i>L. olgensis</i> , and <i>L. cajanderi</i>	Cones and seeds	M - H	
1.22	<i>Strobilomyia viaria</i> Huckett (= <i>Lasiomma melaniola</i> Fan. = <i>Strobilomyia melaniola</i> Fan.) **	<i>Anthomyiidae</i>	N. E. Siberia, S. Siberia (Baikal area), Transbaikalia, N. Far East (Kamtchatka)	Widespread in Western Canada and USA	Northeastern (Lianoning, Jilin, Heilongjiang Inner Mongolia) and Central China	Attacks cones of larch species: <i>Larix gmelini</i> , <i>L. olgensis</i> , <i>L. principis-rupprechtii</i> , and <i>L. cajanderi</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
1.23	<i>Cecidomyia pumila</i> Mamaev*	<i>Cecidomyiidae</i>	N. Far East	Absent	China	<i>Pinus pumila</i> , may also occasionnally infest <i>Pinus sibirica</i>	Cones and Seeds	M-H	Data of Dr. Alain Roques
1.24	<i>Resseliella ingrica</i> Mamaev (= <i>Thomasiniana ingrica</i> Mamaev) *	<i>Cecidomyiidae</i>	C. E. Russia (Leningrad region), S. Siberia (Krasnoyarsk territory)	Absent	Absent	Infests cones of spruce, <i>Picea abies</i> and <i>P. obovata</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
<b>Homoptera</b>									
1.25	<i>Adelges lapponicus</i> Kholodkovskii (= <i>Chermes lapponicus</i> var. <i>praecox</i> Kholodkovskii = <i>Adelges laplanicus</i> Kholodkovskii) *	<i>Adelgidae</i>	N. E. Russia, C. E. Russia; Baltic countries; Belarus	Absent	Estonia (in parks), Finland, Kyrgyzstan (introduced)	Prefers <i>Picea abies</i> but may develop on <i>P. obovata</i> , <i>P. glauca</i> , <i>P. mariana</i> , <i>P. schrenkiana</i> , <i>P. pungens</i> , <i>P. ajanensis</i> and other spruce species	Young sprouts and needles	L - M	Main damage - to young trees in plantations and nurseries
1.26	<i>Ceroplastes japonicus</i> Green (= <i>Cerostegia japonicus</i> Green = <i>Ceroplastes floridensis</i> Comst. = <i>Ceroplastes floridensis</i> var. <i>japonicus</i> Green) *	<i>Coccidae</i>	S. E. Russia (introduced); Transcaucasus, Azerbaijan (introduced), Georgia including Adzharia and Abkhasia (introduced), China, Japan, Republic of Korea	Not yet checked	China, Japan, Republic Korea, New Zealand, Great Britain (introduced), south-eastern France (introduced), Italy (introduced), Slovenia (introduced)	Damages 95 to 121 plant species, prefers <i>Laurus nobilis</i> , <i>Diospyros kaki</i> , <i>Camellia sinensis</i> and <i>Morus</i> spp. Less preferable are <i>Prunus laurocerasus</i> , <i>Citrus reticulata</i> , <i>Citrus unshiu</i> and some other <i>Citrus</i> spp., then come <i>Malus</i> spp., <i>Magnolia</i> spp., <i>Poncirus trifoliata</i> , <i>Camellia</i> spp., <i>Pittosporum</i> , <i>Crataegus</i> spp.	Trunks, leaves & branches	L - H	<i>Coccidae</i>
1.27	<i>Ceroplastes sinensis</i> Del Guercio *	<i>Coccidae</i>	Southern Russia (introduced); Azerbaijan (introduced), Georgia including Adzharia and Abkhasia (introduced), Tajikistan (introduced), Uzbekistan (introduced)	Mexico, USA	Algeria, Australia, Benin, Brazil, China, Côte d'Ivoire, Egypt, France, Hawaii, India, Iran, Italy, Japan, Morocco, Mozambique, New Zealand, Portugal, Spain, Syria, Togo, Tunisia, Turkey, Viet Nam	Damages 30 to 137 species of plants. It prefers different <i>Citrus</i> species (especially <i>Citrus sinensis</i> ), <i>Punica granatum</i> , <i>Laurus nobilis</i> , <i>Diospyros kaki</i> , <i>Camellia sinensis</i> , <i>Eriobotrya japonica</i> , <i>Juglans regia</i> , <i>Prunus persica</i> , <i>Pyrus</i> spp. and many other plants. On herbaceous plants, the pest may develop only larvae of the first and the second stages.	Trunks, leaves & branches	L - H	<i>Coccidae</i>

**Table 1. INSECTS**

HOMOPTERA, HYMENOPTERA &amp; ISOPTERA

1.28	<i>Lepidosaphes ussuriensis</i> Borchsenius (=) <i>Paralepidosaphes ussuriensis</i> Borchsenius) **	Diaspididae	Russia (South of the Far East and Sakhalin)	Not known	Northern China, Japan (Hokkaido, Honshu)	Polyphagous pest, damaging <i>Ulmus</i> , <i>Alnus</i> , <i>Malus</i> , <i>Populus</i> , <i>Betula</i> , <i>Euonymus</i> , <i>Syringa</i> , and many other plants	Trunks & branches (on the bark)	L – M	Main damage - to young plants
<b>Hymenoptera</b>									
1.29	<i>Dryocosmus</i> (= <i>Biorhiza</i> ) <i>kuriphilus</i> Yasumatsu **	Cynipidae	Absent	USA. (south east: Georgia, Alabama, North Carolina and Tennessee)	China, Italy (Piedmont region, South of Cuneo province) Japan, Korea	Attacks <i>Castanea crenata</i> , <i>C. dentata</i> , <i>C. mollissima</i> , <i>C. sativa</i> and their hybrids. Infests also <i>C. seguini</i> in China, but not yet other wild North American species of <i>Castanea</i> : <i>C. pumila</i> and <i>C. alnifolia</i> , which are often grown adjacent to infested chestnuts	Twigs & nuts	L – M	
1.30	<i>Sirex ermak</i> Semenov-Tian-Shanskii (= <i>Paururus ermak</i> Semenov) **	Siricidae	N. W. Siberia, N. E. Siberia, S. Siberia, Transbaikalia, S. Far East (including Sakhalin island)	Absent	Not known. Possibly northern Mongolia and northern China	Attacks several species of <i>Larix</i> ( <i>L. gmelinii</i> , <i>L. sibirica</i> , preferred hosts, <i>L. sp.</i> ), <i>Picea</i> ( <i>P. ajanensis</i> , <i>P. obovata</i> , <i>P. sp.</i> ), <i>Pinus</i> ( <i>P. sibirica</i> , <i>P. sp.</i> ) and <i>Abies</i> ( <i>A. sibirica</i> , <i>A. sp.</i> )	Trunks (wood)	VL – M	
<b>Isoptera</b>									
1.31	<i>Anacanthotermes</i> (= <i>Hodotermes</i> = <i>Acanthotermes</i> ) <i>ahngerianus</i> Jacobson *	Termitidae	Kyrgyzstan, southern Kazakhstan, Tajikistan, Turkmenistan, Uzbekistan	Absent	Iran	Attacks all available kinds of wood (coniferous and deciduous) paper and cardboard, cotton textile and other materials containing cellulose; also may damage plastic materials: penopolyurethane, polyethylene, foam plastic, glass-fibre plastics, etc. Known to damage seeds and plants of <i>Haloxylon</i> sp., <i>Salsola</i> ( <i>S. richteri</i> , <i>S. gemmascens</i> , <i>S. arbuscula</i> , <i>S. dendroides</i> , <i>S. sp.</i> ), <i>Artemisia</i> ( <i>A. harba alba</i> , <i>A. kemrudica</i> , <i>A. sp.</i> ), <i>Alhagi persarum</i> , <i>Lagonychium farctum</i> , <i>Gossypium</i> sp., <i>Ephedra strobilacea</i> , <i>Astrogalus unifoliolatus</i> , <i>Euclidium syriacum</i> , <i>Carex pachistilis</i> , <i>Koelpinia linearis</i> , <i>Lepidium perfoliatum</i> , <i>Reaumuria</i> sp., <i>Malcolmia</i> sp., <i>Alyssum</i> sp., <i>Gramineae</i> , and some other	Wood	M – H	Main damage - to telegraph-poles, wood in buildings, etc.

**Table 1. INSECTS****ISOPTERA & LEPIDOPTERA**

1.32	<i>Anacanthotermes</i> (= <i>Hodotermes</i> = <i>Acanthotermes</i> ) <i>turkestanicus</i> Jacobson *	Termitidae	Tajikistan, Turkmenistan, Uzbekistan	Absent	Iran	Attacks all available kinds of wood (coniferous and deciduous) paper and cardboard, cotton textile and other materials containing cellulose; also may damage plastic materials: peno-polyurethane, polyethylene, foam plastic, glass-fibre plastics, etc. Known to damage seeds and plants of <i>Salsola dendroides</i> and <i>S. sp.</i> , <i>Alchagi persarum</i> , <i>Morus alba</i> , <i>Vitis vinifera</i> , <i>Malus domestica</i> , <i>Gleditsia</i> , <i>Gramineae</i> , cotton and some other	Wood	M – H	Main damage - to telegraph-poles, wood in buildings, etc.
<b>Lepidoptera</b>									
1.33	<i>Coleophora dahurica</i> Fal'kovich *	Coleophoridae	N.E. Siberia, S. Siberia (East), Transbaik., N. Far East, S. Far East	Absent	China, Mongolia	Attacks larch, especially <i>Larix gmelinii</i> , <i>L. sibirica</i> and <i>L. olgensis</i>	Needles	L – M	
1.34	<i>Erannis jacobsoni</i> Diakonoff (= <i>Hybernia jacobsoni</i> Diakonoff *)	Geometridae	N.E. Siberia (South), S. Siberia (East), Transbaik., N. Far East, S. Far East (South)	Absent	Mongolia	Attacks only larch, especially <i>Larix gmelinii</i> and <i>Larix sibirica</i>	Leaves	L – H	
1.35	<i>Phyllonorycter</i> (= <i>Lithocolletus</i> = <i>Phyllorycter</i> ) <i>issikii</i> Kumata *	Gracillariidae	C. E. Russia (introduced), S. E. Russia (introduced), S. Far East; Ukraine (introduced)	Absent	Korea, Japan, Lithuania (introduced), Czekia (introduced), Germany (introduced), Austria (introduced), Poland (introduced)	Make plicated mines in the lower side of leaves of <i>Tilia cordata</i> (preferred host), <i>T. amurensis</i> , <i>T. mandshurica</i> , <i>T. maximowicziana</i> and other <i>Tilia</i> , but also <i>Betula platyphylla</i>	Leaves	L – H	Main damage – in city plantations
1.36	<i>Dendrolimus sibiricus</i> Tschetverikov (= <i>D. superans sibiricus</i> Tschetverikov) (= <i>D. laricis</i> Tschetverikov) **	Lasiocampidae	N.E. Russia, C.E. Russia, N.E. Siberia, N.W. Siberia, S. Siberia, Transbaik., N. Far East, S. Far East; Kazakhstan	Absent	Northern China; Korea Democratic People's Republic, Korea Republic; Northern Mongolia	Attacks more than 20 species of <i>Abies</i> , <i>Pinus</i> , <i>Larix</i> , <i>Picea</i> and <i>Tsuga</i> . Develops on practically all coniferous species in its natural area but prefers <i>Abies sibirica</i> , <i>Abies nephrolepis</i> , <i>Pinus sibirica</i> , <i>Pinus koraiensis</i> , <i>Larix gmelinii</i> , <i>Larix sibirica</i> , <i>Picea ajanensis</i> , <i>Picea obovata</i>	Needles	H – VH	

**Table 1. INSECTS****LEPIDOPTERA**

1.37	<i>Dendrolimus superans</i> Butler (= <i>D. superans albolineatus</i> Butler = <i>Dendrolimus albolineatus</i> Matsumura = <i>Dendrolimus jezoensis</i> Matsumura = <i>Dendrolimus yezoensis</i> Matsumura = <i>Odonestis superans</i> Butler) **	Lasiocampidae	S. Far East (Sakhalin, Kuril islands)	Absent	Korea; Japan	Attacks many species of <i>Abies</i> , <i>Pinus</i> , <i>Larix</i> , <i>Picea</i> and <i>Tsuga</i> . Develops on practically all coniferous species in its natural area but prefers <i>Pinus pumila</i> , <i>Larix kamtschatica</i> , <i>Larix maritima</i> , <i>Picea ajanensis</i> and <i>Abies sachalinensis</i>	Needles	H – VH	
1.38	<i>Malacosoma parallela</i> Staudinger**	Lasiocampidae	Armenia, eastern Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, and Turkmenistan.	Absent	Northern Iran, Syria, Turkey	<i>Atraphaxis pyrifolia</i> , <i>Berberis integerrima</i> , <i>Cerasus verrucosa</i> , <i>Chaenomeles japonica</i> , <i>Cotoneaster acutiuscula</i> , <i>C. insignis</i> , <i>C. suavis</i> , <i>Crataegus hissarica</i> , <i>C. pontica</i> , <i>C. turkestanica</i> , <i>Cydonia oblonga</i> , <i>Fraxinus sogdiana</i> , <i>Hippophae rhamnoides</i> , <i>Juglans regia</i> , <i>Lonicera korolkowii</i> , <i>L. nummulariifolia</i> , <i>Malus domestica</i> , <i>M. sieversii</i> , <i>Myricaria bracteata</i> , <i>Populus alba</i> , <i>P. tremula</i> , <i>Prunus mahaleb</i> , <i>P. avium</i> , <i>P. armeniaca</i> , <i>P. bucharica</i> , <i>P. cerasus</i> , <i>P. divaricata</i> , <i>P. dulcis</i> , <i>P. padus</i> var. <i>pubescens</i> , <i>P. persica</i> , <i>Pyrus communis</i> , <i>Quercus boissieri</i> , <i>Q. macranthera</i> , <i>Q. robur</i> subsp. <i>robur</i> , <i>Ribes nigrum</i> , <i>R. rubrum</i> , <i>Rosa canina</i> , <i>R. corymbifera</i> , <i>R. kokanica</i> , <i>R. maracandica</i> , <i>Rubus idaeus</i> , <i>R. turkestanicus</i> , <i>Salix excelsa</i> , <i>S. tenuijulis</i> , <i>Sorbus persica</i> , <i>S. turkestanica</i> and <i>Ulmus</i> sp. The most important damage occurs on almond, oak and wild apple trees. Important damage also occurs on <i>Berberis</i> , <i>Chaenomeles</i> , <i>Cotoneaster</i> , <i>Crataegus</i> , <i>Cydonia</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Rosa</i> , <i>Salix</i> and <i>Sorbus</i> species. Other plants are damaged occasionally	Leaves	L – M	

**Table 1. INSECTS**

LEPIDOPTERA									
1.39	<i>Dasychira albodentata</i> Bremer *	Lymantriidae	N.E. Siberia (south), N.W. Siberia, S. Siberia (east), Transbaikalia, S. Far East	Absent	north of Mongolia, north of China	Attacks several species of <i>Larix</i> (mainly <i>Larix gmelinii</i> ), <i>Pinus</i> (mainly <i>Pinus sylvestris</i> , <i>Pinus pumila</i> and <i>Pinus koraiensis</i> ) and some other coniferous. Preferred hosts are <i>Larix gmelinii</i> and <i>Pinus sylvestris</i>	Needles	L – M	
1.40	<i>Euproctis</i> (= <i>Porthesia</i> ) <i>kargalika</i> Moore (= <i>Euproctis karghalica</i> Moore = <i>Porthesia karghalika</i> Strand = <i>Euproctis kargalica</i> Grum-Grzhimailo = <i>Porthesia flavosulphurea</i> Grum-Grzhimailo) *	Lymantriidae	S. Siberia (Altai Kray); Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan and Turkmenistan	Absent	Iran, China (north-west)	<i>Acer campestre</i> , <i>A. regelii</i> , <i>A. tataricum</i> , <i>A. turkestanicum</i> , <i>Alhagi</i> sp., <i>Atraphaxis pyrifolia</i> , <i>Betula pendula</i> , <i>Betula pubescens</i> , <i>Caragana arborescens</i> , <i>Cerasus verrucosa</i> , <i>Cotoneaster acutiuscula</i> , <i>C. insignis</i> , <i>C. suavis</i> , <i>Crataegus turcestanica</i> , <i>Cydonia oblonga</i> , <i>Elaeagnus angustifolia</i> , <i>Fragaria</i> sp., <i>Hippophae rhamnoides</i> , <i>Irga</i> sp., <i>Malus domestica</i> , <i>M. sieversii</i> , <i>Pistacia vera</i> , <i>Prunus armeniaca</i> , <i>P. avium</i> , <i>P. bucharica</i> , <i>P. cerasus</i> , <i>P. divaricata</i> , <i>P. dulcis</i> , <i>P. mahaleb</i> , <i>P. persica</i> , <i>Punica granatum</i> , <i>Pyrus bucharica</i> , <i>P. communis</i> , <i>Quercus</i> sp., <i>Rhucus coriaria</i> , <i>Ribes nigrum</i> , <i>R. rubrum</i> , <i>Robinia pseudoacacia</i> , <i>Rosa canina</i> , <i>R. corymbifera</i> , <i>R. kokanica</i> , <i>R. maracandica</i> , <i>Rubus caesius</i> , <i>R. idaeus</i> , <i>Rumex</i> sp., <i>Salix excelsa</i> , <i>S. tenuijulis</i> , <i>Spirea hypericifolia</i> , <i>Ulmus effusa</i> , <i>Ulmus foliacea</i> var. <i>campestris</i> . Other plants are damaged occasionally	Leaves	L – M	
1.41	<i>Lymantria</i> (= <i>Porthetria</i> = <i>Ocneria</i> ) <i>mathura</i> Moore (= <i>Lymantria aurora</i> Butler = <i>Lymantria fusca</i> Leech = <i>Lymantria mathura aurora</i> Butler) **	Lymantriidae	S. Far East (South)	Absent	China (Western and Northern), India (Northern), Nepal, Japan, Koreas, Pakistan	Attacks many species of <i>Quercus</i> , <i>Juglans</i> , <i>Malus</i> , <i>Ulmus</i> , <i>Tilia</i> , <i>Salix</i> , <i>Betula</i> , <i>Castanea</i> and other deciduous trees. Preferred hosts are: <i>Juglans mandshurica</i> , <i>Malus mandshurica</i> , <i>Quercus mongolica</i> , <i>Quercus dentata</i> , <i>Ulmus japonica</i> , <i>Ulmus macrocarpa</i> , <i>Ulmus pumila</i> , <i>Tilia amurensis</i> , <i>Tilia mandshurica</i> , <i>Tilia pekinensis</i> , <i>Tilia taquetii</i>	Leaves	L – M	

**Table 1. INSECTS****LEPIDOPTERA**

1.42	<i>Erschoviella</i> (= <i>Sarrothripus</i> = <i>Nycteola</i> ) <i>musculana</i> Ershov **	Noctuidae	Southern Kazakhstan, Kyrgyzstan, Uzbekistan, Tajikistan, Turkmenistan Kazakhstan; Central Asia	Absent	Probably Afghanistan and Iran	Wild and cultivated varieties <i>Juglans regia</i>	Leaves, sprouts & nuts	L - M	
1.43	<i>Sphinx</i> (= <i>Hyloicus</i> ) <i>morio</i> Rotsch. et Jord (= <i>H. laricis</i> Rozh.) *	Sphingidae	N. W. Siberia, N. E. Siberia, S. Siberia, N. Far East, S. Far East, Kazakhstan	Absent	China, Japan	Attacks mainly larch ( <i>Larix sibirica</i> , <i>L. gmelinii</i> and other larch species) and Pinus ( <i>Pinus sylvestris</i> , <i>P. sibiricus</i> , <i>P. koraiensis</i> ).	Needles	L - M	
1.44	<i>Cydia</i> (= <i>Laspeyresia</i> = <i>Grapholitha</i> ) <i>illutana</i> ssp <i>dahuricolana</i> Kuznetsov *	Tortricidae	N.E. Siberia, N.W. Siberia, S. Siberia, Transbaikalia	Absent	Absent	Attacks cones of larch, especially <i>Larix gmelinii</i> and <i>L. sibirica</i> , spruce, especially <i>Picea obovata</i> , fir and other coniferous	Cones and seeds	M - H	

\* - species for which PRA was provided by the Panel but not recommended for inclusion into the EPPO lists

\*\* - species for which PRA was provided by the Panel and recommended for inclusion into the EPPO lists

**Table 2. MITES & INSECTS****ACARI & COLEOPTERA**

**Table 2. Transition table: Forest pests to be included into the PQR system causing significant damage on the territory of the former USSR, for which either more information is needed, or for which pathways do not at present exist, or whose host plants are not of importance for Central and Western Europe**

N°	Pest	Group of organisms	Distribution			Main host plants in the former USSR	Damaged parts of plants	Economic significance in the area of origin	Remarks
			In the former USSR	In North America	In other countries				
<b>Acari (Arachnida)</b>									
2.1	<i>Trisetacus kirghisorum</i> Shevchenko	<i>Phytoptidae</i> (Acariformes, Tetrapodili)	Armenia (introduced), Kazakhstan, Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan	Absent	Absent	<i>Juniperus semiglobosa</i> , <i>J. sabina</i> , <i>J. turkestanica</i> , <i>J. foetidissima</i> , <i>J. polycarpos</i>	Seeds	L - H	
<b>Insecta</b>									
<b>Coleoptera</b>									
2.2	<i>Dinoderus minutus</i> Fabr.	<i>Bostriichidae</i>	Ukraine (Crimea, introduced)	In tropical regions	Cosmopolitan in tropical regions	All deciduous and coniferous wood	Wood	L - M	Main damage – to wood in buildings
2.3	[ <i>Enneadesmus scopini</i> Fursov.]	<i>Bostriichidae</i>	Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan & Kazakhstan	Absent	Absent	All deciduous and coniferous wood & <i>Elaeagnus angustifolia</i> , <i>E. orientalis</i>	Wood, branches of <i>Elaeagnus</i>	L - M	Main damage – to wood in buildings
2.4	<i>Psoa dubia</i> ?	<i>Bostriichidae</i>	Ukraine (Crimea, introduced)	Not known	Not yet checked	All deciduous and coniferous wood & <i>Vitis vinifera</i>	Wood	L - M	Main damage – to wood in buildings
2.5	<i>Xylogenes dilatatus</i> Rtt.	<i>Bostriichidae</i>	Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan & Kazakhstan	Absent	Syria, Iran	<i>Tamarix</i> ( <i>T. laxa</i> , <i>T. ramosissima</i> , <i>T. hispida</i> , <i>T. pallasii</i> , <i>T. arceuthoides</i> ) and other deciduous	Wood, under bark	L - M	Main damage – to wood in buildings
2.6	<i>Agrilus graminis</i> C. G (= <i>A. disparicornis</i> Bed.)	<i>Buprestidae</i>	C. E. Russia, S. E. Russia ; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Italy, Bulgaria	<i>Quercus cerris</i> , <i>Quercus</i> sp., <i>Castanea sativa</i> , <i>Rosa damascena</i> , other plants	Trunks (under bark)	L	
2.7	<i>Agrilus hastulifer</i> Ratz.	<i>Buprestidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Italy	<i>Quercus</i> sp.	Trunks (under bark)	L	
2.8	<i>Anthaxia</i> (= <i>Melanthaxia</i> ) <i>conradti</i> Semenov	<i>Buprestidae</i>	Kyrgyzstan, Tadzhikistan, Turkmenistan, Uzbekistan (mainly mountains)	Absent	Absent	<i>Juniperus sabina</i> , <i>J. turcomanica</i> , <i>Juniperus</i> sp.	Trunks (under bark)	L - H	

**Table 2. INSECTS****COLEOPTERA**

2.9	<i>Anthaxia manca</i> L. (= <i>Cratomerus mancus</i> L = <i>Trichocratomerus mancus</i> L)	<i>Buprestidae</i>	S. E. Russia, Azerebaijan, Armenia, Estonia, Georgia, Moldova, Latvia, Lithuania, Ukraine	Absent	Algeria, Austria, Bosnia, Bulgaria, Croatia, Czekia, France, Germany, Hungary, Italy, Iran, Macedonia, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Switzerland, Turkey	<i>Ulmus</i> sp., <i>Robinia pseudoacacia</i> , <i>Populus tremula</i> , <i>Rhamnus alaternus</i>	Trunks (under bark)	VL – M	
2.10	<i>Cratomerus</i> (= <i>Trichocratomerus</i> ) <i>aurulentus</i> F. (= <i>Anthaxia aurulenta</i> F.)	<i>Buprestidae</i>	S. E. Russia ; Moldova; Ukraine	Absent	West of Mediterranean region, south-eastern and eastern Europe	<i>Ulmus</i> sp., <i>Salix alba</i>	Trunks (under bark)	VL – M	
2.11	<i>Lampra mirifica</i> Mulsant	<i>Buprestidae</i>	C. E. Russia, S. E. Russia ; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Mediterranean region	<i>Ulmus</i>	Trunks (under bark)	L – M	
2.12	<i>Monochamus grandis</i> Waterhouse	<i>Cerambycidae</i>	S. Far East (Kurile islands: Kunashir, Shikotan)	Absent	Japan	<i>Pinus koraiensis</i> , <i>P. parviflora</i> , <i>P. pumila</i> , <i>P. funebris</i> , <i>Abies sachalinensis</i> , <i>A. holophylla</i> , <i>A. nephrolepis</i> , <i>A. mariesii</i> , <i>A. firma</i> , <i>Picea ajanensis</i> , <i>P. glehnii</i> , <i>P. koraiensis</i> , <i>Tsuga</i> sp., other conif.	Trunks (wood)	L – H	
2.13	<i>Monochamus nitens</i> Bates	<i>Cerambycidae</i>	S. Far East (Sakhalin, Kunashir)	Absent	China (North), Japan	<i>Picea ajanensis</i> , <i>P. glehnii</i> , <i>P. koraiensis</i> , <i>Pinus koraiensis</i> , <i>P. parviflora</i> , <i>P. pumila</i> , <i>P. funebris</i> , <i>Abies mariesii</i> , <i>A. firma</i> , <i>Larix leptolepis</i>	Trunks (wood)	L – M	
2.14	<i>Semanotus semenovi</i> Okunev	<i>Cerambycidae</i>	Kyrgyzstan, Tadjikistan, Turkmenistan, Uzbekistan	Absent	Absent	<i>Juniperus semiglobosa</i> , <i>J. polycarpa</i> , <i>J. sabina</i> , <i>J. turcomanica</i> , , <i>J. turkestanica</i> , <i>J. foetidissima</i> , <i>J. sp.</i>	Trunks (wood)	L – M	
2.15	<i>Pissodes cembrae</i> Motsch.	<i>Curculionidae</i>	S. Siberia, N.E. Siberia, N. Far East, S. Far East	Absent	Northern China; Japan	<i>Pinus sibirica</i> (preferred host), <i>P. koraiensis</i> , <i>P. pumila</i> , <i>P. sp.</i> , <i>Larix</i> sp., <i>Picea</i> sp., <i>Abies</i> sp.	Trunks and roots (under bark), twigs (at the additional feeding)	L – H	
2.16	[ <i>Pissodes galloisi</i> ? (= <i>P. galloisi</i> )]	<i>Curculionidae</i>	S. Far East	No data	No data	<i>Pinus</i> , other coniferous	Trunks and roots (under bark)	L	

**Table 2. INSECTS**

COLEOPTERA								
2.17	[ <i>Pissodes insignitus</i> Boh. (= <i>P. insignatus</i> )]	<i>Curculionidae</i>	N.E. Siberia, S. Siberia, Transbaik., N. Far East, S. Far East	Absent	Absent	<i>Pinus sibirica</i> , <i>P. pumila</i> , <i>Larix gmelinii</i> , <i>Larix sibirica</i> , <i>Larix</i> sp.	Trunks (under bark)	L – M
2.18	<i>Pissodes irroratus</i> Reit.	<i>Curculionidae</i>	N.E. Siberia, N. Far East, S. Far East	Absent	Absent	<i>Pinus sibirica</i> , <i>P. pumila</i> , <i>Larix gmelinii</i> , <i>Larix sibirica</i> , <i>Larix</i> sp., <i>Abies</i> sp., other coniferous	Trunks (under bark)	L – M
2.19	<i>Pissodes</i> (= <i>P. strobi</i> Say.) <i>nemorensis</i> Germ.	<i>Curculionidae</i>	S. Far East	Canada, USA	Japan, South Africa	<i>Pinus funebris</i> , <i>P. koraiensis</i> , <i>P.</i> sp., <i>Picea</i>	Trunks (under bark)	L – M
2.20	<i>Pissodes nitidus</i> Roel.	<i>Curculionidae</i>	N. Far East, S. Far East	Absent	Japan, China	<i>Pinus funebris</i> , <i>P. sylvestris</i> , <i>P. densiflora</i> , <i>P. koraiensis</i> , <i>P.</i> sp.	Trunks (under bark)	L – M
2.21	<i>Agriotes gurgistanus</i> Faldermann	<i>Elateridae</i>	S. E. Russia ; Moldova; Ukraine; Transcaucasus; Turkmenistan	Absent	Balcanians; Turkey, south-eastern Europe	Deciduous, coniferous and other plants, mainly agricultural crops (cereals, etc.)	Roots	L – M
2.22	<i>Selatosomus latus</i> F	<i>Elateridae</i>	C. E. Russia, S. E. Russia, S. Siberia (West), Transbaik., S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Central and southern Europe, China, Iran, Japan, Mongolia, Turkey	Deciduous, coniferous and other plants, mainly agricultural crops (sugarbeet, cereals, vegetables, etc.) except tomato and cabbage	Roots	L – M
2.23	<i>Lethrus apterus</i> Laxmann	<i>Geotrupidae</i>	S. E. Russia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine, Tadzhikistan	Absent	China, Netherlands	Deciduous, coniferous and other plants, mainly agricultural crops	Roots	L – M
2.24	[ <i>Carphoborus jurinskii</i> Eggers]	<i>Scolytidae</i>	N.E. Siberia, N.W. Siberia, S. Siberia	Absent	Absent	<i>Picea</i> , <i>Pinus</i>	Trunks (under bark)	VL – L
2.25	[ <i>Cryphalus</i> (= <i>C. punctulatus</i> Eggers) <i>kurenzovi</i> Stark]	<i>Scolytidae</i>	S. Far East (including Sakhalin & Kuril islands)	Absent	Absent	<i>Abies nephrolepis</i> (preferred host), <i>Pinus pumila</i> , <i>Picea</i> sp.	Trunks (under bark)	VL – L
2.26	<i>Cryphalus latus</i> Eggers	<i>Scolytidae</i>	Transbaik., S. Far East (including Sakhalin)	Absent	North-west China	<i>Larix gmelinii</i> , <i>Larix olgensis</i> (preferred hosts), <i>Picea ajanensis</i> , <i>Picea obovata</i> , <i>Abies nephrolepis</i> , <i>Abies holophylla</i>	Trunks (under bark)	VL – L
2.27	<i>Cryphalus orientalis</i> Eggers	<i>Scolytidae</i>	Transcaucasus	Absent	Absent	<i>Abies nordmanniana</i> , <i>Picea orientalis</i> , other coniferous	Trunks & branches (under bark)	L – M
								Main damage – to young trees

**Table 2. INSECTS**

COLEOPTERA									
2.28	<i>Cryphalus piceus</i> Eggers	Scolytidae	S. Far East (including Sakhalin)	Absent	North-east China, Japan	<i>Picea ajanensis</i> , <i>P. obovata</i> , <i>P. koraiensis</i> (preferred hosts), <i>Abies nephrolepis</i> , <i>A. holophylla</i> (preferred hosts), <i>Pinus funebris</i> , <i>Larix gmelinii</i> , <i>Larix olgensis</i>	Trunks (under bark)	VL – L	
2.29	<i>Cryphalus redikorzevi</i> Berger	Scolytidae	S. Far East (including Sakhalin & Kuril islands)	Absent	North-east China, Koreas	<i>Abies nephrolepis</i> , <i>A. holophylla</i> (preferred hosts), <i>Abies</i> spp., <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.30	[ <i>Cryphalus sichotensis</i> Kur.]	Scolytidae	S. Far East (Primorie) (including Sakhalin)	Absent	Absent	<i>Picea ajanensis</i> (preferred host), <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.31	[ <i>Cryphalus ussuriensis</i> Eggers]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.32	<i>Crypturgus tuberosus</i> Nijs.	Scolytidae	S. Far East (Primorie) (including Sakhalin)	Absent	Northern Japan	<i>Picea ajanensis</i> (preferred host), <i>P. glehnii</i> , <i>Pinus pumila</i> , <i>P. koraiensis</i>	Trunks (under bark)	VL – L	
2.33	<i>Dryocoetes abietinus</i> Kono et Tamanuki (= <i>D. striatus</i> Eggers)	Scolytidae	S. Far East (Sakhalin)	Absent	Japan	<i>Abies sachalinensis</i> , <i>A. nephrolepis</i> , <i>A. holophylla</i>	Trunks (under bark)	VL – L	
2.34	<i>Dryocoetes baicalicus</i> Reitter (= <i>D. budkovi</i> Sem.)	Scolytidae	Russia: widespread in coniferous area	Absent	Mongolia	<i>Larix sibirica</i> , <i>L. gmelinii</i> , <i>L. plgensis</i> , (preferred hosts), <i>Larix</i> spp., <i>Pinus korajensis</i> , <i>P. sibirica</i> , <i>Pinus</i> spp., <i>Abies nephrolepis</i> , <i>A. holophylla</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.35	[ <i>Dryocoetes orientalis</i> Kur.]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Pinus korajensis</i> (preferred host), <i>Pinus</i> spp., <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.36	[ <i>Dryocoetes pini</i> Niijima]	Scolytidae	S. Far East (Sakhalin)	Absent	Japan	<i>Pinus pumila</i> (preferred host), <i>Pinus</i> spp., <i>Larix</i> spp., <i>Abies</i> spp., <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.37	<i>Dryocoetes rugicollis</i> Eggers	Scolytidae	S. Far East (including Sakhalin & Kuril islands)	Absent	North-east China, Japan	<i>Picea obovata</i> (preferred host), <i>Picea</i> spp., <i>Abies nephrolepis</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.38	[ <i>Hylurgops imitator</i> Reitter]	Scolytidae	N.E. Siberia, N.W. Siberia, N. Far East, S. Far East	Absent	China, Koreas, Japan	<i>Pinus korajensis</i> (preferred host), <i>Pinus</i> spp., <i>Picea ajanensis</i> , <i>Picea</i> spp., <i>Larix</i> spp.	Trunks (under bark)	VL – L	
2.39	[ <i>Hylurgops interstitialis</i> Chapuis]	Scolytidae	S. Far East, N.E. Siberia (introduced)	Absent	Absent	<i>Pinus korajensis</i> , <i>Abies holophylla</i> (preferred hosts), <i>Abies nephrolepis</i> , <i>Abies</i> spp., <i>Pinus funebris</i> , <i>Pinus</i> spp., <i>Picea ajanensis</i> , <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.40	<i>Hylurgops longipilis</i> Reitt.	Scolytidae	N. Far East (introduced), S. Far East (including Sakhalin)	Absent	Absent	<i>Pinus korajensis</i> (preferred host), <i>Pinus</i> spp., <i>Larix gmelinii</i> , <i>Larix</i> spp., <i>Picea ajanensis</i> , <i>Picea</i> spp.	Trunks (under bark)	VL – L	

**Table 2. INSECTS****COLEOPTERA**

2.41	<i>Hylurgops palliatus</i> Gyll. (= <i>H. parvus</i> Eggers = <i>H. helferi</i> Villa)	Scolytidae	N. E. Russia, C. E. Russia, N. W. Siberia, N. E. Siberia, S. Far East (Primorie) (including Sakhalin & Kuril islands); Kazakhstan	Absent	W. Europe, Japan, Koreas, China	<i>Pinus korajensis</i> (preferred host), <i>Pinus sibirica</i> , <i>P. pumila</i> , <i>Pinus</i> spp., <i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.42	<i>Hylurgops spessivtzevi</i> Eggers (= <i>H. tuberculatus</i> = <i>H. transbaicalicus</i> )]	Scolytidae	N.E.Siberia, N.W. Siberia, N. Far East, S. Far East (including Sakhalin)	Absent	North-east China	<i>Pinus korajensis</i> (preferred host), <i>P.</i> <i>sylvestris</i> , <i>Pinus</i> spp., <i>Picea obovata</i> , <i>Picea</i> spp., <i>Larix gmelinii</i> , <i>Larix</i> spp.	Trunks (under bark)	VL – L	
2.43	<i>Hylurgops starki</i> Eggers (= <i>H.</i> <i>cunicularius</i> )]	Scolytidae	N. E. Russia, C. E. Russia, N.W. Siberia	Absent	Finland, Sweden	<i>Picea abies</i> , <i>Pinus sylvestris</i> (preferred hosts), <i>Picea</i> spp., <i>Pinus</i> spp., <i>Larix</i> spp.	Trunks (under bark)	VL – L	
2.44	<i>Ips ussuriensis</i> Reitter]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Pinus</i> spp., <i>Picea</i> spp., <i>Abies</i> spp., <i>Larix</i> spp.	Trunks (under bark)	L – M	
2.45	<i>Phloeosinus turce-</i> <i>stranicus</i> Semenov	Scolytidae	Central Asia	Absent	Absent	<i>Juniperus pseudosabina</i> , <i>J.</i> <i>polycarpos</i> , <i>J excelsa</i> , <i>J. communis</i> , <i>Juniperus</i> spp.	Trunks (under bark)	L – H	
2.46	<i>Phloeotribus caucasicus</i> Reitter]	Scolytidae	S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Central Asia	Absent	Absent	<i>Fraxinus excelsior</i> , <i>Fraxinus</i> spp.	Trunks (under bark)	L	
2.47	<i>Pityogenes aizawai</i> Kôno]	Scolytidae	S. Far East (Sakhalin)	Absent	Absent	<i>Picea</i> spp., <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.48	<i>Pityogenes foveolatus</i> Eggers]	Scolytidae	N.E.Siberia, N.W. Siberia, S. Siberia, Transbaik., N. Far East, S. Far East	Absent	Japan	<i>Pinus pumila</i> , <i>Pinus</i> spp., <i>Picea</i> <i>ajanensis</i> , <i>Picea</i> spp.	Trunks (under bark)	L	
2.49	<i>Pityogenes rudnevi</i> Sok.]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Picea</i> spp.	Trunks (under bark)	VL – L	
2.50	<i>Pityogenes seirindensis</i> Murayama]	Scolytidae	S. Far East	Absent	Koreas, northern Japan	<i>Picea ajanensis</i> , <i>Picea obovata</i> (preferred hosts), <i>Picea</i> spp., <i>Abies</i> <i>nephrolepis</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.51	<i>Pityophthorus jucundus</i> Blandford]	Scolytidae	S. Far East (Sakhalin)	Absent	Koreas, Japan	<i>Picea ajanensis</i> (preferred host), <i>Picea</i> spp., <i>Pinus</i> spp.	Trunks (under bark)	VL – L	
2.52	<i>Pityophthorus kurenzovi</i> Krivolutskaja (= <i>P.</i> <i>abietis</i> Kurentzov = <i>P. sibiricus</i> Nunberg)]	Scolytidae	S. Far East (Primorie)	Absent	Absent	<i>Abies holophylla</i> , <i>Abies nephrolepis</i> , <i>Abies</i> spp.	Trunks (under bark)	VL – L	
2.53	<i>Pityophthorus lapponicus</i> Stark]	Scolytidae	N. E. Russia, C. E. Russia, S. Far East	Absent	Absent	<i>Picea abies</i> , <i>Picea obovata</i> , <i>Picea</i> spp.	Trunks (under bark)	VL – L

Siberia (West); Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Canada (introduced); USA (introduced)	Europe (widespread)	<i>Quercus, Castanea, Carpinus, Juglans</i>	Trunks (under bark)	L – M	
3a.168	<i>Xyleborus [= Anisandrus] saxeseni</i>	Scolytidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Present	Europe (widespread); Iran; India; Mongolia; China; Korea; Japan	<i>Quercus, Carpinus, Fagus, Fraxinus, Ulmus</i> , other deciduous and coniferous	Trunks (under bark)	L – M	
3a.169	<i>Xylechinus pilosus</i>	Scolytidae	Russia: widespread in fir and spruce area; Baltic countries; Belarus; Moldova; Ukraine	Not known	Central and Northern Europe	<i>Abies, Picea</i>	Trunks (under bark)	L – M	
3a.170	<i>Blaps halophila</i>	Tenebrionidae	S. E. Russia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine; Central Asia	Not yet checked	Not yet checked	Deciduous, coniferous and other plants	Roots	L	Main damage - on young plants and in nurseries
3a.171	<i>Opatrum sabulosum</i>	Tenebrionidae	C. E. Russia, S. E. Russia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Central Asia	Not yet checked	Europe	Deciduous, coniferous and other plants	Roots, leaves	L	Main damage - on young plants and in nurseries

**Table 3a. INSECTS**

## DIPTERA, HETEROPTERA &amp; HOMOPTERA

<b>Diptera</b>									
3a.172	<i>Strobilomyia</i> [ <i>Pegohylemyia</i> ] <i>anthracina</i>	<i>Anthomyiidae</i>	Russia: widespread in the <i>Picea</i> area Baltic countries, Belarus, Ukraine	Not known	Widespread in Europe, China, Japan	<i>Picea</i>	Cones and seeds	L - M	Data of Dr. Alain Roques
3a.173	<i>Strobilomyia</i> [ <i>Lasiomma</i> ] <i>laricicola</i>	<i>Anthomyiidae</i>	Russia: widespread in the <i>Larix</i> area; Baltic countries; Belarus, Ukraine	Not known	Widespread in Europe, China, Japan	<i>Larix</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.174	<i>Strobilomyia</i> [ <i>Lasiomma</i> ] <i>infrequens</i>	<i>Anthomyiidae</i>	Russia: widespread in the <i>Larix</i> area;	Not known	Widespread in Europe, China	<i>Larix</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.175	<i>Kaltenbachiola</i> [= <i>Perresia</i> ] <i>strobi</i>	<i>Cecidomyiidae</i>	Russia: widespread in <i>Picea</i> area; Baltic countries; Belarus, Ukraine; Kazakhst.	Not known	Central and Northern Europe	<i>Picea</i>	Cones and seeds	L - M	Data of Dr. Alain Roques
3a.176	<i>Plemeliella</i> <i>abietina</i>	<i>Cecidomyiidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Belarus, Ukraine	Not known	Widespread in <i>Picea</i> area in Europe	<i>Picea</i>	Seeds	VL - L	Data of Dr. Alain Roques
3a.177	<i>Resseliella piceae</i>	<i>Cecidomyiidae</i>	Transcaucasus	Not known	Western, Central , Southern Europe	<i>Abies</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.178	<i>Earomyia bazini</i>	<i>Lonchaeidae</i>	S. Siberia, N. Far East	Not known	France, Poland	<i>Larixs</i>	Seeds	L-M	Data of Dr. Alain Roques
3a.179	<i>Earomyia</i> <i>impossibile</i> [ <i>E. impossibilis</i> ]	<i>Lonchaeidae</i>	Transcaucasus	Not known	Austria, Italy, Romania	<i>Abies</i>	Seeds	M - H	Data of Dr. Alain Roques
3a.180	<i>Earomyia</i> <i>schystopiga</i>	<i>Lonchaeidae</i>	C.E. Russia, S. Siberia, Transbaik.s	Not known	Westen, Central, Northern Europe	<i>Picea</i>	Seeds	M - H	Data of Dr. Alain Roques
<b>Heteroptera</b>									
3a.181	<i>Aradus</i> <i>cinnamomeus</i>	<i>Aradidae</i>	N. E. Russia, C. E. Russia, S.E. Russia, N.E.Siberia, N.W. Siberia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine	Canada; USA	Finland; Sweden; Norway; Denmark; Netherlands; Spain; Greece; Chechia; Slovakia; Bulgaria; Poland; Hungary; Israel; Turkey;	<i>Pinus</i> <i>sylvestris</i> , other <i>Pinus</i> , <i>Larix</i>	Trunks (under bark)	L - H	Main damage – to young (5 – 25 year- old) pine plantations. Vector of resin flow canker
<b>Homoptera</b>									
3a.182	<i>Adelges laricis</i>	<i>Adelgidae</i>	Russia: spread in common spruce and larch area	Not yet checked	Not yet checked	<i>Picea</i> and <i>Larix</i>	Young sprouts & needles	VL – L	Main damage – to young trees
3a.183	<i>Adelges tardus</i>	<i>Adelgidae</i>	N. E. Russia, C. E. Russia; Baltic countries; Belarus	Not known	Central and Northern Europe	<i>Picea</i>	Young sprouts and needles	L – M	Main damage - to young trees in plantations and nurseries
3a.184	<i>Aphrastasia</i> <i>pectinatae</i> [ <i>A. pectinate</i> ]	<i>Adelgidae</i>	Russia: spread in common spruce and fir area; Baltic countries	Not yet checked	Not yet checked	<i>Picea</i> and <i>Abies</i>	Young sprouts and needles	VL – L	Main damage – to young trees

**Table 3a. INSECTS****HOMOPTERA**

3a.185	<i>Chermes [Adelges] tardooides</i>	<i>Adelgidae</i>	Russia: spread in common spruce and larch area	Not yet checked	Scandinavia	<i>Picea</i> and <i>Larix</i>	Young sprouts & needles	VL – L	Main damage – to young trees
3a.186	<i>Dreyfusia nordmanniana</i>	<i>Adelgidae</i>	Russia: spread in common spruce and fir area	Not yet checked	Not yet checked	<i>Picea</i> and <i>Abies</i>	Young sprouts & needles	VL – L	Main damage – to young trees
3a.187	<i>Pineus pini</i>	<i>Adelgidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Not known	Europe: widespread in pine area	<i>Pinus</i>	Young sprouts and needles	L – M	Main damage - to young trees in plantations and nurseries
3a.188	<i>Cholodkovskya viridara</i>	<i>Aphididae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe	<i>Larix</i>	Young sprouts and needles	L – M	Main damage - to young trees in plantations and nurseries
3a.189	<i>Dysaphis (= Yezabura) reaumuri</i>	<i>Aphididae</i>	S. E. Russia; Ukraine; Transcaucasus; Central Asia	Not yet checked	Not yet checked	<i>Pyrus, Populus</i>	Leaves	VL – M	
3a.190	<i>Sacchiphantes abietis</i>	<i>Aphididae</i>	Russia: widespread in spruce area; Baltic countries; Belarus; Kazakhstan	Absent	Western Europe	<i>Picea</i>	Young sprouts and needles	L – M	Main damage - to young trees in plantations and nurseries
3a.191	<i>Sacchiphantes viridis</i>	<i>Aphididae</i>	Russia: widespread in common spruce and larch area; Baltic countries; Belarus; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Picea</i> and <i>Larix</i>	Young sprouts and needles	VL – L	Main damage – to young trees
3a.192	<i>Thecabius affinis (= T. agnotus)</i>	<i>Aphididae</i>	C. E. Russia, S. E. Russia, N. W. Siberia, S. Siberia, Transbaikalia, S. Far East; Ukraine; Transcaucasus; Central Asia	Not yet checked	Widespread in Eurasia	<i>Populus</i>	Leaves	VL – M	
3a.193	<i>Parthenolecanium corni</i>	<i>Coccidae</i>	N. E. Russia, C. E. Russia, S.E. Russia, N. Far East, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Central Asia	Present	Western Europe	<i>Corylus, Robinia, Acer, Caragana, Vitis</i> , other deciduous	Trunks and branches (on the bark)	L – M	Main damage - to young plants in plantations and nurseries
3a.194	<i>Chionaspis salicis</i>	<i>Diaspididae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Western Europe	<i>Salix, Populus, Fraxinus, Acer</i> , other deciduous	Trunks and branches (on the bark)	L – M	Main damage - to young plants in plantations and nurseries

**Table 3a. INSECTS**

HOMOPTERA &amp; HYMENOPTERA

3a.195	<i>Lepidosaphes ulmi</i>	<i>Diaspididae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Widespread	Widespread in the world	<i>Populus</i> , <i>Salix</i> , fruit and other deciduous	Trunks and branches (on the bark)	L – M	Main damage – to young plants in plantations and nurseries
<b>Hymenoptera</b>									
3a.196	<i>Arge [= Hylotoma] pullata</i>	<i>Argidae</i>	Russia: widespread in birch area; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Betula</i>	Leaves	L	
3a.197	<i>Diprion [= Lophyrus] pini</i>	<i>Diprionidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Transcaucasus	Absent	Europe (widespread); Algeria	<i>Pinus</i>	Needles	M – H	
3a.198	<i>Neodiprion sertifer</i> [ <i>Tenthredo rufa</i> ]	<i>Diprionidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Transcaucasus	East of USA (introduced and not yet widely distributed)	Western Europe; Japan; Korea	<i>Pinus</i>	Needles	M – H	
3a.199	<i>Eurytoma laricis</i> (= <i>E. bouceki</i> )	<i>Eurytomidae</i>	S.E. Russia, C.E. Russia, S. Siberia, Transbaik	Not known	Europe: widespread in <i>Larix</i> area, Finland, China	<i>Larix</i>	seeds	VL – L	Data of Dr. Alain Roques
3a.200	<i>Eurytoma plotnikovi</i>	<i>Eurytomidae</i>	Central Asia	Not yet checked	Not yet checked	<i>Pistacia</i>	Nuts	VL – L	
3a.201	<i>Acantholyda [= Lyda] erythrocephala</i>	<i>Pamphiliidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Kazakhstan	East of USA (introduced and not yet widely distributed)	Western Europe; Korea	<i>Pinus</i>	Needles	M – H	Main damage – to young monocultures of pine
3a.202	<i>Acantholyda [Lyda] hieroglyphica</i>	<i>Pamphiliidae</i>	N. E. Russia, C. E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Western Europe	<i>Pinus</i>	Needles	L – M	Main damage – to 2 – 4 year-old plantations and nurseries
3a.203	<i>Acantholyda posticalis</i> [ <i>Lyda nemoralis</i> (= <i>Acantholyda pinivora</i> = <i>Tenthredo stellata</i> )]	<i>Pamphiliidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Kazakhstan	Not known	Western Europe; Japan; Mongolia	<i>Pinus</i>	Needles	M – H	
3a.204	<i>Sirex [Paururus] juvencus</i>	<i>Siricidae</i>	Russia: widespread in pine area; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Pinus</i> , other coniferous	Trunks (wood)	L	

**Table 3a. INSECTS****HYMENOPTERA**

3a.205	<i>Tremex fuscicornis</i>	Siricidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe; Chili, China (North – East); Japan; Korea	<i>Betula, Populus tremula, Salix, Fagus, Quercus</i>	Trunks (wood)	L – M	
3a.206	<i>Tremex magus</i>	Siricidae	C. E. Russia, S.E. Russia, S. Siberia (West); Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe	<i>Betula, Fagus, Acer, other deciduous</i>	Trunks (wood)	L – M	
3a.207	<i>Urocerus [Sirex] gigas</i>	Siricidae	Russia: widespread in spruce area; Baltic countries; Belarus; Moldova; Ukraine; Kazakhstan	Not known	Western Europe; Japan	<i>Picea, other coniferous</i>	Trunks (wood)	L – M	
3a.208	<i>Croesus [= Nematus] septentrionalis</i>	Tenthredinidae	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine	Not yet checked	Not yet checked	<i>Betula, Alnus, Populus, Salix, Corylus</i>	Leaves	L	
3a.209	<i>Macrophyia punctumalbum</i>	Tenthredinidae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	East USA	Europe to the Caucasus	<i>Fraxinus, Ligustrum, Crataegus</i>	Leaves	L	
3a.210	<i>Mesoneura opaca</i>	Tenthredinidae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Not yet checked	Not yet checked	<i>Quercus</i>	Leaves	L	
3a.211	<i>Pristiphora abietina</i> [ <i>Lygaeonematus</i> ( <i>Nematus</i> ) <i>abietinus</i> ]	Tenthredinidae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Ukraine	Not known	Western Europe	<i>Picea</i>	Needles	L – M	
3a.212	<i>Pristiphora</i> [= <i>Lygaeonematus</i> = <i>Nematus</i> ] <i>erichsonii</i>	Tenthredinidae	Russia: widespread in larch area; Baltic countries; Belarus; Ukraine	Present	Western Europe	<i>Larix</i>	Needles	L – M	
3a.213	<i>Pristiphora</i> [= <i>Lygaeonematus</i> ] <i>wesmaeli</i>	Tenthredinidae	Russia: widespread in larch area; Baltic countries; Belarus; Ukraine	Not known	Western Europe	<i>Larix</i>	Needles and young sprouts	L – M	
3a.214	<i>Tomostethus nigritus</i>	Tenthredinidae	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Europe (HR, IT); from ES, N. Africa to the Caucasus	<i>Fraxinus</i>	Leaves	L	
3a.215	<i>Trichiocampus</i> [= <i>Cladius</i> ] <i>ulmi</i> (= <i>Cladius</i> <i>uncinatus</i> )	Tenthredinidae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Ulmus</i>	Leaves	L	

**Table 3a. INSECTS****HYMENOPTERA, ISOPTERA & LEPIDOPTERA**

3a.216	<i>Megastigmus pistaciae</i>	Torymidae	Ukraine; Transcaucasus; Central Asia	California	Southern Europe; North Africa, Iran, China	<i>Pistacia</i>	Nuts (seeds)	L – M	Data of Dr. Alain Roques
3a.217	<i>Megastigmus pictus</i>	Torymidae	Russia: widespread in larch area; Baltic countries; Belarus, Ukraine	Not known	Europe: widespread in <i>Larix</i> area, China	<i>Larix</i>	Seeds	L – M	Data of Dr. Alain Roques
3a.218	<i>Megastigmus specularis</i>	Torymidae	C.E. Russia, S. Siberia, Baltic countries	Not known	Finland, Denmark, Sweden, France	<i>Abies</i>	Seeds	L-M	Data of Dr. Alain Roques
3a.219	<i>Megastigmus strobilobius</i>	Torymidae	Russia: widespread in <i>Picea</i> area; Baltic countries; Belarus, Ukraine, Transcaucasus	Not known	Europe: widespread in <i>Picea</i> area	<i>Picea</i>	Seeds	M – H	Data of Dr. Alain Roques
3a.220	<i>Megastigmus suspectus</i>	Torymidae	C.E. Russia, S.E. Russia, Transcaucasus, Baltic countries; Belarus, Ukraine	Not known	Europe: widespread in <i>Abies</i> area	<i>Abies</i>	Seeds	M - H	Data of Dr. Alain Roques
3a.221	<i>Konowia [= Pseudoxiphidria] betulae</i>	Xiphydriidae	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe	<i>Betula</i>	Trunks (wood)	L – M	
3a.222	<i>Xiphydria camelus</i>	Xiphydriidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine	Not known	Western Europe	<i>Alnus, Betula</i>	Trunks (wood)	L – M	
3a.223	<i>Xiphydria prolongata</i>	Xiphydriidae	Russia: widespread except Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan	Not known	Western Europe	<i>Salix, Populus, Betula, Quercus, Ulmus</i>	Trunks (wood)	L – M	

***Isoptera***

3a.224	<i>Reticulitermes lucifugus</i>	Rhinotermitidae	Ukraine (South)	Not known	Not known	Coniferous and deciduous	Wood	M – H	Main damage - to telegraph-poles, wood in buildings, etc.
--------	---------------------------------	-----------------	-----------------	-----------	-----------	--------------------------	------	-------	---

***Lepidoptera***

3a.225	<i>Hyphantria cunea</i>	Arctiidae	S. E. Russia; Azerbaijan; Georgia; Moldova; Ukraine; Uzbekistan	Canada, Mexico, USA	Europe (widespread); China; Japan; Korea; Turkey	<i>Morus, Acer negunda</i> , fruit trees, <i>Ulmus, Juglans, Salix</i>	Leaves	L – M	
3a.226	<i>Coleophora [= Eupista] laricella</i>	Coleophoridae	N. E. Russia, C. E. Russia, S.E. Russia, N.E. Siberia, S. Siberia (West); Baltic countries; Belarus; Ukraine	Canada (introduced); USA (introduced)	Central & Northern Europe; Japan;	<i>Larix</i>	Needles	L – M	
3a.227	<i>Cossus cossus</i>	Cossidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Kazakhstan; Central Asia	Absent	Europe; Mediterranean region; Western and Northern China	<i>Fraxinus</i> , fruit trees and other deciduous	Trunks (wood)	L – M	

**Table 3a. INSECTS****LEPIDOPTERA**

3a.228	<i>Lamellocossus</i> [ <i>Cossus</i> ] <i>terebra</i>	<i>Cossidae</i>	N. E. Russia, C. E. Russia, S.E. Russia, S. Siberia, S. Far East, Transbaik.; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not yet checked	Not yet checked	<i>Populus tremula</i> , other <i>Populus</i>	Trunks (wood)	VL – L	
3a.229	<i>Zeuzera pyrina</i>	<i>Cossidae</i>	C. E. Russia, S. E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Present	Central & Southern Europe; Mediterranean region; Southern Africa; South-East Asia	<i>Fraxinus</i> , <i>Quercus</i> , <i>Ulmus</i> , <i>Malus</i> , <i>Pyrus</i> , other deciduous	Trunks and branches (wood)	L – M	
3a.230	<i>Endromis versicolora</i>	<i>Endromidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Kazakhstan	Absent	Central and Northern Europe	<i>Betula</i> , <i>Salix</i> , <i>Tilia</i> , <i>Carpinus</i>	Leaves	L – M	
3a.231	<i>Schneidereria</i> [ <i>Recurvaria</i> ] <i>pistaciicola</i>	<i>Gelechiidae</i>	Central Asia	Not known	Not known	<i>Pistacia</i>	Nuts	L - M	
3a.232	<i>Abraxas sylvata</i>	<i>Geometridae</i>	N. E. Russia, C. E. Russia, S.E. Russia, S. Siberia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Absent	Central and Northern Europe	<i>Ulmus</i> , <i>Betula</i> , <i>Prunus padus</i> , <i>Fraxinus</i> , <i>Ribes</i> , <i>Grossularia</i>	Leaves	L – M	
3a.233	<i>Agriopsis</i> [ <i>Erannis</i> (= <i>Hybernia</i> )] <i>aurantiaria</i>	<i>Geometridae</i>	C. E. Russia, S. E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Central Europe; Turkey	<i>Quercus</i> , <i>Fagus</i> , <i>Ulmus</i> , <i>Betula</i> , <i>Tilia</i> , <i>Fraxinus</i> , fruit trees	Leaves	L – M	
3a.234	<i>Agriopsis</i> [ <i>Erannis</i> (= <i>Hybernia</i> )] <i>leucophaearia</i>	<i>Geometridae</i>	C. E. Russia, S. E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Central and Southern Europe; Syria; Japan	<i>Quercus</i> , <i>Populus tremula</i> , <i>Fagus</i> , other deciduous	Leaves	L – M	
3a.235	<i>Agriopsis</i> [ <i>Erannis</i> (= <i>Hybernia</i> )] <i>marginaria</i>	<i>Geometridae</i>	C. E. Russia, S. E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Europe (widespread); Turkey	<i>Quercus</i> , <i>Fagus</i> , <i>Ulmus</i> , <i>Betula</i> , <i>Tilia</i> , <i>Fraxinus</i> , fruit trees	Leaves	L – M	
3a.236	<i>Alsophila</i> [= <i>Anisopterix</i> ] <i>aescularia</i>	<i>Geometridae</i>	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Central and Southern Europe	<i>Ulmus</i> , <i>Quercus</i> , <i>Betula</i> , <i>Alnus</i>	Leaves	L – M	
3a.237	<i>Apocheima</i> [= <i>Biston</i> ] <i>hispidaria</i>	<i>Geometridae</i>	C. E. Russia, S. E. Russia, S. Siberia; Ukraine	Not known	Central and Southern Europe	<i>Quercus</i> , <i>Ulmus</i> , fruit trees, <i>Betula</i>	Leaves	L – M	
3a.238	<i>Apocheima pilosaria</i> [ <i>Phigalia pedaria</i> ]	<i>Geometridae</i>	N. E. Russia, C. E. Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine	Absent	Central Europe	<i>Ulmus</i> , <i>Quercus</i> , fruit trees, <i>Betula</i>	Leaves	L – M	

**Table 3a. INSECTS**

LEPIDOPTERA									
3a.239	<i>Biston [= Amphidasis] betularia</i>	Geometridae	N. E. Russia, C. E. Russia, S.E. Russia, S. Siberia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan	Not known	Western Europe; Japan	<i>Betula, Populus, Tilia, Ulmus, Quercus, Fraxinus</i>	Leaves	L – M	
3a.240	<i>Biston strataria</i>	Geometridae	C. E. Russia, S. E. Russia ; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan	Not known	Europe; Turkey	<i>Quercus, Populus, Tilia, Betula</i>	Leaves	L – M	
3a.241	<i>Bupalus [= Fidonia] piniarius</i>	Geometridae	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Transcaucasus	Absent	Central and Northern Europe	<i>Pinus</i>	Needles	M – H	
3a.242	<i>Colotis [= Himera] pennaria</i>	Geometridae	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Central Europe; Turkey	<i>Quercus, Carpinus, Fagus, Betula, Populus, Salix</i>	Leaves	L – M	
3a.243	<i>Ectropis [Boarmia] bistortata</i>	Geometridae	Russia: widespread; Baltic countries; Belarus; Ukraine; Transcaucasus	Absent	Europe (widespread)	<i>Abies, Larix, Ribes</i>	Needles	L – H	Extremely polyphagous
3a.244	<i>Ectropis extersaria</i> [ <i>Parectropis luridata</i> (= <i>Boarmia extersaria</i> = <i>B. luridata</i> ))]	Geometridae	Russia: widespread except North regions; Baltic countries; Belarus; Ukraine	Absent	Central Europe; Japan	<i>Betula, Alnus, Quercus, Corylus</i>	Leaves	L – M	
3a.245	<i>Ennomos quercinaria</i>	Geometridae	C. E. Russia, S. E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Central Europe; Turkey	<i>Quercus, Betula, Tilia, Fagus, Carpinus</i>	Leaves	L – M	
3a.246	<i>Erannis [= Hybernia] defoliaria</i>	Geometridae	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Europe (widespread)	<i>Quercus, Fagus, Ulmus, Betula, Tilia, Fraxinus, fruit trees</i>	Leaves	L – M	
3a.247	<i>Eupithecia abietaria</i>	Geometridae	Russia: widespread in spruce area	Not known	Northern, western and central Europe	<i>Picea, Pinus,</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.248	<i>Eupithecia bilunulata</i> [ <i>E. analoga</i> ] [ <i>E. strobilata</i> ]	Geometridae	C. E. Russia, S. E. Russia, N.E.Siberia, N.W. Siberia, S. Siberia, Transbaik.; Baltic countries; Belarus, Ukraine	Not known	Northern western and central Europe	<i>Picea,</i>	Cones and seeds	M - H	Data of Dr. Alain Roques
3a.249	<i>Hylaea [Ellopia] fasciaria</i> [= <i>E. prosapiaria</i> ]	Geometridae	Russia: widespread; Baltic countries; Belarus; Ukraine; Transcaucasus; Kazakhstan	Absent	Central and Northern Europe	<i>Pinus, Picea, Abies</i>	Needles	L – M	
3a.250	<i>Lycia</i> [= <i>Biston</i> ] <i>hirtaria</i>	Geometridae	N. E. Russia, C. E. Russia, S.E. Russia, S. Siberia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Kazakhstan	Not known	Western Europe; Turkey	<i>Ulmus, fruit trees, Salix, Populus, Betula, Tilia, Acer, Quercus</i>	Leaves	L – M	

**Table 3a. INSECTS****LEPIDOPTERA**

3a.251	<i>Operophtera</i> [= <i>Cheimatobia</i> ] <i>brumata</i>	Geometridae	N.E. Russia, C.E.Russia, S.E. Russia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Turkmenistan	Western USA (introduced); Eastern Canada (introduced)	Europe (widespread); Iran; Japan; Algeria; Tunisia	<i>Quercus</i> , fruit trees, <i>Ulmus</i> , <i>Fagus</i> , <i>Tilia</i> , <i>Carpinus</i> , <i>Acer</i> , <i>Salix</i>	Leaves	M – H	
3a.252	<i>Poecilopsis</i> [= <i>Biston</i> ] <i>pomonaria</i>	Geometridae	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine	Not known	Northern – Western Europe	Deciduous fruit and forest trees & shrubs	Leaves	L – M	
3a.253	<i>Semiothisa</i> [= <i>Macaria</i> ] <i>liturata</i>	Geometridae	Russia; widespread; Baltic countries; Belarus; Ukraine; Transcaucasus	Not known	Western Europe	<i>Pinus</i> , <i>Picea</i> , <i>Abies</i>	Needles	L – M	
3a.254	<i>Semiothisa</i> [= <i>Macaria</i> ] <i>signaria</i>	Geometridae	Russia; widespread in coniferous area; Baltic countries; Belarus; Ukraine; Transcaucasus	Not known	Central and Northern Europe	<i>Picea</i> , <i>Abies</i> , <i>Pinus</i>	Needles	L – M	
3a.255	<i>Dendrolimus pini</i>	Lasiocampidae	Russia: widespread in pine area; Baltic countries; Belarus; Ukraine; Kazakhstan	Absent	Europe (generally); Asia (generally); Morocco	<i>Pinus sylvestris</i>	Needles	H – VH	
3a.256	<i>Eriogaster</i> [= <i>Lasiocampa</i> = <i>Gastropacha</i> ] <i>lanestris</i>	Lasiocampidae	Russia: widespread in forest area; Baltic countries; Belarus; Moldova; Ukraine	Absent	Western Europe	<i>Quercus</i> , <i>Betula</i> , <i>Tilia</i> , <i>Populus</i> , <i>Salix</i>	Leaves	L – M	
3a.257	<i>Malacosoma</i> [= <i>Gastropacha</i> ] <i>neustria</i>	Lasiocampidae	C. E. Russia, S. E. Russia, S. Siberia, S. Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Absent	Western Europe; Northern China; Korea; Japan	<i>Rosaceae</i> , <i>Quercus</i> , <i>Populus</i> , <i>Salix</i>	Leaves	L – M	
3a.258	<i>Cosmotricha</i> [= <i>Selenephora</i> = <i>Selenophora</i> ] <i>lunigera</i>	Lasiocampidae	Russia; widespread; Baltic countries; Belarus; Moldova; Ukraine	Absent	Central Europe	<i>Abies</i> , <i>Larix</i> , <i>Picea</i> , <i>Pinus</i>	Needles	L – H	
3a.259	<i>Calliteara</i> [ <i>Dasychira</i> ] <i>abietis</i>	Lymantriidae	Russia: widespread in coniferous area; Baltic countries; Belarus; Ukraine	Not known	Central and Northern Europe; Japan	<i>Picea</i> , <i>Abies</i> , <i>Pinus</i> , <i>Larix</i> ,	Needles	L – M	
3a.260	<i>Calliteara</i> [ <i>Dasychira</i> ] <i>pudibunda</i>	Lymantriidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Not known	Western Europe; Japan	<i>Quercus</i> , <i>Fagus</i> , <i>Carpinus</i> , <i>Betula</i> , <i>Salix</i>	Leaves	L – M	
3a.261	<i>Euproctis</i> [= <i>Nygma</i> ] <i>chrysorrhoea</i>	Lymantriidae	C. E. Russia, S. E. Russia ; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Canada, USA	Europe (widely); Iran; Syria; Turkey; Algeria; Morocco; Mauritania; Tunisia	<i>Quercus</i> , fruit trees, <i>Ulmus</i> , <i>Populus</i> , other deciduous	Leaves	M – H	
3a.262	<i>Leucoma</i> [= <i>Stilpnobia</i> ] <i>salicis</i>	Lymantriidae	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Canada (West); USA (East)	Europe (widely); Mediterranean region; Northern Mongolia; China; Korea; Japan; Northern Africa	<i>Salix</i> , <i>Populus</i>	Leaves	M – H	The most dangerous for plantations of <i>Salix</i> and <i>Populus</i>

**Table 3a. INSECTS**

LEPIDOPTERA										
3a.263	<i>Lymantria</i> [= <i>Ocneria</i> = <i>Porthetria</i> ] <i>dispar</i>	<i>Lymantriidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Canada and USA (introduced)	Europe (widely); Mediterranean region; India; Afghanistan; Iran; Iraq; China; Japan; Korea; Taiwan	<i>Quercus</i> , fruit trees, <i>Populus</i> , <i>Betula</i> , <i>Larix</i> , etc.	Leaves	M – VH	Extremely polyphagous	
3a.264	<i>Lymantria</i> [= <i>Ocneria</i> ] <i>monacha</i>	<i>Lymantriidae</i>	Russia: widespread in coniferous area; Baltic countries; Belarus; Ukraine; Transcaucasus	Absent	Europe (widely); China; Japan; Korea; Turkey; Mediterranean region (generally)	<i>Pinus</i> , <i>Picea</i> , <i>Abies</i> , <i>Larix</i>	Needles, young sprouts and buds	H - VH		
3a.265	<i>Orgyia antiqua</i>	<i>Lymantriidae</i>	Russia: widespread; Baltic countries; Belarus; Ukraine; Transcaucasus	Present	Western Europe; Eastern Asia; Northern China; Japan	<i>Quercus</i> , <i>Populus</i> , <i>Betula</i> , other deciduous, <i>Picea</i> , <i>Larix</i>	Leaves and needles	M - H		
3a.266	<i>Sphrageidus</i> [= <i>Euproctis</i> = <i>Porthesia</i> ] <i>similis</i>	<i>Lymantriidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Absent	Europe (widespread); China; Japan	<i>Quercus</i> , <i>Betula</i> , fruit trees	Leaves	L – M		
3a.267	<i>Acronicta aceris</i>	<i>Noctuidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Central Asia	Not known	Central and Western Europe; Mediterranean region	<i>Quercus</i> , <i>Acer</i> , <i>Ulmus</i> , <i>Fagus</i> , <i>Aesculus</i> , <i>Populus</i> , <i>Salix</i>	Leaves	L – M		
3a.268	<i>Agrotis segetum</i>	<i>Noctuidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Not known	Europe (widespread); Asia (widespread); Africa (widespread)	Deciduous, coniferous and other plants	Roots	L – M	Main damage - to young plantations and in nurseries	
3a.269	<i>Colocasia</i> [= <i>Demas</i> ] <i>coryli</i>	<i>Noctuidae</i>	N.E. Russia, C E.Russia, S.E. Russia, N.E.Siberia, N.W. Siberia, S. Siberia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Central and Northern Europe	<i>Quercus</i> , <i>Betula</i> , <i>Fagus</i> , <i>Carpinus</i> , <i>Corylus</i> , <i>Populus</i> , <i>Salix</i>	Leaves	L – M		
3a.270	<i>Moma</i> [= <i>Daseochaeta</i> = <i>Diptera</i> ] <i>alpium</i>	<i>Noctuidae</i>	Russia: widespread; Baltic countries; Belarus; Moldova; Ukraine	Absent	Central & Northern Europe; China; Korea; Japan	<i>Quercus</i> , <i>Fagus</i> , <i>Betula</i> , <i>Carpinus</i>	Leaves	L – M		
3a.271	<i>Orthosia cruda</i> [ <i>Monima</i> (= <i>Taeniocampa</i> ) <i>pulverulenta</i> ]	<i>Noctuidae</i>	N. E. Russia, C. E. Russia, S.E. Russia; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus	Not known	Central and Northern Europe; Mediterranean region	<i>Quercus</i> , <i>Acer</i> , <i>Tilia</i> , <i>Betula</i> , <i>Ulmus</i> , <i>Populus tremula</i>	Leaves	L – M		
3a.272	<i>Orthosia</i> [ <i>Monima</i> (= <i>Taeniocampa</i> ) <i>incerta</i>	<i>Noctuidae</i>	N.E.Russia, C.E. Russia, S.E. Russia, S.Siberia, S.Far East; Baltic countries; Belarus; Moldova; Ukraine; Transcaucasus; Kazakhstan; Central Asia	Present	Central and Northern Europe; Mediterranean region	<i>Quercus</i> , <i>Betula</i> , <i>Populus</i> , <i>Ulmus</i> , <i>Tilia</i>	Leaves	L – M
